Chapter	Page
1. Pharmaceutical Dosage Forms and New Drug Delivery Systems	1
2. Pharmacopoeias and Formularies	28
3. Weights and Measures	36
Percentage Calculations	49
Alligations Method	54
Isotonic Solutions	56
4. Packaging of Pharmaceuticals	65
Aerosol Packaging	81
5. Size Reduction	86
Factors Affecting Size Reduction	88
Ball Mill	93
Hammer Mill	95
Disintegrator	98
Fluid Energy Mill	102
6. Size Separation	105
By Sifting	107
Sedimentation Method	109
Cyclone Separator	111
7. Mixing and Homogenisation	112
Hand Homogeniser	118
Silverson Mixer	120
Agitator Mixer	125
Tripple Roller Mill	126

8. Filtration and clarification	129
Filter Media	131
Filter Aids	135
Sintered Filters	137
Filter Candles	137
Filter Press	138
Metafilters	141
9. Extraction and Galenicals	145
Continuous Hot Extraction	156
Ayurvedic Dosage Forms	159
10. Heat Process	165
Factors Affecting Evaporation	168
Evaporating Pan	170
Evaporating Still	171
11. Distillation	179
Simple Distillation	181
Fractional Distillation	182
Steam Distillation	183
Vacuum Distillation	186
Water for Injection	188
12. Drying Processes	192
Tray Dryers	196
Fluidized Bed Dryers	198
Vacuum Dryer	201
Freeze Dryer	202
13. Sterilization	204
Differences Between Sterilization and Disinfection	205
By Dry Heat	210
By Moist Heat	213
By Radiations	218
Gaseous Sterilization	220
Aseptic Techniques	230
Applications	233

14. Tablets	239
Types	241
Excipients	247
Defects	259
Coating	262
Microencapsulation	267
Evaluation	268
15. Capsules	275
Hard	276
Soft	281
Special Types	283
16. Immunity and Immunological Preparations	288
Index	310
