<i>Preface to the Fourth Edition</i>	v
<i>Preface to the First Edition</i>	vii
<b>1. Introduction</b>	<b>1</b>
What is a plant disease?	4
Socio-economic significance of plant diseases	5
The science of plant pathology	9
Terminology	10
<b>2. History of Plant Pathology</b>	<b>13</b>
Ancient agriculture	13
Discovery of the role of Fungi	16
Discovery of the role of Bacteria	19
Role of Nematodes	21
Discovery of the role of Viruses	22
Mycoplasma-like Organisms (MLOs) and Rickettsia-like Bacteria (RLBs)	24
Protozoan Diseases of Plants	25
Developments in Chemical Control of Plant Diseases	25
Plant Pathology in India	27
<b>3. Causes of Plant Diseases</b>	<b>31</b>
Inanimate causes	31
Viruses and Viroids	34
Animate causes	35
Classification of Plant Diseases	38
<b>4. Symptoms and Identification of Plant Diseases</b>	<b>41</b>
Disease Diagnosis	44
<b>5. Pathogenesis</b>	<b>46</b>
Parasitism and Pathogenicity	46

Pathogenesis	49
The Infection Chain	50
<b>6. Survival of Plant Pathogens</b>	<b>56</b>
Survival of Fungal Pathogens	57
Survival of Phytopathogenic Bacteria	62
Survival of Plant Pathogenic Nematodes	66
Survival of Phanerogamic Plant Parasites	67
Perennation of Plant Viruses	67
<b>7. Dispersal of Plant Pathogens</b>	<b>68</b>
Autonomous Dispersal	69
Passive Dispersal	76
Dispersal by Members of Animal Kingdom	76
Dispersal by Fungi and Phanerogamic Plant Parasites	82
Dispersal by Water	84
Dispersal by Air	85
<b>8. The Phenomenon of Infection</b>	<b>87</b>
Inoculum and Inoculum Potential	87
Pre-penetration Activities of the Pathogen on the Host Surface	88
Penetration	93
Infection	99
Colonization of the Host	101
Exit of the pathogen	104
Factors Influencing Infection	104
<b>9. Epidemiology</b>	<b>109</b>
Compound Interest Diseases	111
Simple Interest Diseases	112
Slow and Rapid Epiphytotics	113
Essential Conditions for an Epidemic	114
Decline of the Epidemic	117
Disease Measurement	118
Disease Severity	118
Disease Progress Curve and Mathematical Models	119
Analysis of Epidemics	121
<b>10. Effect of Infection on the Host</b>	<b>125</b>
Tissue Disintegration	126
Effect on Growth of the Host	131
Effect on Reproduction	137
Effect on Uptake and Translocation of Water and Nutrients	139

Effect on Respiration of the Host	143
Effect of Pathogens on Photosynthesis	147
Effect on Permeability of Cell Membranes	149
The Loss of Yield	149
<b>11. Role of Toxins in Plant Pathogenesis</b>	<b>151</b>
Pathotoxins, Vivotoxins and Phytotoxins	151
Effect of Toxins on Plant Tissues	153
The Selective (Host-specific) Toxins	154
The Non-selective (Non-specific) Toxins	158
<b>12. Defence Mechanisms in Plants</b>	<b>163</b>
Passive or Pre-existing Structural Defence	165
Pre-existing Biochemical Defence	169
Active Defence Mechanisms	175
Post-infection Structural Defence	176
Post-infection Cellular Defence Structure	180
Post-infection Cytoplasmic Defence Reactions	181
The Necrotic or Hypersensitive Reactions	181
Post-infection Biochemical Defence	182
Phenolic Compounds and Their Role in Defence	183
Phytoalexins	185
<b>13. Genetic Variability in Plant Pathogens</b>	<b>200</b>
Variability in Viruses	201
Variability in Bacteria	202
Genetics and Variability of Fungi	203
Levels of Variability in Pathogens	207
Loss of Virulence in Plant Pathogens	208
<b>14. Genetics and Molecular Basis of Host-Parasite Interaction</b>	<b>209</b>
Evolution of Parasitism	209
Genetics of Host-Parasite Interaction	210
Gene-for-Gene Relationship	212
Criteria for Gene-for-Gene Type of Relationship	218
Molecular Basis of Host-Parasite Interaction	219
Host-Parasite Interaction	226
<b>15. Effect of Environments on Pathogenesis</b>	<b>230</b>
Effect of Temperature on Infectious Diseases	232
Effect of Moisture and Humidity	237
Effect of Shade	242
Effect of Wind	244

Effect of Light	244
Effect of Soil Reaction (pH)	245
Effect of Oxygen and Carbon Dioxide Concentration	247
Herbicides and Insecticides	249
Plant Nutrition	250
The Biotic Environment	254
Antagonistic Associations	255
The Role of Metabolites	256
Phenomenon of Fungistasis	257
Symbiotic Associations	259
Synergistic Associations	260
The Suppressive or Resistant Soils	263
Organic Amendments of Soil	265
Microbial Interactions on the plant Surfaces	267
The Phylloplane	267
The Rhizosphere	268
Forecasting of Plant Diseases	270
Some Examples of Disease Forecasting	274
<b>16. Assessment of Disease Incidence, Severity and Loss</b>	<b>279</b>
Measuring Disease Severity	281
Examples of Assessment Keys	284
Sampling for Assessment	289
Remote Sensing	291
Measurment of Loss	292
<b>17. Disease Management—Principles</b>	<b>296</b>
Management Planning Against a Disease or for a Crop	296
Some Considerations in Plant Disease Management	297
Disease Cycle-Disease Control Relationship	298
Bases of Disease Management Principles	299
Exclusion of the Pathogen	301
Avoidance of the Pathogen	303
Eradication of the Pathogen	304
Protective Measures	306
Development of Resistance in the Host	308
Therapy of Diseased Plant	309
<b>18. Disease Management—The Practices</b>	<b>310</b>
Cultural Practices for Disease Management	310
Production and use of Disease-Free Propagating Material	310
Adjustment of Crop Culture of Minimize Disease Incidence	312
Field and Plant Sanitation	325

Biological Control	329
Host Resistance for Disease Management	338
Disease Management through Toxic Chemicals	343
Fungicides, Nematicides and Antibiotics in Use	346
Sulphur Fungicides	347
Copper Fungicides	348
Quinone Fungicides	349
Benzene Fungicides	349
Heterocyclic Nitrogen Compounds	349
Organo Tin Compounds	350
Systemic Fungicides	350
Antibiotics	355
Nematicides	356
Mode of Action	356
Non-Conventional Chemical in Disease Control	358
<b>Bibliography</b>	<b>359</b>
<b>Index</b>	<b>387</b>
