

Contents

1. Introduction and History	1
Introduction, What are mushrooms? Mushrooms and toad stools, Fairy rings, Puffballs, History of mushroom cultivation, General view of mushroom cultivation in the world, Scope and development of mushroom science, Concept of mushroom technology, Different methods of mushroom growing, Essentials of mushroom science, Seven phases of mushroom technology and present scenario of mushroom cultivation.	
2. Economics Importance	25
What is nutrition? Mushroom as food in our diet, Nutrition and food, What are nutrients? Mushroom as low caloric food, Nutritional consideration, Mushroom in therapeutic diets, Mushroom in cardiovascular diseases, a simple menu for an adolescent boy and girl, Menu for old aged person and for diabetic patients.	
3. Morphology and Taxonomy	55
Mushroom morphology, variations in edible mushrooms, Different parts of a typical mushroom, Taxonomy of edible fungi, Classification according to natural habits, Classification according to colour of spores, Keys for identification of mushrooms, Classification according to morphology, Recent classification, Sexuality in cultivated mushrooms.	
4. Edible and Poisonous Mushrooms	93
Mushrooms for beginners, Common rules to select mushrooms for consumption, Description of some edible mushrooms, A partial list of some edible mushrooms, Some critical edible mushrooms, Poisonous mushrooms, Characteristics of poisonous mushrooms, Mushroom	

poisoning, Different types of mushroom poisoning, Nature of poisonous mushrooms, Guidelines to avoid poisonous species and key to poisonous species of mushrooms.

5. **Cultivation System & Farm Design** 120
 Fundamentals of cultivation system, Small village unit, Larger commercial unit, Mushroom farm layout, Location of the building plot, Design of the farm bulk chamber, Equipments and facilities, pasteurization room, Growing room, Installation of the warming and steam unit, Mushroom research laboratory.
6. **Compost and Composting** 137
 Compost requirement for *Agaricus bisporus* and *Agaricus bitorquis*, Principles of composting, Materials for compost preparation, Formulations, Determination of moisture content, Two phases of composting, Methods of composting, Long method of composting, Short method of composting, Important tips for good compost and indicator moulds.
7. **Spawn & Spawning** 154
 What is spawn? Different kinds of spawn, Preparation of spawn substrate, Pure grain spawn, Characteristics of good spawn, Preparation of pure culture, Facilities required for spawn preparation, Raising mycelia culture, Culture maintenance, Precaution in spawn preparation, Precaution during transit, Storage of spawn, Spawning methods and limitations in commercial spawn production.
8. **Casing Materials and Case Running** 172
 What is casing mixture? Importance of casing mixture, Quality parameters of casing soil, Different types of casing mixtures, Commonly used materials, Adjustment of pH, Pasteurization of casing mixture, Time and depth of casing.
9. **Breeding for Quality Mushroom** 176
 Importance of breeding, Precaution in commercial spawn production, Breeding for quality mushroom production, Techniques for breeding, techniques for strain

development, Essentials for mushroom breeding, Programme and future breeding prospects.

- 10. Button Mushroom Cultivation**

General morphology, Distinguishing characteristics, Spore germination and life cycle, Crop management, Selection and maintenance of strain, Composting, Spawning and spawn run, Casing and case run, Pinning, Cropping and picking, Harvesting, Grading and packing, Cultivation of summer button mushroom.

180
- 11. Cultivation of Oyster Mushroom**

Chief characteristics, Physiological requirements, Cultivation technology, Methods of substrate preparation, Spawn and spawning, Various types of containers, Incubation and fruit body production, Management of the crop, Harvesting and packing, Marketing and storage, Other methods of oyster mushroom cultivation, Log culture of oyster mushroom, Cube culture method of oyster mushroom cultivation and semi mechanized cultivation.

200
- 12. Straw Mushroom Cultivation**

Introduction, Distinguishing characteristics, Life cycle, Nutritional and dietary importance, Paddy straw mushroom cultivation, Substrate preparation, Spawn preparation, Spawning, Bed preparation, Other methods of straw mushroom cultivation, Hong Kong method, Malaysia method, Thailand method, Modern cotton waste method and improved caged cultivation of straw mushroom.

218
- 13. Cultivation of Shiitake Mushroom**

Introduction, Distinguishing characteristics, Taxonomic position, Cultivation technology, The log preparation, Spawn production, Method of spawning, Crop management, Synthetic log cultivation, Different formulations, Synthetic substrate preparation method, Bag filling technique, Spawn and spawning, Cropping and harvesting and characteristic feature of plastic bag methods.

230

- 14. Cultivation of Black Ear Mushroom** **242**
 Introduction, Distinguishing characteristics, Taxonomic position, Nutritional importance, Different cultivated species, Cultivation technology, Log cultivation, Bag culture cultivation and flow chart of cultivation.
- 15. Cultivation of Specialty Mushrooms** **250**
 Cultivation of *Calocybe indica*, cultivation technology, Substrate preparation and cultivation, Spawn preparation, Spawning and spawn run, Casing soil and casing, Cropping and harvesting, Cultivation of *Flammulina velutipes*, Cultivation technology, Substrate preparation, Fruit bodies formation; Cultivation of *Tremella fuciformis*, Cultivation of *Pholiota nameko*, Characteristics and cultivation technology; Some other edible non-cultivated mushrooms.
- 16. Diseases of Mushrooms** **258**
 Introduction, Diseases of button mushroom, Competitor moulds, Fungal diseases of button mushroom – Dry bubble, false truffle, cobweb disease or mildew, weed fungi and competitor moulds, Physiological diseases – Rose comb disease, stroma and sectors or sectoring, flock hard cap, open veil, hollow core, brown pitch, purple stem, scales or crocodiles and long stemmed mushrooms, Bacterial disease of button mushroom-bacterial blotch or brown blotch, ginger blotch, mummy disease, drippy gall and pit disease.
- 17. Insect-pests and Nematodes** **284**
 Common insect-pests of mushroom, Flies as insect-pests, Management and control of flies, Springtails as insect-pests and their management, Beetles as insect-pests and their management, Mushroom mites and their management, Nematodes as pests and their management.
- 18. Post-harvest Handling and Processing** **298**
 Introduction, Short term storage, Long term storage,

Different methods of storage, Canning of mushrooms, Freeze-drying method, Pickling of mushrooms, Drying of mushrooms, Vacuum cooling method, Marketing, Difficulties in marketing, Suggestions to improve marketing, Future prospects in mushroom marketing and packaging of mushrooms.

19. Transfer of Mushroom Technology	306
Introduction, Need for transfer of technology, Need to modify existing transfer of technology, Challenges faced in transfer of mushroom technology, Principles for transfer of technology, Sources of information for various inputs and guidance, Training for mushroom cultivation, Important mushroom journals, Finance facility offered, Sources of spawn and international sources of spawn.	
Practicals in Mushroom Cultivation	322
Glossary	338
Bibliography	347
Subject Index	353
