

Contents

<i>Preface</i>	v
1. Drug Discovery and Stages of Drug Development	1
2. Lead Discovery and Drug Design	12
3. Bioisosterism: A Useful Strategy for Drug Development	32
4. Quantitative Structure–Activity Relationship: Part I	47
5. Quantitative Structural–Activity Relationship: Part II	59
6. Molecular Modeling—Tool for Drug Design and Molecular Docking	86
7. Virtual Screening Techniques	106
8. Chemoinformatics and Bioinformatics	111
9. Database	118
10. Molecular Mechanics and Quantum Mechanics	126
11. Energy Minimization and Conformational Analysis	134
<i>Appendices</i>	147
<i>Question Bank</i>	155
