Foreword by M.M. Malhotra	v
Foreword by Braham Dutt	vi
Preface	vii

Unit I

Chapter 1	Introduction to Cement Concrete and Quality Management	3
	Learning Objectives	3
	1.1 Definition	4
	1.2 History	4
	1.3 Importance	4
	1.4 Failure of Concrete	6
	1.5 Quality Management	8
	1.6 Summary	9
	Practice Questions	10
Chapter 2	Basic Properties of Cement Concrete	11
	Learning Objectives	11
	2.1 Introduction	12
	2.2 Properties in Fresh State	12
	2.2.1 Good Workability	12
	2.2.2 Freedom from Segregation	13
	2.2.3 Freedom from Bleeding and Harshness	14
	2.3 Measurement of Workability	15
	2.3.1 Slump Test	16
	2.3.2 Compacting Factor Test	18
	2.3.3 Vee-Bee Test	20
	2.3.4 Flow Test	23
	2.4 Properties in Hardened State	25
	2.4.1 Strength of Concret	25
	2.4.2 Durability	27
	2.4.3 Impermeability	31
	2.4.4 Dimensional Changes	32
	2.4.5 Unit Weight	40
	2.5 Summary	41
	Practice Questions	42
Chapter 3	Influence of Basic Ingredients on Quality of Concrete	43
	Learning Objectives	43
	3.1 Introduction	44

3.2	Cement	44
3.2.1	Fineness	45
3.2.2	Setting and Hardening	47
3.2.3	Strength	48
3.2.4	Soundness	49
3.2.5	Heat of hydration	50
3.2.6	Influence of cement on concrete properties	51
3.3	Aggregate	52
3.3.1	Classification of aggregate	55
3.3.2	Aggregate Characteristics	55
3.3.3	Size of Aggregate	56
3.3.4	Particle Shape of Aggregate	57
3.3.5	Surface Texture	59
3.3.6	Strength	59
3.3.7	Water Absorption and Surface Moisture	61
3.3.8	Bulking of Sand	62
3.3.9	Unit Mass (Weight)/Bulk Density	64
3.3.10	Specific Gravity	65
3.3.11	Thermal Properties	65
3.3.12	Deleterious Substances	66
3.3.13	Soundness	66
3.3.14	Alkali-Aggregate Reaction and Durability	67
3.3.15	Grading of Aggregate	67
3.3.16	Effect of Aggregate on Concrete	73
3.4	Water	73
3.5	Summary	75
	Practice Questions	76

Chapter 4	Influence of Special Admixtures on Quality of Concrete	78
	Learning Objectives	78
4.1	Introduction	79
4.2	Advantages of Admixtures	80
4.3	Admixture Types	80
4.3.1	Types of Chemical Admixtures	81
4.3.2	Types of Mineral Admixtures	81
4.4	Purpose of Admixtures	81
4.4.1	Chemical Admixtures	81
4.4.2	Mineral Admixtures	82
4.5	Chemical Admixtures	82
4.5.1	Plasticizers (Water Reducers)	82
4.5.2	Super Plasticizers (High Range Water Reducers)	83
4.5.3	Accelerators	84
4.5.4	Retarders (Retarding Admixtures)	85
4.5.5	Air Entraining Agents	86
4.6	Mineral Admixtures	87
4.6.1	Cementitious	87
4.6.2	Inert Mineral Powders	87
4.6.3	Pozzolanic Admixtures	88

4.7	Special Admixtures	89
4.7.1	Gas or Foam Forming Agents	89
4.7.2	Expansion Producing Agents	90
4.7.3	Bonding Agents (Polymers)	90
4.7.4	Grouting Agents (Pumping Aids)	90
4.7.5	Pigments and Colouring Agents	91
4.7.6	Damp Proofing Agents (Permeability Reducers)	91
4.7.7	Shotcrete Accelerators	92
4.7.8	Curing Compounds	92
4.8	Selection Criteria	93
4.9	Summary	93
	Practice Questions	94

Unit II

Chapter 5	Influence of Concreting Operations on Quality	97
	Learning Objectives	97
5.1	Introduction	98
5.2	Formwork Erection	98
5.2.1	Design Considerations in Formwork	99
5.2.2	Formwork Materials	99
5.2.3	Precautions in Formwork Erection	100
5.3	Storage of Ingredients	100
5.3.1	Storage of Cement	100
5.3.2	Storage of Aggregate	101
5.3.3	Storage of Water	102
5.3.4	Storage of Admixtures	102
5.4	Batching of Ingredients	102
5.4.1	Batching of Cement	103
5.4.2	Batching of Aggregate	103
5.4.3	Batching of Water	104
5.4.4	General Precautions in Batching	104
5.5	Mixing of Ingredients	105
5.5.1	Importance	105
5.5.2	Manual Mixing	105
5.5.3	Machine Mixing	106
5.6	Transportation of Concrete	107
5.6.1	Importance	107
5.6.2	Methods of Transportation	107
5.6.3	Precautions	108
5.7	Depositing	108
5.8	Compacting	109
5.8.1	Importance	109
5.8.2	Methods of compaction	110
5.8.3	Precautions in Compaction	110
5.9	Joint Making	111
5.9.1	Importance	111
5.9.2	Types of Joints	111

5.10 Curing of Cement Concrete	112
5.10.1 Importance	112
5.10.2 Objectives of Curing	113
5.10.3 Methods of Curing	113
5.11 Formwork Removal and Patchwork	114
5.12 Summary	115
Practice Questions	116

Unit III

Chapter 6 Basic Principles of Concrete Mix Design	121
Learning Objectives	121
6.1 Introduction	122
6.2 Water-cement Ratio Law	122
6.3 Workability	127
6.3.1 Phenomenon of Workability	127
6.4 Summary	130
Practice Questions	131
Chapter 7 Management, Statistical Quality Control Procedures and Acceptance Criteria	132
Learning Objectives	132
7.1 Inspection and Quality Check	133
7.1.1 Need and Scope of Inspection	133
7.1.2 Choice of an Inspector	133
7.1.3 Authority of the Inspector	134
7.1.4 Quality Check, Personnel and Equipment	134
7.2 Measures of Variabilities in Concrete Mix Design	136
7.2.1 Factors Contributing to Variability	136
7.2.2 Standard Deviation	137
7.2.3 Coefficient of Variation	139
7.3 Statistical Concepts of Mix Design	139
7.4 Characteristic, Target Mean Strength and Acceptance Criterion	140
7.4.1 Characteristic Strength	140
7.4.2 Target Mean Strength	140
7.4.3 Acceptance Criteria	140
7.4.4 Example	141
7.5 Summary	142
Practice Questions	143

Unit IV

Chapter 8 Cement Concrete Mix Design Procedures	147
Learning Objectives	147
8.1 Introduction	148
8.2 Procedure for Proportioning of Nominal (Ordinary) Concrete Mix	149

8.3	Procedure for Proportioning of Design Mix Concrete	151
8.3.1	Introduction	151
8.3.2	Indian Standard Guidelines for Mix Design (IS: 10262-1982)	153
8.3.3	Example 8.1: Concrete Mix Design (Grade M25)	159
8.4	The ACI Mix Design Method (Absolute Volume Method)	162
8.4.1	Approach	162
8.4.2	Example 8.2	164
8.5	The USBR Mix Design Method	166
8.6	The British Mix Design Method	168
8.6.1	Procedure	168
8.6.2	Example: 8.3	170
8.7	Other Methods	172
8.7.1	Fineness Modulus Method	172
8.7.2	Murdock's Surface Area Coefficient Method	172
8.7.3	Trial and Error Method	172
8.8	Summary	174
	Practice Questions	175
Chapter 9	Concrete Mix Quality Assurance Trials	177
	Learning Objectives	177
9.1	Trial Mixes	178
9.2	Interpretation of Test Results of Trial Mixes	179
9.3	Direct Field Adjustment (CRR Chart)	179
9.3.1	Introduction to Chart	179
9.3.2	Method of Using the Chart	180
9.4	Field (Site) Proportions	180
9.5	Conversion of Mix Proportions	182
9.6	Summary	183
	Practice Questions	183
Chapter 10	Quality of Cement Concrete Under Special Conditions of Placement	184
	Learning Objectives	184
10.1	Effect of Temperature on Concrete	185
10.1.1	High Temperatures	185
10.1.2	Low Temperatures	187
10.2	Recommended Practices for Hot-Weather Concreting	188
10.3	Recommended Practices for Cold-Weather Concreting	190
10.4	Under-water Concreting	192
10.4.1	Basic principles	192
10.4.2	Placing Methods	193
10.5	Special Concrete	194
10.5.1	Polymer Concrete	194
10.5.2	Fibre-Reinforced Concrete (FRC)	196
10.6	Modern Trends in Cement Concrete	197
10.6.1	Introduction	197
10.6.2	High Performance Concrete (HPC)	197

10.6.3	High Workability in Fresh Concrete	198
10.6.4	Self Compacting Concrete (SCC)	198
10.6.5	Terms in Reference to SCC	199
10.6.6	Constituent Materials	199
10.6.7	Requirements for SCC	200
10.6.8	Mix Composition	202
10.6.9	Production and Placement	203
10.6.10	Workability Tests of SCC	204
10.7	Summary	208
	Practice Questions	208

Chapter 11 Repair, Maintenance and Rehabilitation of Concrete Elements **210**

	Learning Objectives	210
11.1	Introduction	211
11.2	Diagnosis of Defects/Problems	211
11.2.1	Symptoms and Causes of Problem	211
11.2.2	Method of Diagnosis	215
11.3	Concrete Repair Materials	217
11.4	Preparation for Repair	221
11.5	Repair Methods and Systems	221
11.6	Repair of Cracks and Surface Defects	223
11.6.1	Introduction	223
11.6.2	Crack Repair Methods	224
11.6.3	Treatment of Surface Defects	228
11.6.4	Specific Cases of Crack Repair	228
11.7	Protective Coatings	230
11.8	Summary	231
	Practice Questions	233

Chapter 12 Testing of Materials for Quality Control **234**

	Learning Objectives	234
12.1	Tests on Cement	235
12.2	Tests on Aggregates	252
12.3	Tests for Water	260
12.4	Tests for Fresh Concrete	261
12.5	Tests for Hardened Concrete	267
12.6	Information on Non-destructive Methods of Testing	271
12.6.1	Schmidt Rebound Hammer Test	271
12.6.2	Ultrasonic Pulse Technique	274
12.6.3	Core Testing	276
12.7	Summary	277
	Practice Questions	277
