<i>Foreword by HK Sahoo</i>	v
<i>Preface to the Second Edition</i>	vii
<i>Preface to the First Edition</i>	ix
1. Introduction	1
2. Qualitative Chemical Analysis of Minerals	3
2.1. Dry tests for basic radicals	7
2.1.1. Closed tube test	7
2.1.2. Open tube test	7
2.1.3. Heating in charcoal cavity in oxidizing flame	8
2.1.4. Heating in charcoal cavity in reducing flame	8
2.1.5. Flame test	9
2.1.6. Microcosmic bead test	9
2.1.7. Borax bead test	10
2.2. Wet confirmatory tests for basic radicals	10
2.3. Tests for acid radicals	14
3. Quantitative Analysis of Rocks and Minerals	16
3.1. Grinding of sample	16
3.2. Opening of sample	16
3.3. Estimation of SiO_2 by gravimetric analysis	17
3.3.1. Sodium carbonate (Na_2CO_3) fusion method	17
3.3.2. Borate fusion method	18
3.4. Estimation of Al_2O_3 by EDTA complexometry back titration method	18
3.5. Estimation of iron	19
3.5.1. Potassium dichromate method	19
3.5.2. Potassium permanganate method	20
3.6. Estimation of CaO	22
3.6.1. EDTA complexometry method	22
3.6.2. Oxalate method	22
3.7. Estimation of MgO	23
3.7.1. EDTA complexometry method	23
3.7.2. Pyrophosphate method	23
3.8. Estimation of Na_2O and K_2O	24
3.8.1. Preparation of stock solution	24
3.8.2. Estimation of Na_2O by titrimetry method	25
3.8.3. Estimation of K_2O by titrimetry method	25
3.8.4. Flame photometry	26
3.8.5. Estimation of Na_2O and K_2O by flame photometry	27
3.9. Estimation of TiO_2 by ferric ammonium sulphate titration method	28
3.10. Estimation of MnO by permanganate method	28
3.11. Estimation of P_2O_5 by Wilson method	29

- 3.12. Estimation of water 29
 - 3.12.1. Estimation of water of crystallization (H_2O+) by Penfield's tube 29
 - 3.12.2. Estimation of adsorbed water (H_2O-) 30
- 3.13. Estimation of CO_2 30
- 3.14. Estimation of S 31
- 3.15. Estimation of F 32
- 3.16. Estimation of Cl by Volhard's method 33
- 3.17. Estimation of LOI 33

4. Quantitative Analysis of Ores and Minerals

34

- 4.1. Estimation of antimony in antimony ore 34
- 4.2. Estimation of arsenic in arsenic ore 35
- 4.3. Estimation of cobalt in cobalt ore 35
- 4.4. Estimation of chromium in chromite 36
- 4.5. Estimation of iron in iron ore 37
- 4.6. Estimation of FeS_2 in pyrite 38
- 4.7. Estimation of manganese in manganese ore 38
- 4.8. Estimation of molybdenum in molybdenum ore 39
- 4.9. Estimation of nickel in nickel ore 40
 - 4.9.1 Estimation of nickel from sulphide ores 41
 - 4.9.2 Estimation of nickel from oxidised ores 41
- 4.10. Estimation of Cu, Pb and Zn in polymetallic ores 42
 - 4.10.1. Preparation of stock solution 42
 - 4.10.2. Estimation of copper by sodium thiosulphate titration method 42
 - 4.10.3. Estimation of zinc by EDTA complexometry method 42
 - 4.10.4. Estimation of lead by EDTA complexometry method 43
- 4.11. Estimation of tin in tin ore 43
- 4.12. Estimation of titanium in titanium ore 44
- 4.13. Estimation of vanadium in vanadium ore 45
- 4.14. Estimation of tungsten in tungsten ore 45
- 4.15. Estimation of zirconium in zircon 46
- 4.16. Estimation of $BaSO_4$ in barium ore 47
- 4.17. Estimation of CaF_2 in fluorite 48
 - 4.17.1. Estimation of loss of weight in digestion 48
 - 4.17.2. Estimation of correction for acid soluble matter 48
- 4.18. Estimation of $CaSO_4 \cdot 2H_2O$ in gypsum 48
- 4.19. Estimation CaO and P_2O_5 in apatite 49
 - 4.19.1. Preparation of stock solution 49
 - 4.19.2. Estimation of total CaO 49
 - 4.19.3. Estimation of free CaO 50
 - 4.19.4. Estimation of P_2O_5 50

5. Analysis of Coal

51

- 5.1. Proximate analysis 51
 - 5.1.1. Estimation of moisture (M) in coal 51
 - 5.1.2. Estimation of ash (A) in coal 52
 - 5.1.3. Estimation of volatile matter (VM) in coal 53
 - 5.1.4. Estimation of fixed carbon (FC) 53
 - 5.1.5. Reporting proximate analysis values 53
- 5.2. Ultimate analysis 55
 - 5.2.1. Estimation of carbon and hydrogen 55
 - 5.2.2. Estimation of nitrogen 56
 - 5.2.3. Estimation of sulphur in coal by Eschka's method 57
 - 5.2.4. Estimation of oxygen in coal 58
- 5.3. Estimation of calorific value (CV) of coal 58

6. Analysis of Water Sample

60

- 6.1. Instruments for water analysis 60
 - 6.1.1. Ion/ pH meter 60
 - 6.1.2. Spectrophotometer 62
 - 6.1.3. Water analyzer kit 64
- 6.2. Estimation of aluminium (Al) by eriochrome cyanine R spectrophotometric method 66
- 6.3. Estimation of calcium (Ca) by EDTA titrimetry 67
- 6.4. Estimation of carbonate and bicarbonate 69
 - 6.4.1. Estimation of carbonate and bicarbonate by titrimetry 69
 - 6.4.2. Estimation of bicarbonate from pH and alkalinity 69
 - 6.4.3. Estimation of carbonate from pH and alkalinity 70
- 6.5. Estimation of chloride 70
 - 6.5.1. Water sample without interfering substances 70
 - 6.5.2. Water sample with or without interfering substances 70
 - 6.5.3. Procedure for colourless water sample without any interfering substances 71
 - 6.5.4. Procedure for coloured water sample with interfering substances 71
 - 6.5.5. Distilled water is suspected to contain chlorine 72
- 6.6. Estimation of hexavalent chromium 73
 - 6.6.1. Procedure in absence of oxidizing or reducing substances 73
 - 6.6.2. Procedure in the presence of oxidizing or reducing substances 73
- 6.7. Determination of colour of water sample by UV-spectrophotometric method 74
- 6.8. Estimation of cyanide 74
 - 6.8.1. Estimation of cyanide by ion selective electrode method 75
 - 6.8.2. Estimation of cyanide by colorimetric method 75
- 6.9. Estimation of electrical conductivity by conductivity meter 76
- 6.10. Estimation of fluoride 78
 - 6.10.1. Estimation of fluoride (F) by ion selective electrode method 78
 - 6.10.2. Estimation of fluoride by SPADNS spectrophotometric method 79
 - 6.10.3. Estimation of fluoride in water sample by colorimetric method 81
- 6.11. Estimation of iron (Fe) by phenanthroline spectrophotometric method 82
- 6.12. Estimation of magnesium from total hardness (TH) and calcium 83
- 6.13. Estimation of manganese (Mn) by persulphate spectrophotometric method 83
- 6.14. Estimation of mercury by mercury analyser 89
- 6.15. Estimation of nitrate 86
 - 6.15.1. Estimation of nitrate by spectrophotometric method in ultra violet range 86
 - 6.15.2. Estimation of nitrate by spectrophotometric method in visible range 87
 - 6.15.3. Estimation of nitrate by ion selective electrode 88
- 6.16. Estimation of oxygen (dissolved) 89
- 6.17. Estimation of pH by pH meter 90
- 6.18. Estimation of phosphate 91
 - 6.18.1. Estimation of phosphate by ascorbic acid spectrophotometric method 91
 - 6.18.2. Determination of phosphorus by stannous chloride: Spectrophotometric method 92
- 6.19. Estimation of potassium by flame photometer 92
- 6.20. Estimation of silicate (SiO_2) by ammonium molybdate spectrophotometric method 93
- 6.21. Estimation of sodium (Na) by flame photometer 94
- 6.22. Estimation of sulphate 94
 - 6.22.1. Estimation of sulphate by spectrophotometric method 95
 - 6.22.2. Estimation of sulphate by gravimetric method 95
 - 6.22.3. Estimation of sulphate (SO_4) by nephelometry 96
- 6.23. Estimation of sulphide by iodometric method 97
- 6.24. Estimation of total acidity 98

- 6.25. Estimation of total alkalinity 99
 - 6.25.1. Titration with HCl 99
 - 6.25.2. Titration with H₂SO₄ 99
 - 6.25.3. Phenolphthalein method 100
- 6.26. Estimation of total solids (TS), suspended solids (SS) and total dissolved solids (TDS) in water sample 100
 - 6.26.1. Total solids 101
 - 6.26.2. Suspended solids 101
 - 6.26.3. Total dissolved solids 101
- 6.27. Estimation of total hardness 101
 - 6.27.1. Estimation of total hardness (TH) by EDTA titrimetry without complexing agent 102
 - 6.27.2. Estimation of total hardness (TH) by EDTA titrimetry with complexing agent 102
- 6.28. Determination of turbidity by turbidity meter/nephelometer 103
- 6.29. Data validation 104
- 6.30. Chemical Equivalence 404
- 6.31. Graphical representation of water chemistry 105
- 6.32. Suitability of water in different fields of use 109
 - 6.32.1. Drinking water 109
 - 6.32.2. Irrigation water 109
 - 6.32.3. Quality of water used in industries 113

7. Analysis of Soil Sample

115

- 7.1. Sampling of soil 115
- 7.2. Determination of physical parameters 115
 - 7.2.1. Estimation of surface texture of soil 115
 - 7.2.2. Estimation of pH of soil 117
 - 7.2.3. Estimation of electrical conductivity of soil 117
 - 7.2.4. Estimation of water holding capacity of soil 117
- 7.3. Estimation of chemical parameters 118
 - 7.3.1. Estimation of organic carbon content of soil 118
 - 7.3.2. Estimation of cation exchange capacity of soil 119
 - 7.3.3. Estimation of exchangeable calcium and magnesium in soil 120
 - 7.3.4. Estimation of exchangeable sodium and potassium in soil 122
 - 7.3.5. Estimation of calcium carbonate content of soil 122
 - 7.3.6. Estimation of calcium bicarbonate content of soil 123
 - 7.3.7. Estimation of total nitrogen in soil 123
 - 7.3.8. Estimation of ammonium-nitrogen in soil 124
 - 7.3.9. Estimation of nitrate-nitrogen in soil 125
 - 7.3.10. Estimation of available phosphorus in soil 127
 - 7.3.11. Estimation of total sulphur in soil 129
 - 7.3.12. Estimation of available sulphur in soil 130
 - 7.3.13. Estimation of mercury in soil 131
 - 7.3.14. Estimation of boron in soil 133
 - 7.3.15. Estimation of chloride in soil sample 134
 - 7.3.16. Preparation of soil for determination of trace/heavy elements 134

8. Analysis of Air Sample

136

- 8.1. Suspended particulate matter (SPM) 136
- 8.2. Analysis of gaseous pollutants 136
 - 8.2.1. Estimation of nitrogen dioxide (NO₂) 136
 - 8.2.2. Estimation of sulphur dioxide 138
