<i>Syllabus</i>	<i>xi</i>
<i>Safety Instructions to the Students</i>	<i>xiii</i>
<i>Laboratory Equipment</i>	<i>xv</i>

Part I **Practical Medicinal Chemistry I** Course Code: BP406P

1. Process of Purification of Organic Compounds	3
Methods of Purification	3
Sublimation	4
Crystallization	5
Boiling Point Determination and Distillation	9
Purification of Liquids	11
Distillation	11
Extraction	16
Chromatography	16
Determination of Melting Point and Boiling Point	21
Melting Point Sharp	21
Melting Point Indefinite	21
Drying of Organic Substances	22
Experiment 1: To Determine Melting Point of Given Compound (Benzoic Acid)	23
Experiment 2: To Determine the Boiling Point of the Given Organic Compound (Benzene)	25
2. Synthesis of Organic and Medicinal Compounds	27
Experiment 1: To Prepare and Submit 1,3-Pyrazole	27
Experiment 2: To Prepare and Submit Benzimidazole	28
Experiment 3: To Prepare and Submit Benzotriazole	30
Experiment 4: To Prepare and Submit 2,3-Diphenyl Quinoxaline	31
Experiment 5: To Prepare and Submit Benzocaine	32
Experiment 6: To Prepare and Submit 5,5-Diphenylhydantoin (Phenytoin) from Benzil	34
Experiment 7: To Prepare and Submit Phenothiazine	36
Experiment 8: To Prepare and Submit Barbituric Acid	37
Experiment 9: Determination of Partition Coefficient of Salicylic Acid	38
Experiment 10: To Determine Percentage Purity of Aspirin	40
Experiment 11: To Determine Percentage Purity of Ibuprofen	41
Experiment 12: To Determine Percentage Purity of Sulphamethoxazole	41

- Experiment 13:** To Determine Percentage Purity of Frusemide 42
- Experiment 14:** To Determine Percentage Purity of Atropine Sulphate 43
- Experiment 15:** To Determine Percentage Purity of Phenobarbitone 43
- Experiment 16:** To Determine Percentage Purity of Chloroquine Sulphate 43
- Experiment 17:** To Determine Percentage Purity of Chlorpromazine Hydrochloride 44
- Experiment 18:** To Prepare and Submit Picric Acid (2,4,6-trinitrophenol) from Phenol (Nitration) 44
- Experiment 19:** To Prepare and Submit 2,4,6-Tribromophenol (Bromination) 46
- Experiment 20:** To Prepare and Submit Methyl Orange from Sulphanilic Acid 47
- Experiment 21:** To Prepare and Submit Methyl Red 48
- Experiment 22:** To Prepare and Submit Phenolphthalein from Phenol 50
- Experiment 23:** To Prepare and Submit Phthalic Anhydride 51
- Experiment 24:** To Prepare and Submit Phthalimide from Phthalic Anhydride 52
- Experiment 25:** Synthesis and Characterization of Phenindione 53
- Experiment 26:** To Prepare and Submit Anthranillic Acid 54
- Experiment 27:** To Prepare and Submit Fluorescein (Friedel-Crafts Reaction) 55
- Experiment 28:** To Prepare and Submit Aniline 56
- Experiment 29:** To Prepare and Submit 2,4,6-Tribromoaniline from Aniline (Bromination) 58
- Experiment 30:** To Prepare and Submit Sulfanilic Acid 59
- Experiment 31:** Synthesis and Characterization of Sulphanilamide 60
- Experiment 32:** To Prepare and Submit Nitrobenzene 63
- Experiment 33:** To Prepare and Submit Benzamide 65
- Experiment 34:** Synthesis and Characterization of Benzimidazole 66
- Experiment 35:** To prepare and Submit Acetanilide from Aniline (Acetylation) 67
- Experiment 36:** To Prepare and Submit Benzanilide from Aniline 69
- Experiment 37:** To Prepare and Submit Phenyl Benzoate from Phenol (Schotten-Baumann Reaction) 70
- Experiment 38:** To Prepare and Submit p-Bromo Acetanilide from Aniline 72
- Experiment 39:** Synthesis and Characterization of Benzanilide 73
- Experiment 40:** To Prepare and Submit Phenyl Urea 74
- Experiment 41:** To Prepare and Submit Thiourea 76
- Experiment 42:** To Prepare and Submit Iodoform from Ethanol (Haloform Reaction) 77
- Experiment 43:** To Prepare and Submit Phenylbutazone 78
- Experiment 44:** To Prepare and Submit 5-Nitro Salicylic Acid 79
- Experiment 45:** To Prepare and Submit Aspirin 80
- Experiment 46:** Synthesis and Characterization of Aspirin from Salicylic Acid 81

- Experiment 47:** Synthesis and characterization of Paracetamol (Acetaminophen) from Para Amino Phenol 83
- Experiment 48:** Synthesis and Characterization of Antipyrine 85
- Experiment 49:** To Prepare and Submit Sulphanilamide from Acetanilide 86
- Experiment 50:** To Prepare and Submit 1,2,3,4-Tetrahydrocarbazole (Fischer Indole Synthesis) 88
- Experiment 51:** To Prepare and Submit 3-Methyl-1-Phenyl-5-Pyrazolone 88
- Experiment 52:** To Prepare and Submit 3,4-Dihydro-1-Hydroxy-4-Oxophthalazine 89
- Experiment 53:** To Prepare and Submit Methyl Salicylate (Oil of Wintergreen) 90
- Experiment 54:** To Prepare and Submit Oxalic Acid from Sucrose 90
- Experiment 55:** To Prepare and Submit Benzoic Acid 91
- Experiment 56:** To Prepare and Submit Hippuric Acid 91
- Experiment 57:** To Prepare and Submit Anthranilic Acid from Pthalimide By Hofmann's Rearrangement Reaction 92

Part II
Practical Medicinal Chemistry III
 Course Code: BP607P

3. Experiments

95

- Experiment 1:** To Prepare and Submit Sulphanilamide 95
- Experiment 2:** To Prepare and Submit 7-Hydroxy-4-Methyl Coumarin 96
- Experiment 3:** To Prepare and Submit Chlorbutanol 97
- Experiment 4:** To Prepare and Submit Tolbutamide 98
- Experiment 5:** To Prepare and Submit Hexamine 99
- Experiment 6:** Assay of Isonicotinic Acid Hydrazide Tablets 100
- Experiment 7:** Assay of Metronidazole Tablets 101
- Experiment 8:** Assay of Dapsone Tablets 102
- Experiment 9:** Assay of Chlorpheniramine Maleate Tablets 104
- Experiment 10:** Assays of Benzyl Penicillin Tablets 105
- Experiment 11:** To Synthesis and Submit Phenytoin from Benzil by Using Microwave Irradiation Technique 107
- Experiment 12:** To Synthesize and Submit Aspirin from Salicylic Acid by Using Microwave Irradiation Technique 108
- Experiment 13:** Drawing Structure and Reaction Using Chems sketch 109
