Pre	face to the Second Edition	vii
	PART 1: DURABILITY AND DETERIORATION OF CONCRETE STRUCTURE	S
1.	Understanding Concrete and RCC Structures	3–4
	1.1 Introduction 3	
	1.2 What is to be Learnt 3	
2.	Physical Causes	5–17
	2.1 Introduction 5	
	2.2 Durability Aspect of Concrete 5	
	2.3 Major Causes for Distress in Concrete 6	
	<ul><li>2.4 Shrinkage Problem in Concrete 8</li><li>2.5 Freeze and Thaw on Concrete 10</li></ul>	
	2.6 Weathering Action on Concrete 11	
	2.7 Crazing on Concrete 12	
	2.8 Honeycombing on Concrete 12	
	2.9 Swelling Effect of Concrete 12	
	2.10 Pop Outs on Concrete 12	
	<ul><li>2.11 Creep Problem on Concrete 13</li><li>2.12 Abrasion, Erosion and Cavitation on Concrete 13</li></ul>	
	2.12 Abrasion, Erosion and Cavitation on Concrete 15 2.13 Temperature Variation 13	
	2.14 Fire Effect on Concrete 14	
	2.15 Thermal Movement in Concrete 14	
	2.16 Subgrade Movement 15	
	2.17 Formwork Movement 15	
	2.18 Settlement and Movement 15	
	2.19 Foundation Settlement 15	
	2.20 Design Errors152.21 Construction Errors16	
	2.22 Cracks due to Construction Overload 16	
	2.23 Cracks due to Externally Applied Loads 17	
	2.24 Accidental Loadings Effect 17	
3.	Chemical Causes	18-23
	3.1 Chemical Attack on Concrete 18	
	3.2 Carbonation Attack on Concrete 19	
	<ul><li>3.3 Chloride Attack on Concrete 19</li><li>3.4 Sulphate Attack on Concrete 19</li></ul>	
	3.5 Acid Attack on Concrete 20	
	3.6 Alkali Reaction on Concrete 20	
	3.7 Hydrolysis and Leaching on Concrete 20	
	3.8 Salt Attack on Concrete 20	
	3.9 Aggressive Water Attack 21	
	3.10 Crystallization of Salts in Pores 21	

x	Concrete Structures: Repair, Rehabilitation and Retrofitting	
4.	<ul> <li>3.11 Seawater Attack on Concrete 22</li> <li>3.12 Biological Attack on Concrete 22</li> <li>3.13 Mechanism of Miscellaneous Chemical Attack 23</li> <li>Corrosion</li> <li>4.1 Basic Principles of Corrosion 24</li> <li>4.2 Corrosion Mechanism of Embedded Metals 25</li> <li>4.3 Corrosion Process 26</li> <li>4.4 Symptoms to Causes of Distress and Deterioration 29</li> <li>4.5 Damages due to Corrosion 30</li> <li>4.6 Codal Provisions for Different Exposure Conditions 31</li> </ul>	24-33
_	4.7 Corrosion Protection Technique 32	
	Evaluation of Concrete and Reinforced Concrete Structures5.1Introduction 345.2Reviewing the Records 345.3Site Survey 345.4Shoddy Workmanship 355.5Pattern Cracking 355.6Isolation Cracks 355.7Disintegration and Spalling 365.8Erosion 365.9Joint Seals and Seepage 365.10Special Cases of Spalling 375.11Crack Surveys 375.12Surface Mapping 385.13Joint Inspections 385.14Core Drilling 38	34–38
6.	Causes of Distress and Deterioration of Concrete and Reinforced         Concrete Structures         6.1       Introduction 39         6.2       Chemical Reactions 39         6.3       Causes of Distress and Deterioration of Concrete 40         6.4       Symptoms to Causes of Distress and Deterioration 44         Short Answer Questions 45       Theory Questions 46	39-47
	PART 2: DAMAGE ASSESSMENT	
7.	Condition Survey and Nondestructive Testing System	51-64
	<ul> <li>7.1 Condition Survey 51</li> <li>7.2 Nondestructive Testing Methods 51</li> <li>7.3 Recent Developments on NDT Instruments 62</li> </ul>	
8.	Semidestructive Testing System	65-93
	<ul> <li>8.1 Introduction 65</li> <li>8.2 Chemical Testing of Concrete 83</li> <li>8.3 Diagnostic Methods of Corrosion Damage 84</li> <li>8.4 Investigation Strategies 85</li> <li>8.5 Determination of Concrete Quality and Composition 89</li> <li>8.6 Systematic Assessment of Fire Affected Structures 89</li> </ul>	

	Contents	
9. Destr	ructive Testing System	94-1
9.1 9.2 9.3 9.4 9.5	Introduction 94 Investigation of Damage 98 Testing System of Hardened Concrete 100 Evaluation of Cracks 100 Destructive Testing Systems 101 Short Answer Questions 103 Theory Questions 104	
	PART 3: REPAIR MATERIALS	
10. Mate	erials for Repair	109-1
10.1 10.2 10.3 10.4	Introduction 109 Chemical Admixtures: Classification 109 Essential Parameters of Coating 110 Repair Materials (Special) 110	
11. Func	tion of Repair Materials	112-1
11.1 11.2 11.3 11.4 11.5	Patching Materials112Resurfacing Materials117Sealing Materials124Waterproofing Materials128Bonding Materials131	
12. Spec	ial Types of Repair Materials	134-1
12.12 12.13 12.14 12.15 12.16 12.17 12.18 12.19	Introduction 134 Chemical Admixtures 135 Mineral Admixtures 138 Fly Ash 138 Ground Granulated Blast Furnace Slag (GGBS) 139 Condensed Silica Fume (CSF) 139 Admixtures for Repair/Rehabilitation 139 Epoxy Resins 140 Polymeric Materials 141 Organic Polymers 142 Polymeric Repair Materials 144 Fiber Reinforced Concrete 146 Behavior of Steel Fiber Reinforced Concrete 147 Application of SFRC to Repair of Distress Structures 149 Behavior of FRC with Other Fibers 149 Fibre Reinforced Polymer Composites 152 Ferrocement 154 SIFCON and SIMCON Materials 156 Miscellaneous Materials 157 Requirements for the Repair Materials 158	
	ction and Evaluation of Materials	159-1
13.1 13.2 13.3	Introduction 159 Selection of Repair Materials 159 Classification of Repair Materials 161	

xii	Concrete Structures: Repair, Rehabilitation and Retrofitting	
13.4	Evaluation Tests for Repair Materials 161 Short Answer Questions 169 Theory Questions 170	
	PART 4: REPAIR AND REHABILITATION OF CONCRETE STRUCTURES	3
14. <mark>Planı</mark>	ning and Designing of Concrete Repair	175-178
14.1 14.2 14.3 14.4	Introduction 175 Planning a Repair 176 Causes and Repair Approaches for Spalling and Disintegration 177 Repair Methods for Spalling and Disintegration 177	
15. <mark>Rep</mark> o	air of Cracks	179-190
15.3 15.4 15.5	Introduction 179 Repair Procedure 180 Durable Repair Design 181 Durable Repair Application 181 Repair Method 182 Methods of Repair 182	
16. Cono	crete Removal and Preparation for Repair	191-202
16.1 16.2 16.3	Introduction 191 General Classification of Concrete Removal Methods 191 Removal Methods 191	
	egies and Techniques for Repair/Rehabilitation/Retrofitting ructures	203-208
17.1 17.2 17.3	Introduction 203 Techniques to Restore Original Strength 204 Strengthening RC Members 205 Short Answer Questions 206 Theory Questions 208	
	PART 5: RETROFITTING OF STRUCTURES	
18. Tech	niques for Strengthening/Retrofitting	211-226
18.1 18.2 18.3 18.4 18.5 18.6 18.7 18.8 18.9	Introduction 211 Structural Concrete Strengthening 213 Strengthening with External Reinforcement 217 Short Spanning 218 External Post-tensioning 218 Section Enlargement 219 Strengthening by SIMCON 219 Dam Safety: Concrete Repair/Retrofitting Techniques 220 General Guidelines for Seismic Rehabilitation of Existing Buildings 222	
19. Repo	air/Retrofit of Nonengineered Structures	227-231
19.1 19.2 19.3 19.4 19.5 19.6	Introduction 227 Repair Materials 227 Repair Techniques 228 Strengthening of Walls 229 Strengthening of Pillars 230 Techniques for Global Strengthening 230	

	Contents	xi
20. Retro	ofit of Historical and Heritage Structures	232-23
20.1	Introduction 232	
20.2	Basic Principles of Structural Restoration 232	
20.3	Condition Assessment 232	
20.4 20.5	Strengthening of Masonry Walls 232 Strengthening of Arches, Vaults and Domes 233	
20.5	Strengthening of Arches, Vaults and Domes 233 Strengthening of Towers and Spires 233	
20.0	Reduction of Seismic Effects on Structures 233	
20.8	Strengthening of Soils and Foundations 233	
20.9	Archaeological Reconstruction 234	
21. Retro	ofit of Reinforced Concrete Structures	236-2
21.1	Introduction 236	
21.2	Building Deficiencies 237	
21.3	Retrofit Strategies 243	
21.4	General Remarks 255	
21.5	Summary 256	
	of Foundations	257-27
22.1 22.2	Overview 257 Introduction 257	
22.2	Introduction 257 Deficiencies of Foundations 258	
22.3	Condition Assessment of Foundations 258	
22.5	Methods of Analysis 259	
22.6	Types of Interventions 259	
22.7	Methods of Execution 266	
22.8	Implemented Case 270	
22.9	Summary 271	
23. Retro	ofit Using FRP Composites and Base Isolation Technique	272-28
23.1	Overview 272	
23.2	Introduction 272	
23.3	Strengthening of Masonry Walls 276	
23.4	Strengthening of Reinforced Concrete Beams 278	
23.5	Strengthening of Reinforced Concrete Columns 280	
23.6	Strengthening of Beam–Column Joints 282	
23.7	Summary of Use of FRP 282	
23.8	Base Isolation 282	
	Theory Questions 287	
	PART 6: CASE STUDIES	
24. Retro	ofit of Buildings and Other Structures	291-29
24.1	Retrofit of a Building 291	
24.2	A Double Storeyed Load Bearing Residential Building at Mumbai 292	
24.3	Rehabilitation of RCC Overhead Reservoir at Siliguri, WB 293	
	air/Rehabilitation of Bridges	297-3
25.1	Assessment and Retrofitting of Masonry Arch Bridge 297	
25.2	Retrofitting/Strengthening of Masonry Bridge Structure 300	
25.3	Rehabilitation of Concrete Bridges 302	
25.4	Rehabilitation of a Road Overbridge at Bankim Setu 309	

	Constate Structures, Densir, Behabilitation and Batrafitting	
ĸiv	Concrete Structures: Repair, Rehabilitation and Retrofitting	
26. Repo	air/Rehabilitation of Marine Structures	313-327
26.1	Repair/Rehabilitation of Jetty in Mumbai 313	
26.2	Rehabilitation of Oil Jetty at New Mangalore Port 319	
26.3	Repair/Rehabilitation of Marine Structures: Kandla Port 321	
26.4	Structural Reassessment of Offshore Platforms 325	
27. Repa	air/Rehabilitation of Monuments	328-333
27.1	Structural Preservation of Lord Jagannath Temple at Puri 328	
28. Repa	air/Rehabilitation of Irrigation Structures	334-351
28.1		
28.2		
28.3		
28.4	Massingir Dam (Mozambique) 341	
28.5	Upper Indravati Hydroelectric Project 343	
28.6	Remedial Measures for the Gates of Hirakud Dam 345	
	Theory Questions 351	
29. Earth	nquake Resistant Engineered Buildings	352-366
29.1	Basic Philosophy 352	
29.2	Nature of Earthquake Loading 352	
29.3	Codification 354	
29.4	Enhanced Earthquake Resistance 356	
29.5	Reduction Factors 357	
29.6	Building Configuration, Stiffness and Loading 359	
29.7	The Magnificent Tool of Structural Separation 360	
	0	
	nic Damage Classification and Repair—Strategy for Random Rub	
and	nic Damage Classification and Repair—Strategy for Random Rub Brick Masonry Buildings in Gujarat	ble 367-374
