Preface to the First Edition

vi

Section VIII Endocrines

70. Physiological Aspects of Endocrine System and Pituitary Gland 522

- Introduction 522
- Storage, Destruction and Excretion 523
- Mode of Action 523
 - Cyclic AMP and Hormone Action 523
 - Cyclic Guanosine Monophosphate (cGMP) as Second Messenger 524
 - Diacylglycerol (DAG) and Inositol 1,4, 5-Triphosphate (IP₃) as Second Messenger 524
 - Ca²⁺ as a Second Messenger 524
 - Synthesis of Enzyme at the Nuclear Level 524
 - Other Mechanisms 526
- Control of Endocrine System: Regulation of Secretion of Hormones 526
 - Negative Control Mechanism 527
- Endocrine Glands 527
- Essential Properties of a Hormone 528
- Major Endocrine Glands and Hormones in Controlling Body Functions 528
 - Neuroendocrine Interrelations 528
 - Hypothalamic Hypophyseal Portal System 528
 - Hypothalamo-hypophyseal Peripheral Gland Axis 529
- Exam-oriented Questions 530

71. Hypophysis (Pituitary Gland) 531

- Introduction 531
- Structure and Functions of Adenohypophysis (Anterior Pituitary) 533
 - Blood Supply 534
 - Functions of the Anterior Lobe of Pituitary Gland 534
- Growth Hormone or Somatotropin (GH or STH) 534
 - Chemistry 534
 - Synthesis of Growth Hormone 535
 - Growth Hormone Secretion 535
 - Mechanism of Action 535
 - Actions of Growth Hormone (GH) 535
 - Regulation of Growth Hormone Secretion 536
 - Applied Physiology (Growth Hormone Pathological Disorders) 536
- Growth Hormone Disorders 536
 - Hyperactivity of Somatotropes 536
 - Hypoactivity of Somatotropes 536
- Gigantism 536
 - Characteristic Features 537
- Acromegaly 537
 - Characteristic Features 537
- Dwarfism 538
 - Lorain-Levy Type (Infantilism) 538
 - Brissaud Type (Fat Body of Dickens) 538
 - Mixed Type 538
- Acromicria 538

- Thyrotropic Hormone or Thyrotropin or Thyroid-Stimulating Hormone (TSH) 538
 - Chemistry 538
 - Control of TSH Output 538
 - Control of Thyrotropin-Releasing Hormone Output 539
- Gonadotropic Hormones (GTH) or Gonadotropins: FSH and LH 539
 - Functions of FSH 540
 - Functions of LH 540
- Prolactin (PRL) 540
 - Control of Prolactin Secretion 540
 - Reflex Stimulation of Prolactin 540
 - Action of Prolactin 541
 - Physiological Functions 541
- Central and Peripheral Organizations of Anterior Pituitary Hormones 541
 - Mechanism of Releasing Factors 542
- Disorders of Pituitary Gland 542
 - Pars Intermedia 544
 - Pars Tuberalis or Infundibularis 544
- Structure and Functions of Neurohypophysis (Posterior Lobe) 544
- Posterior Lobe of Pituitary Gland 544
 - Blood Supply 544
 - Nerve Supply 545
 - Synthesis, Transport and Storage of the Neurohypophyseal Hormones in the Hypothalamo-hypophyseal System 546
 - Chemistry 546
- Vasopressin (Pitressin) 546
 - Chemistry 546
 - Synthesis 546
 - Regulation of Secretion 546
 - Units of Vasopressin 547
 - Mode of Action 547
 - Control of the Secretion of Vasopressin (ADH) 547
 - Non-osmotic Stimuli of ADH Secretion 548
 - Actions of ADH 548
 - Applied Physiology 548
- Oxytocin (Pitocin) 548
 - Source 548
 - Synthesis 548
 - Unit of Oxytocin 548
 - Regulation of Secretion 548
 - Control of Secretion of Oxytocin 548
 - Actions of Oxytocin 549
- Integrative Action of Neuroendocrinology 550
- Introduction 550
- Conclusion 550
 - Neuroendocrine Integration 551
- Exam-oriented Questions 551

72. Thyroid Gland 552

- Introduction 552
- Anatomy 552
- Histology 553

Thyroid Hormones	554
Synthesis, Storage, Release and Transport of Thyroid Hormones–Iodine Metabolism	554
Synthesis of Thyroid Hormones	554
Transport of Thyroid Hormones	554
Degradation and Excretion of Thyroid Hormones	555
Mechanism of Action of Thyroid Hormone via its Nuclear Receptors	555
Iodine Requirement and Anterior Pituitary Control in Secretion of Thyroid Hormone	556
Iodine	556
Role of Anterior Pituitary	556
Physiological Actions of Thyroid Hormones	556
Regulation of Thyroid Hormones	557
Functions of Thyroid Hormones	557
Metabolism	557
Thermogenesis and Body Weight	557
Growth and Differentiation	557
Cardiovascular System	559
Central Nervous System	559
Reproductive System	559
Calorigenic Effect: Heat Regulation	559
Relation with Vitamins	559
Effect on Bone and Mineral Metabolism	559
Secretion of Milk	559
Other Functions	559
Thyroid Disorders	559
Hypothyroidism	559
Cretinism	559
Myxoedema	560
Goitre	560
Hyperthyroidism Thyrotoxicosis	561
Graves' Disease (Basedow's Disease or Exophthalmic Goitre)	561
Treatment of Thyrotoxicosis	562
Thyroid Function Tests	562
Blood Tests	562
Autoimmune Markers	563
Tests Based on Use of Nuclear Medicine	563
Thyroid Ultrasound	563
Fine Needle Aspiration Biopsy	563
Thyrotropin-Releasing Hormone (TRH) Response Test	563
Control of Thyroid Secretion and Endocrine Interrelationship	563
Role of Anterior Pituitary	563
Role of Sympathetic and Parasympathetic Nerves (Vasomotor Regulation)	563
Stress Phenomena	563
Thyroid–Gonadal Interrelationship	563
Antithyroid Compounds	563
Exam-oriented Questions	564

73. Calcium Homeostasis: Role of Parathyroid Gland 565

Calcium	565
Sources	565
Distribution of Calcium in the Body	565
Blood Calcium	565
Absorption of Calcium from the Gut	565
Applied Physiology	566
Calcium Excretion	566
Calcium Balance	566
Functions	566
Daily Requirement	567
Phosphorus	567
Sources	567
Distribution	567
Blood Phosphorus	567
Absorption	567

Control of Phosphorus Metabolism	567
Excretion of Phosphorus	567
Functions	567
Daily Requirement	568
Relationship between Plasma Ionized Calcium and Phosphate	568
Calcitriol	568
Formation of Calcitriol	568
Excretion	568
Action of Calcitriol	568
Therapeutic uses	568
Functions of Calcitriol	568
Role of Other Hormones in Regulating Calcium Metabolism	568
The Parathyroid	568
Anatomy	568
Histology	569
Parathyroid Hormone	569
Control of Parathyroid Secretion	569
Physiological Functions of Parathyroid Gland	569
Tetany in Man	570
Disorders of Parathyroid Secretion	571
Calcitonin	572
Introduction	572
Chemistry	572
Synthesis	572
Regulation of Secretion	572
Action of Calcitonin	572
Bone	573
Composition of Bone	573
Structure of Bone	573
Bone Formation and Resorption	573
Functions of Bone	574
Applied Physiology	574
Exam-oriented Questions	574

74. Pancreas

575

Introduction	575
Endocrine Pancreas	575
Histology	575
Nerve Supply	576
Insulin	576
Chemistry	576
Synthesis, Storage and Release of Insulin	576
Glucose Transporters	577
Insulin Secretion	577
Fate and Degradation of Insulin	578
Regulation of Secretion of Insulin	578
Control of Insulin Secretion	579
Action of Insulin	579
Glucose Tolerance Test	580
Somatostatin	580
Synthesis	580
Action of Somatostatin	580
Applied Physiology	580
Pancreatic Polypeptide	580
Secretion	580
Action	580
Applied Physiology	580
Glucagon	580
Synthesis of Glucagon	581
Secretion of Glucagon	581
Metabolism and Degradation	581
Action of Glucagon	581
Applied Clinical Physiology	581
Applied Physiology	581
Hypoglycaemia	581
Hyperinsulinism	582
Hyperglycaemia	582
Glycosuria	583
Diabetes Mellitus	583
Exam-oriented Questions	586

75. Adrenal (Suprarenal) Glands 587

- Anatomy 587
 - Blood Supply 587
 - Nerve Supply 587
- Adrenal Cortex 588
 - Histology 588
- Active Principles of Adrenal Cortex and their Functions 588
 - Active Principles 588
 - Adrenal Corticoids 588
 - Biosynthesis of Adrenal Steroid Hormones 590
 - Transport, Metabolism and Excretion 590
 - Mechanism of Action of Adrenal Steroids 590
 - Functions of Adrenal Hormones 591
 - Functions of Adrenal Cortex 591
- Hypofunction of Adrenal Cortex 592
 - Addison's Disease 592
- Hyperfunction of Adrenal Cortex 592
 - Cushing's Syndrome 592
 - Hyperaldosteronism 593
 - Adrenogenital Syndrome 593
 - Laboratory Studies for Adrenocortical Functions 594
- Control of Cortical Secretion 594
 - Hormonal Control 594
 - Nervous Control 594
 - Inorganic Control 594
 - Blood Volume 595
 - Mineralocorticoids 595
 - Renin-Angiotensin Mechanism 595
 - Function of Mineralocorticoids (Aldosterone) 595
- General Adaptation Syndrome 596
- Adrenal Medulla 597
 - Histology 597
 - Electron Microscopic Structure of Adrenal Medullary Cells 597
 - Adrenal Medullary Hormones 597
 - Biosynthesis of Adrenomedullary Hormones 597
 - Release of Catecholamines 598
 - Epinephrine (Adrenaline) 600
 - Norepinephrine (Noradrenaline) 602
 - Functions of Adrenal Medulla 603
 - Applied Physiology 603
 - Methods of Functional Study of Adrenal Medulla 603
 - Endocrine and Metabolic Complications of Obesity and Metabolic Syndrome 605
 - Psychiatric and Psychological Manifestation in Metabolic Syndrome 606
- Exam-oriented Questions 606

76. Local Hormones 607

- Introduction 607
- Erythropoietin 607
 - Physiological Basis 607
 - Action 607
- Renin 607
- Histamine and Heparin 607
 - Synthesis 607
 - Action 607
- The Prostaglandins 608
 - Chemistry 608
 - Distribution 608
 - Mode of Action 608
 - Synthesis of Prostaglandins 608
 - Actions 608
 - Functions of Prostaglandins 608
 - Conclusion 609
- Serotonin 610
 - Synthesis 610
 - Actions 610
- Bradykinin 610
 - Synthesis 610
 - Actions 610

- Endothelins 610
 - Synthesis 610
 - Actions 610
- Atrial Natriuretic Peptide 610
 - Synthesis 610
 - Actions 610
- Adrenomedullin 611
- Adenosine Derivatives 611
- Gastrointestinal Hormones 611
- Exam-oriented Questions 611

77. Thymus 612

- Introduction 612
- Anatomy 612
- Development 613
- Histology 613
- Blood Vessels and Nerve Supply 613
- Clinical Evidences of Thymic Function 614
 - Applied Physiology 614
 - Thymic Disorders and Genesis 614
- Exam-oriented Questions 614

78. The Pineal Body 615

- Introduction 615
- Anatomy 615
- Histology 615
- Concretions 615
- Changes with Age 615
- Melatonin 615
 - Control of Synthesis and Release of Melatonin 615
 - Important Characteristics of Melatonin and Functions of Pineal Glands 617
- Exam-oriented Questions 617
- Clinical Case Scenario 618

Section IX Reproductive System

79. Gonads and Reproduction 622

- Introduction 622
- Gonadal Function 622
- Reproduction 622
- Puberty 623
 - Puberty Changes 623
- Development of Gonads 623
- Applied Physiology 623
- Psychological and Clinical Correlation in Adolescence 624
- Genetic Basis of Sex Differentiation 624
- Sex Chromatin 625
 - Chromosomal Abnormalities in Sex Differentiation 626
 - Abnormalities due to Maternal Nondisjunction 626
 - Abnormalities due to Paternal Nondisjunction 626
 - Other Chromosomal Abnormalities in Sex Differentiation 627
 - Sex Differentiation due to Hormones 628
 - Practical and Psychiatric Implication of Sex Determination 628
- Exam-oriented Questions 628

80. Male Reproductive Organs 629

- Introduction 629
- Testis 629
 - Anatomy 629
 - Histology 630
 - Seminiferous Tubules 631
 - Interstitial Cells (Cells of Leydig) 631
 - Functions of Testis 631
- Androgens 632
 - Chemistry and Varieties 632
 - Sources 633

Biosynthesis of Androgens in the Testis	633
Mode of Action of Testosterone and other Androgens	633
Transport, Metabolism and Excretion of Testosterone	634
Functions of Androgens: Testosterone	634
Hormonal and Neural Control of Testosterone Secretion	636
Other Testicular Hormones	636
Life History of Spermatozoa (Sperms)	636
Histology	636
Spermatogenesis	638
Stages of Spermatogenesis	639
Control of Spermatogenesis	639
Motility and Fertilizing Power of Sperm	640
Fate of Spermatozoa	640
Metabolism of Spermatozoa	640
Hyaluronidase	640
Fertilization of the Ovum	640
Semen (Seminal Plasma or Fluid)	641
Functions of the Constituents of Seminal Fluids	642
Applied Physiology	
Impotence	643
Male Sexual Act	643
Hypogonadism	644
Prostate	644
Histology	644
Functions	644
Control of Prostate	644
Proof	644
Applied Physiology: Prostatic Hypertrophy	645
Summary: Functions of Testosterone	645
Exam-oriented Questions	646
81. Female Reproductive Organs	647
Introduction	647
Anatomy	647
Fallopian Tube	647
Histology	647
Cervix	648
Vagina	648
Ovary	648
Structural Anatomy	648
Histology	648
Functions of Ovary	649
Life History of Vesicular of Graafian Follicles	650
Development and Histology	650
Maturation of the Ovum	651
Covering of the Ovum	651
Control of Maturation of Ovum	651
Ovulation	652
Fertilization	654
Implantation	654
Fate of Graafian Follicles	655
Functioning of Graafian or Vesicular Follicle	655
Atretic Follicles	655
Life History of Corpus Luteum	655
Maintenance of Corpus Luteum	656
Hypophyseal and Other Factors in Luteolysis	657
Oestrogens	657
Definition	657
Types	657
Synthesis of Oestrogens	658
Metabolism and Excretion	659
Mechanism of Action of Oestrogens	659
Actions of Oestrogen	659
Functions of Oestrogen	660
Progesterone	661
Sources	661
Varieties and Chemistry	661
Synthesis of Progesterone	662

Metabolism and Excretion	662
Mechanism of Action	662
Action of Progesterone	662
Functions of Progesterone	663
Relaxin	663
Androgens	663
Control of Ovarian Functions	663
Menstruation	664
Definition	664
Changes and Influence of Hormone in Menstrual Cycle	664
Menopause or Female Climacteric	667
Role of the Central Nervous System (CNS): In Hypophyseal-ovarian Axis	668
Exam-oriented Questions	669
82. Pregnancy	670
Introduction	670
Physiological Changes during Pregnancy	670
Other Changes	671
Pregnancy Tests	671
Biological Tests	671
Placenta	672
Formation and Development	672
Histology	672
Functions of the Placenta	673
Hormonal Regulation in Pregnancy	676
Exam-oriented Questions	677
83. Parturition	678
Introduction	678
Process of Parturition	678
Involution	679
Applied Physiology	679
Twins and Multiple Births	679
Exam-oriented Questions	679
84. Foetal Circulation	680
Introduction	680
Peculiarities in Foetal Circulation	680
Course of Circulation	680
Challenges of New Existence	682
Changes in Circulation after Birth	682
Changes in the Lungs and Respiration	683
Cardiovascular System Status at Time of Birth	683
Blood Cell Count in Newborn	683
Gastrointestinal Functions in Newborn	683
Renal Functions in Newborn	683
Regulation of Body Temperature in Newborn	683
Applied Clinical Physiology: Inborn Errors of Metabolism in the Newborn	684
Galactosaemia	684
Phenylketonuria	684
Infancy	684
Exam-oriented Questions	685
85. Development of Breast and Lactation	686
Introduction	686
Control of Breast Development and Lactation	686
Development of Mammary Glands	686
Lactogenesis: Secretion of Milk	686
Galactopoiesis (Maintenance of Lactation)	686
Ejection of Milk	687
Effects of Suckling	687
Inhibition	688
Colostrum	688
Nutritional Needs of Infant	688
Human Milk	688
Applied Physiology	689
Exam-oriented Questions	689

86. Controlled Reproduction and Family Planning 690

- Introduction 690
- Physiological Methods 690
- Use of Some Barriers to the Entry of Sperms into the Cervix at the time of Coitus 690
- Use of Chemical Spermicidal Agents before or after Intercourse 690
- Interruption of Normal Paths of the Sperms or Ovum 691
- IUCD 691
- Contraceptive Pills 691
 - Different Varieties of Pills 692
 - Side Effects of the 'Pills' 692
- Infertility and IVF 692
 - Infertility 692
 - Procedure of IVF 693
 - Role of IVF in Management of Infertility 693
- Other Methods 694
- Exam-oriented Questions 694
- Clinical Case Scenario 695
 - Reproduction 695
- In Vitro* Fertilization: 2010 Nobel Prize for Physiology and Medicine 695

Section X Nervous System

87. Introduction to Nervous System 698

- Introduction 698
- Central or Somatic Nervous System 698
- Spinal Cord 698
- Brain 699
 - Meninges, Ventricles and Cerebrospinal Fluid 701
 - Blood Supply 705
 - Metabolism 705
- Exam-oriented Questions 705

88. General Principles of the Nervous System 706

- Introduction 706
- Afferent and Efferent 706
- General Functions of Nervous System 706
- Classification of Neurotransmitters 707
- Nature of Transmission in the CNS: Small Molecule Transmitters 707
 - Acetylcholine: Cholinergic Transmission 707
 - Central Adrenergic Transmission: Epinephrine and Norepinephrine 709
 - Dopamine 709
 - Other Transmitters 709
- Role of other Neuroactive Peptides: Large Molecule Transmitters 711
- Applied Physiology 711
- Exam-oriented Questions 711

89. Synapse 712

- Introduction 712
- Classification 712
 - Anatomical Classification 713
 - Physiological Classification 713
- Anatomical Structure of the Synapse 713
- Mechanism of Synaptic Transmission 714
 - Neuromuscular Junction 715
- Excitatory and Inhibitory Postsynaptic Potentials 715
 - Excitatory Postsynaptic Potential (EPSP) 715
 - Inhibitory Postsynaptic Potential (IPSP) 715
- Properties of Synapse 716
 - Synaptic Response 716
 - Law of Forward Conduction (Sherrington) 716
 - Synaptic Delay 716
 - Seat of Fatigue 716
 - Synaptic Inhibitions 716
 - Convergence and Divergence of Nerve Impulses 717
 - Synaptic Block 717

- Summation 717
- Occlusion 718
- Ephaptic Transmission 718
- Synaptic Plasticity 718
- Applied Physiology: Synaptopathy 719
- Exam-oriented Questions 719

90. Nerve Endings and Receptors 720

- Definition 720
- Histology 720
- Functions 720
- Receptors 720
 - Receptor as a Biological Transducer 722
 - Initiation of Impulse in Sensory Receptors 722
 - Source of Generator Potential 723
 - Mechanism of Initiation of Generator Potential 723
 - Properties of Receptors 723
 - Classification and Varieties of Nerve Endings 724
 - General Senses 725
 - Myotactic or Stretch Reflex 727
 - Mechanism of Stretch Reflex 727
- Summary 728
 - Receptors 728
 - Motor Endings 728
- Exam-oriented Questions 728

91. Reflex Action 929

- Definition 729
 - Varieties of Reflexes 729
- Reflex Arc 729
 - Varieties of Reflex Arc 729
- General Characteristics of Reflex Action 730
 - Irradiation 730
 - Delay 730
 - Summation 730
 - Occlusion 730
 - Subliminal Fringe 730
 - Facilitation 730
 - Inhibition 731
 - Recruitment 731
 - After-discharge 732
 - Fatigue 732
 - Reciprocal Innervations 732
 - Rebound Phenomenon 733
- Unconditioned Reflexes 733
 - Classification of Reflexes 733
 - Superficial Reflexes 733
 - Deep Reflexes or Tendon Reflexes 734
 - Patellar Tendon Reflex or Knee Jerk 734
 - Reflex Path 734
 - Ankle Jerk 735
 - Stretch Reflex (Myotatic Reflex) 737
 - Importance of Stretch Reflex 737
- Electrophysiology of Spinal Reflexes 737
 - Monosynaptic Reflex 737
 - Polysynaptic Reflex 737
 - Withdrawal Reflexes 737
- Motor Unit and Electromyogram (EMG) 739
- EMG 739
- Applied Physiology: Startle Reflex 741
- Exam-oriented Questions 741

92. Sensory Systems 742

- Introduction 742
- Sensory Mechanism 742
- Properties of Sensations 742
 - Modality 742
 - Quality 742
 - Intensity 742
 - Adaptation 743

Extent	743
Duration	744
Localisation or Projection	744
Classification of Sensations	744
General Sensations	744
Pain	746
Theories of Pain	747
Pain Pathway	748
Itch and Tickle	751
Applied Physiology	751
Pain Management	751
Exam-oriented Questions	752

93. Arrangement of Grey and White Matters in the Spinal Cord 753

Introduction	753
Central Canal	753
Grey Matter	753
White Matter	754
The Spinal Nerve	754
Mixed Nerves	754
Anterior Spinal Root	754
Posterior Spinal Root	754
Distribution of the Terminal Branches of Spinal Nerves	754
Exam-oriented Questions	755

94. The Ascending and Descending Tracts 756

Introduction	756
Definition: Tracts	756
Ascending Tracts (Sensory Tracts)	756
Descending Tracts (Motor Tracts)	757
Ascending Tracts (Afferent Tracts)	757
Afferent Tracts in the Posterior Column (Funiculus)	757
Afferent (Sensory) Tracts in the Lateral Column	759
Afferent (Sensory) Tracts in the Anterior Column	761
Summary of the Pathways of Various Sensations	762
How Posterior Spinal Root Ends?	763
Descending Tracts	765
Motor Tracts or Efferent Tracts	765
Pyramidal or Corticospinal Tracts	765
Corticobulbar (Corticonuclear) Tracts	769
Extrapyramidal Tracts	770
Rubrospinal Tract (Monakow's Bundle, Prepyramidal Tract)	770
Tectospinal Tract and Tectobulbar Tract	770
Reticulospinal Tracts	771
Vestibulospinal Tracts	772
Olivospinal Tract (Bulbospinal Tract or Tract of Helweg)	773
Descending Medial Longitudinal Fasciculus	773
Functions of Extrapyramidal Tracts	773
Intersegmental Fibres (Both Ascending and Descending Fibres)	773
Effects of Section of the Anterior Root	774
Degenerative Changes	774
Functional Changes	774
Effects of Section of the Posterior Root	774
Degenerative Changes	774
Effects of Section of the Mixed Spinal Nerve	774
Degenerative Changes	774
Functional Changes	774
Hemisection of the Spinal Cord	774
Degenerative Changes	774
Functional Changes	775
Regional Peculiarities of Hemisection of the Spinal Cord at Different Levels	776
Applied Considerations on Spinal Transections	776
Complete Transection of the Spinal Cord	776
Incomplete Transection of the Spinal Cord	777
Spinal Animal (Animal with Transection of the Spinal Cord)	777

Effects of Lesions at Various Levels of the Central Nervous System	777
Lemniscus or Fillet	778
Definition	778
Varieties	778
Exam-oriented Questions	778

95. Brainstem 780

Introduction	780
Midbrain (Mesencephalon)	780
Red Nucleus	781
Connections	781
Characteristic Features of Red Nucleus	782
Functions of Red Nucleus	783
Superior Colliculi	783
Pons Varolii	783
Anatomy	783
Function	784
Medulla Oblongata (Spinal Bulb)	784
Anatomy	784
Function of Medulla Oblongata	785
Exam-oriented Questions	789

96. Cerebellum 790

Anatomy	790
Anatomical Classification	790
Functional and Morphological Subdivision of Cerebellum	790
Phylogenetic Subdivisions	791
Functional Subdivisions	791
Cerebellar Nuclei	791
Histology	792
Connections	794
Inferior Cerebellar Peduncle (Restiform Body)	794
Middle Cerebellar Peduncle (Brachium Pontis)	795
Superior Cerebellar Peduncle (Brachium Conjunctivum)	796
Functions of Cerebellum	797
Role of Archicerebellum (via Vestibulocerebellum and Spinocerebellum Connections) in Maintenance of Posture and Equilibrium	797
Role of Paleocerebellum (via Spinocerebellar Connections) in Maintenance of Muscle Tone	797
Role of Neocerebellum in Control of Movements	797
Comparator of a Servomechanism	798
Cerebellum Learning	798
Other Cerebellar Functions	799
Applied Clinical Physiology: Cerebellum	799
Cerebellar Lesions	799
Exam-oriented Questions	800

97. Thalamus 801

Introduction	801
Connections	802
Medial Nuclear Mass	802
Lateral Nuclear Mass	802
Midline Nuclei	803
Intralaminar Nuclei Group	803
Pulvinar Nuclei	803
Functions of the Thalamus	803
Applied Physiology	804
Thalamic Syndrome	804
Prion Disease	804
Exam-oriented Questions	805

98. Mammillary Bodies and Internal Capsule 806

Introduction	806
Internal Capsule	806
Applied Physiology	806
Exam-oriented Questions	806

99. The Basal Ganglia	807	
Introduction	807	
Characteristics of the Basal Ganglia	807	
Interconnections	807	
Basal Ganglia Connections of Physiological Importance	808	
Corpus Striatum	809	
Anatomy	809	
Connections of the Corpus Striatum	809	
Substantia Nigra	809	
Connections of Substantia Nigra	809	
Body of Luys or Corpus Luysi (Subthalamic Nucleus)	809	
Functions of the Basal Ganglia	810	
Applied Physiology	810	
Clinical Manifestations Associated with the Diseases of the Basal Ganglia	810	
Parkinsonism: Paralysis Agitans	810	
Progressive Hepatolenticular Degeneration or Wilson's Disease	811	
Chorea	811	
Athetosis	811	
Torsion Spasm	811	
Hemiballismus or Hemichorea	812	
Exam-oriented Questions	812	
100. The Reticular Formation	813	
Introduction	813	
The Ascending Reticular Activating System	813	
Wakefulness and Alertness	813	
Feedback Theory for the Maintenance of Activation of the Reticular Activating System	814	
Applied Physiology	814	
The Descending Reticular System	814	
Descending Inhibitory Reticular Projection	815	
Descending Facilitatory Reticular Projection	815	
Functions of the Reticular Formation	815	
Exam-oriented Questions	816	
101. Muscle Tone and Posture	817	
Introduction	817	
Muscle Tone	817	
Posture	818	
Postural Mechanism	818	
Afferent Impulses for Muscle Tone and Posture	818	
Higher Centres for Muscle Tone and Posture	818	
Thalamic Animal (<i>Vide</i> Functions of Thalamus)	819	
Decerebrate Preparation	819	
Determination of Posture and Distribution of Muscle Tone	820	
Autogenic Inhibition: Clasp-knife Reflex	821	
Midbrain Component	822	
Inputs from Vestibular System	822	
Flexion Reflexes	822	
Spinal Preparation	822	
Supraspinal Control of the Stretch Reflex in Relation to Muscle Tone and Posture	823	
Postural Reflexes and Postural Connection	825	
Righting Reflexes and Postural Connection	825	
Control or Co-ordination of Willed Movement	826	
Exam-oriented Questions	827	
102. Vestibular Apparatus	828	
Introduction	828	
Functions of Vestibular Apparatus	830	
Vestibular Function Tests	830	
The Semicircular Canals	830	
Anatomy	830	
Histology	831	
Mode of Action	833	
Functions	833	
The Otolithic Organ	833	
Anatomy	833	
Histology	833	
Mode of Action	833	
Functions	834	
Unilateral Extirpation of the Labyrinths	834	
Bilateral Extirpation of the Labyrinths	835	
Applied Physiology	835	
Exam-oriented Questions	835	
103. Path of Vestibular Impulse	836	
Introduction	836	
Vestibulospinal Tract (from Deiters' Nucleus)	837	
Habituation	837	
Exam-oriented Question	837	
104. Cerebrum	838	
Introduction to Evolution	838	
Anatomy	838	
Grey Matter (Cortex)	839	
White Matter	840	
Structure of the Cerebral Cortex and Functions of its Different Layers	840	
Regional Peculiarities	841	
Functions of Different Layers of the Cerebral Cortex	843	
Functions	843	
Localisation of Brain Function	843	
Methods of Localisation of Functions in the Cerebral Cortex	843	
Areas and Centres in the Cerebral Cortex	844	
Frontal Lobe	844	
Precentral Cortex (Areas 4, 6, 8, 44)	844	
Prefrontal Cortex (Areas 9, 10, 11, 12, 32)	845	
Connections of the Prefrontal Lobes	846	
Connections between Different Lobes	846	
Functions of the Prefrontal Lobes	846	
Applied Physiology: Effects of Removal of the Prefrontal Lobes	847	
Frontal Lobe and the Seat of Intelligence	847	
Parietal Lobe	848	
Sensory Areas (Areas 3, 1 and 2)	848	
Motor Area (Adversive)	848	
Temporal Lobe	849	
Sensory Area (Audiosensory)	849	
Association Area (Audiotpsychic)	849	
Motor Area (Adversive)	849	
Applied Physiology: Temporal lobe Syndrome	849	
Occipital Lobe	849	
Sensory Area (Visuosensory)	849	
Association Area (Visuopsychic)	849	
Motor Areas	850	
Functions of the Cerebrum	850	
Motor Functions	850	
Seat of Conditioned Reflex	850	
Sensory Functions	850	
Intellectual Functions	851	
Electrical Activity of the Cerebral Cortex	851	
Electroencephalography	851	
Applied Physiology: Electroencephalogram (EEG)	851	
Electroencephalogram (EEG)	851	
Conclusion	855	
Physiological Basis of EEG	856	
Evoked Cortical Potentials	856	
Other Types of Electrical Activity in the Cerebral Cortex	856	
Applied Physiology	857	
Brain Death	858	
Introduction	858	
Exam-oriented Questions	859	

105. Limbic Lobe and Limbic System	860	110. Cerebrospinal Fluid	879
Introduction 860		Introduction 879	
Afferent and Efferent Connections of Limbic System 860		Character 879	
Interconnection 860		Composition 879	
Functions of the Limbic System 860		Formation of Cerebrospinal Fluid 879	
Applied Physiology 861		Rate of Formation 879	
Exam-oriented Questions 861		Circulation 880	
		Nervous and Humoral Factors Controlling the Formation and Circulation of the Cerebrospinal Fluid 880	
106. Speech	862	Absorption 880	
Introduction 862		Mechanism of Absorption 880	
Centre 862		Functions of Cerebrospinal Fluid 881	
Development of Speech 862		Applied Physiology: Lumbar Puncture 881	
Applied Physiology: Aphasia 862		Ventriculography 881	
Classification of Aphasia 863		Hydrocephalus 881	
Head's Classification of Aphasias 864		Blood-CSF and Brain Barrier 881	
Exam-oriented Questions 864		Blood-Cerebrospinal Fluid Barrier 881	
		Blood-Brain Barrier 882	
107. Neurophysiology of Learning and Memory	865	Cerebrospinal Fluid-Brain Barrier 882	
Introduction 865		Exam-oriented Questions 882	
Learning 865			
Classical Conditioning of Pavlov 865		111. Autonomic Nervous System	883
Development of Conditioned Reflexes 866		Introduction 883	
Classifications 867		General Considerations 883	
Conditioned Excitatory Reflexes 867		General Arrangement 883	
Conditioned Inhibitory Reflexes 867		Dual Supply 885	
Functions of Conditioned Reflexes 868		Sympathetic (Thoracolumbar) System 885	
Effects of Drugs upon Conditioned Reflexes 868		Sympathetic Ganglia 885	
Operant Conditioning 868		Sympathetic Outflow 886	
Condition Avoidance or Avoidance Conditioning 868		Gastrointestinal Tract 888	
Instrumental Conditioning or Learning 868		Parasympathetic (Craniosacral) System 888	
Discrimination Learning 868		Parasympathetic Outflow 888	
Physiological Basis of Conditioned Reflexes and Learning 869		Spinal Parasympathetic 890	
Memory and its Neurophysiological Basis 869		Higher Autonomic Centres 891	
Experimental Evaluation: Memory Consolidation and Storage 870		Functions of Sympathetic and Parasympathetic Systems 891	
Mechanism of Memory Encoding, Consolidation and Storage 870		Control of the Autonomic Nervous System 893	
Applied Physiology 871		Nervous Control 893	
Exam-oriented Questions 871		Applied Physiology 896	
		Exam-oriented Questions 896	
108. Sleep	972	112. Hypothalamus	897
Introduction 872		Introduction 897	
Sleep Rhythm 872		Nuclei of Hypothalamus 897	
Sleep Requirement 872		Connections of Hypothalamus 897	
Depth of Sleep 872		Afferent Connections 897	
Physiological Changes during Sleep 872		Functions of Hypothalamus 899	
Behavioural and EEG Changes during Sleep 873		Controls the Autonomic Nervous System 899	
Types of Sleep 873		Takes Part in Regulation of Body Temperature 899	
Normal Sleep 873		Controls Emotions 899	
Role of Neuronal System in Sleep-Wakefulness Cycle 873		Related to Hunger Feeding, Obesity and Thirst 900	
Theories of Sleep 874		Controls Circadian Rhythm 900	
Feedback Theories of Wakefulness and Sleep 874		Controls Sleep Wakefulness Cycle 900	
Applied Physiology 874		Maintenance of Homeostasis 900	
Exam-oriented Questions 875		Regulation of Water Balance 900	
		Regulation of Posterior Pituitary Gland Activity 901	
109. Emotion	876	Regulation of Pituitary Gland Activity 901	
Introduction 876		Cardiovascular Regulation 902	
Behavioural Changes in Emotion 876		Relation with Stress through Neurohormonal Mediation 902	
Neural Control of Emotion 876		Applied Physiology 902	
Hypothalamus 876		Hypopituitarism 902	
Thalamus 877		Common Causes of Hypothalamic Dysfunction 902	
Cerebral Cortex and Limbic System 877		Recent Advances 902	
Papez Circuit: Physiological Basis of Emotion 877		Hypothalamus and Odour Response 902	
Applied Physiology 878		Exam-oriented Questions 903	
Exam-oriented Questions 878			

113. Neurosecretion 904

- Introduction 904
- Modern Concept of Neurosecretion 904
- Nature of Neurosecretory Cells 904
- Significance of Neurosecretory Cells 904
- Exam-oriented Questions 904

114. Cranial Nerves 905

- Introduction 905
- Applied Anatomy and Physiology 909
 - Other Disorders of CNS 909
- Exam-oriented Questions 910
- Clinical Case Scenario 911
 - Central Nervous System 911

Section XI Special Senses

115. Senses of Taste 914

- Introduction to Special Senses 914
 - General Characters 914
- Taste (Gustation) 914
 - Primary Taste Sensations 914
- Tongue 915
 - Papillae and Histology of Tongue 915
 - Taste Buds 915
 - Histology 915
 - Distribution 915
 - Varieties 915
 - Nature of Stimuli 915
 - Receptor Stimulation 915
 - Basic Modalities of Taste 916
 - Chemical Constitution Related to Taste 916
 - Threshold of Primary Taste Sensations 916
 - Factors Influencing Taste Sensations 916
 - Path of Taste Impulses 917
 - Applied Physiology 918
- Exam-oriented Questions 918

116. Sense of Smell (Olfaction) 919

- Introduction 919
 - Olfactory Mucous Membrane 919
 - Olfactory Epithelium 919
 - Olfactory Receptors 920
 - Olfactory Bulb 921
- Olfactometer 921
 - Physiology of Olfaction 921
 - Olfactory Discrimination 921
 - Olfactory Adaptation 922
 - Chemical Compounds and their Relation to Olfactory Sensation 922
 - Relation of Odorous Substances 922
 - Pathways of Olfactory Impulses 922
 - Olfactory System: Primitive and New Olfactory System 922
 - Pathophysiology of Altered Smell Sensation 923
- Exam-oriented Questions 924

117. Physiology of Vision 925

- Introduction 925
 - Tunics 925
- Conjunctiva 925
- Lacrimal Apparatus 925
- Eyeball 926
 - Refractive Media of the Eyeball 926
 - Optical Arrangement of the Eye 928

- Cornea 928
 - Functions 928
 - Histology 928
 - Nutrition of Cornea 929
- Aqueous Humour 929
 - Composition of Aqueous Humour 929
 - Flow of Aqueous Humour 930
 - Functions 930
 - Aqueous Veins 930
- Crystalline Lens 930
 - Histology 930
 - Function 931
 - Nutrition of Lens 931
- Vitreous Humour (Vitreous Body) 931
 - Functions 931
 - Blood-Vitreous Barrier 932
 - Control of Eye Movement 932
 - Co-ordination of Eye Movements 932
 - Nervous Control 932
 - Intercommunication of the III, IV and VI Cranial Nerve Nuclei 933
 - Effects of Section of III Cranial Nerve 934
 - Effects of Section of VI Cranial Nerve 935
 - Effects of Section of IV Cranial Nerve 935
- Iris 935
 - Effects of Sections 936
 - Functions of Iris 936
- Pupil 938
 - Functions of Pupil 938
 - Pupillary Reflexes 938
 - Argyll Robertson Pupil 940
- Accommodation 940
 - Definition 940
 - Mechanism of Accommodation 940
 - Nerve Path for Accommodation Reflex 941
 - Common Errors of Refraction 941
 - Spherical Aberration 943
 - Chromatic Aberration 944
 - Applied Physiology: Contact Lens 944
 - Advantages of a Contact Lens 944
- Retina 944
 - Anatomy 944
 - Histology 944
 - Regional Peculiarities of the Retina 946
 - Blood Supply of the Retina 947
 - Functions of the Retina 947
 - Rods and Cones 947
 - Fine Structure 947
 - Formation of an Image on the Retina 950
 - Effects of Light on the Retina 950
 - Phototransduction 950
 - Photochemical Changes 950
- Neurophysiology of Vision 951
 - Electrical Activity in the Retina 951
 - Electrophysiological Changes 952
- Spectral Sensitivity: Scotopic Vision and Photopic Vision 953
 - Light and Dark Adaptation 953
 - Light Adaptation 954
- Visual Acuity 954
 - Snellen's Test Type 954
- Ophthalmoscopy 955
 - Modern Ophthalmoscope 955
- Retinoscopy 955
- Field of Vision 955
 - Definition 955
 - Extent 955
 - Mapping of the Field of Vision (Perimetry) 956

Binocular Vision	956
Monocular Depth Perception	957
Stereoscopic Vision	957
Applied Physiology	957
The Visual Pathway	957
Optic Nerve and Tract	957
Visual Signal Processing	959
Effects of Injury at Different Levels of Visual Path	961
Macular Sparing	961
Colour Vision	961
Theories of Colour Vision	962
Cortical Representation of Colour Sensation	963
Colour Blindness	963
Contrast Phenomenon	964
Exam-oriented Questions	965

118. Hearing

966

Anatomy	966
External Ear	966
Middle Ear	966
Internal Ear	968
Properties of Sound and Range of Hearing	971
Sound Waves	971
Properties of Sound	972
Range of Hearing	973
Auditory Acuity	973
Threshold of Audibility	973

Difference or Discrimination Threshold	973
Localisation of Sound	973
Auditory Fatigue	973
Noise	973
Masking	974
Deafness	974
Brainstem Auditory Evoked Potential	975
Transmission of Sound Wave	975
Role of External Ear and Middle Ear in Sound Perception including their Functions	975
Functions of the Cochlea (Theories of Hearing)	976
Mechanics of the Cochlear Duct (Cochlear Partition)	977
Electrical Potentials of the Cochlea	978
Action Potential from the Auditory Nerve	979
Path of Auditory Impulses	979
Exam-oriented Questions	983
Clinical Case Scenario	984
Special Senses	984

Multiple Choice Questions

Endocrine and Reproduction	988
Central Nervous System and Special Senses	1001
Applied Physiology	1014
