Preface to the Second Edition	v
Foreword	vii
Preface to the First Edition	ix
1. Plant Breeding and its Scope	1
1. Definition	1
2. Plant breeding as an Art and Science	3
3. Plant Type Concept	4
4. Goal of Plant Breeding	4
5. Contribution of Plant Breeding	4
6. Training of a Plant Breeder	7
7. Useful References	8
2. Genetic Basis of Plant Breeding	9
1. Genetic consequences of Hybridisation	9
2. Quantitative Inheritance	12
3. Combining Ability	16
4. Heritability	16
5. Genetic Advance	18
6. Genetic Base	18
7. Choice of Breeding Methods	19
8. Useful References	19

3. Nature of Crops and Methods of Breeding	21
1. Mode of Reproduction	21
2. Incompatibility	23
3. Use of Incompatibility in Plant Breeding	26
4. Male Sterility	28
5. Hybridisation	32
6. Emasculation	36
7. Bagging	38
8. Pollination	38
9. Methods of Breeding Summarised	41
10. Useful References	43
4. Origin, Domestication and Introduction of Crop Plants	45
1. Centres of Origin	46
2. Centre of Diversity and Centres of Origin	48
3. Plant Introduction	56
4. Institutional Organisation	57
5. Procedure of Introduction	60
6. Packing and Despatch	61
7. Maintenance of Introductions	62
8. Achievement and Uses of Introduction in India	64
9. Disadvantages of Introductions	66
10. Useful References	67
5. Breeding Self-pollinated Crops by Introduction and Selection	69
1. Introduction	69
2. Selection	70
3. Useful References	76
6. Breeding Self-pollinated Crops by Hybridisation	77
1. Pedigree method	77
2. Bulk Method	80
3. Modified Bulk Methods	81
4. Single Seed Descent Method	81
5. Back Cross Method	82
6. Types of Varieties and Their Development	87
7. Useful References	91
7. Method of Breeding Cross-Pollinated Crops	93
1. Introduction	93

2.	Selection	93
3.	Recurrent Selection	97
4.	Hybridisation	99
5.	Types of Varieties and Their Development	102
6.	Composite	107
8.	Useful References	110
8.	Breeding Asexually Propagated Plants	111
1.	Various Groups	111
2.	Breeding Methods	112
3.	Useful References	125
9.	Heterosis Breeding	126
1.	What is Heterosis	126
2.	Types of Heterosis	126
3.	Measurement of Heterosis	127
4.	Basis of Heterosis	129
5.	Breeding Methods to Exploit Heterosis	132
6.	Achievements	137
7.	Useful References	140
10.	Mutation Breeding	141
1.	Mutation	141
2.	Classification of Mutation	141
3.	Mutagen and Its Classification	143
4.	Mutagenic Treatment	148
5.	Dosimetry	150
6.	Mode of Action of Mutagens	151
7.	Procedure of Mutation Breeding	153
8.	Material and Method of Mutagenic Treatment	154
9.	Factors Affecting Mutations	154
10.	Handling of Treated material	157
11.	Applications and Achievements of Mutation Breeding	160
12.	Limitations	165
13.	Useful References	166
11.	Ploidy Breeding	168
1.	Definitions	168
2.	Classification of Ploidy	169

3.	Euploid	170
4.	Method of Creating Various Ploidy Levels	173
5.	Ways to Use Euploid and Aneuploids	178
6.	Useful References	184
12.	Breeding for Disease and Insect Resistance	186
1.	Definition and History	186
2.	Differences between Productive and Resistance Breeding	187
3.	Loss of Resistance	188
4.	Plant Breeder versus Nature	189
5.	Race and its identification	191
6.	Classification of Resistance	193
7.	Genetics of Host - Pathogen Interaction	196
8.	Breeding for Disease Resistance	198
9.	Breeding for Insect Resistance	202
10.	Exploitation of Resistance Genes	205
11.	Advantages of Resistance Breeding	208
12.	Limitations of Resistance Breeding	208
13.	Useful References	209
13.	Innovative Methods in Plant Breeding	211
1.	Wide hybridisation	211
2.	Tissue Culture	216
3.	Biotechnological Methods	217
4.	Participatory Breeding	221
5.	Useful References	221
14.	Organisation and Achievements of Plant Breeding	223
1.	Institutions	224
2.	Co-ordinated Research Programme	229
3.	Achievements in some Crops	229
4.	Useful References	242
15.	Varietal Release and Seed Production	244
1.	Variety and Strain	244
2.	Release of a Variety	245
3.	Seed System and Categories of Seed	246
4.	Degeneration of a Variety	248

5. Maintenance of Purity in Seed Production	250
6. Seed Production in India	253
7. Seed Certification	254
8. Procedure of sampling and seed testing	259
9. Useful References	266
Glossary	267
Index	279
