<i>Preface to the Sixth Edition</i>	<i>vi</i>
1. Origin, Formation and Composition of Petroleum	1
1.1 Origin and formation of petroleum	1
1.2 Reserves and deposits of world	8
1.3 Petro Glimpses and Petroleum Industry in India	14
1.4 Composition of petroleum	61
2. Petroleum Processing Data	96
2.1 Evaluation of petroleum	96
2.2 Thermal properties of petroleum fractions	119
2.3 Important Products-Properties and Test Methods	133
3. Fractionation of Petroleum	204
3.1 Dehydration and Desalting of Crudes	204
3.2 Heating of Crude Pipe Still Heaters	208
3.3 Distillation of Petroleum	226
3.4 Blending of Gasolines	249
4. Treatment Techniques	263
4.1 Fractions-Impurities	263
4.1.1 Physical or Mechanical Impurities	263
4.1.2 Chemical Impurities	264
4.1.3 Production and Treatment of LPG (SNG, NG)	272
4.1.4 Dehydration of Gases	277
4.1.5 Sweetening Operation for Gases	277
4.2 Gasoline Treatment	280
4.2.1 Copper Chloride Process (Figure 4.4)	281

4.2.2	Inhibitor Sweetening	281
4.2.3	Caustic and Methanol (Unisol Process)	283
4.2.4	Lead Doctoring of Gasoline (Fig. 4.6)	285
4.2.5	Merox Sweetening (Figure 4.7)	286
4.2.6	Sulfuric Acid Treatment	286
4.2.7	Catalytic Desulfurisation	289
4.3	Treatment of Kerosene	290
4.3.1	Liquid Sulfurdioxide Extraction of Aromatics	291
4.4	Treatment of Lubes	296
4.4.1	Sulfuric Acid Treatment	300
4.4.2	Clay Treatment	301
4.4.3	Solvent Treatment	306
4.4.4	About Extraction	317
4.5	Wax and Purification	320
4.5.1	Dewaxing	322
4.5.2	Dewaxing with Solvents	324
4.5.3	Propane Deasphalting	329
5.	Thermal and Catalytical Processes	341
5.1	Cracking	341
5.1.1	Thermal Cracking Reactions	341
5.1.2	Visbreaking	352
5.1.3	Cracking for Production of Gasoline	354
5.2	Catalytic Cracking	357
5.2.1	Carbonium Ion Chemistry	358
5.2.2	Catalytic Crackers—Types—Working	365
5.2.3	Catalytic Cracking Processes	368
5.2.4	Fluid Catalytic Cracking (FCC Complex and Hardware)	373
5.3	Catalytic Reforming Introduction and Theory	381
5.3.1	Reactions-Conditions	383
5.3.2	Catalysts	385
5.4	Naphtha Cracking	397
5.4.1	Feed Stock Selection	401
5.4.2	Effect of Steam	401
5.5	Coking	402
5.5.1	Delayed Coking	406
5.5.2	Fluid Coking	410
5.5.3	Flexi Coking	410
5.5.4	Contact Coker	411
5.6	Hydrogen Processes	412

5.6.1	Hydrocracking	413
5.6.2	Moving Beds (Ebulient Bed Reactors)	421
5.6.3	Hydrosulfurization and Hydrotreatment	423
5.6.4	Hydrotreatment/Hydrofining	431
5.7	Alkylation	433
5.7.1	Cascade Sulfuric Acid Alkylation	434
5.7.2	H.F. Alkylation	435
5.8	Isomerisation Processes	437
5.8.1	Isomerisations with Platinum Catalyst	437
5.9	Polymer Gasolines	441
6.	Asphalt Technology	447
6.1	Source of asphalt (bitumen)	447
6.1.1	Chemical Structure of Asphalt	447
6.1.2	Action of Heat on Asphalt	449
6.1.3	Types of Asphalts	449
6.2	Air Blowing of Bitumen	450
6.3	Upgradation of Heavy Crudes	451
7.	Bio Fuels	454
7.1.1	Bio Fuels (Diesel)	454
7.1.2	History and significance and Relative Importance	455
7.2.1a	Algal biofuels	456
7.2.1b	Green diesel	458
7.2.2	Processing of bio diesel	459
7.2.3	Specifications of Bio-Diesel	462
7.3.1	Bio ethanol	464
7.4.1	Biofuel Mission of India	464
8.	Green House Gases	471
8.1.1a	Presence of GHGs	471
8.1.1b	Methane	474
8.1.1c	Water Vapour	474
8.2.1	Global-warming potential (GWP)(5)	475
8.2.2	Extreme Weathers	476
8.3.1	Kyoto Protocol	479
8.3.2b	Results vary	483
8.3.2c	Bright future	483
8.4.1	Petroleum Disasters:	484
8.4.2	Personal safety	486
8.4.3a	Cleaning Spills	487

8.4.3b	Oil Spill Equipments	488
8.4.3c	Oil Skimming	488
8.4.3d	Portable Vacuum Unit	488
8.4.3e	Brush Skimmer	489
8.4.3f	Disk Oil Skimmers	489
8.4.3g	Drum/Barrel Styles	489
8.4.3h	Absorbent Boom	490
Appendix 1		492
Appendix 2		495
Appendix 3		508
Appendix 4		510
Appendix 5		512
Index		521
