<i>Preface</i>	v
----------------------	---

PART-I: GENERAL INTRODUCTION

0. Naming Bones of Limbs	1
1. General Introduction	3
2. Terms of Position and Movement	5
3. Structures met in Dissection	10
4. Subdivisions of Human Body into Six Regions	22

PART-II: UPPER LIMB

5. Functions and subdivisions	25
6. Pectoral region	26
7. Axilla	33
8. Back and scapular region	41
9. Cutaneous veins, lymphatics and nerves of upper limb	54
10. Joints of clavicle	61
11. Shoulder joint	63
12. Arm	69
13. Cubital fossa	77
14. Arterial anastomoses around elbow	79
15. Flexor compartment of forearm and palm	81
16. Extensor compartment of forearm and dorsum of hand	99
17. Carpal rete/arch	109

18. Intermediate group of muscles of palm	111
19. Fascial compartments	114
20. Elbow joint	118
21. Radioulnar joints	122
22. Wrist joint	125
23. Joints of hand	128

PART-III: LOWER LIMB

24. Subdivisions of lower limb	133
25. Front of thigh	134
26. Medial side of thigh	155
27. Gluteal region	161
28. Hip joint	167
29. Back of the thigh	173
30. Popliteal fossa	179
31. Front of leg and dorsum of foot	187
32. Medial side of the leg	197
33. Lateral compartment of the leg	199
34. Lymphatic drainage of lower limb	203
35. Back of leg	207
36. Sole of foot	217
37. Arterial anastomoses around knee and ankle	230
38. Knee joint	233
39. Tibiofibular joints	241
40. Ankle joint	243
41. Joints of the foot	246
42. Arches of the foot	251
43. Index	255
