

Contents

<i>Preface to the Second Edition</i>	<i>vii</i>
<i>Preface to the First Edition</i>	<i>ix</i>

Section I: Basic Biochemistry	1
--------------------------------------	----------

Cell and Subcellular Components, Enzymes, Biochemical Processes Involved in Generation of Energy in Cells

Section II: Macromolecules	27
-----------------------------------	-----------

Chemistry and Metabolism of Carbohydrates, Chemistry and Metabolism of Lipids, Chemistry and Metabolism of Proteins Metabolism and Homeostasis

Section III: Molecular Biology	94
---------------------------------------	-----------

Chemistry and Metabolism of Nucleotides, Structure and Functions of Nucleic Acids, Processes of Replication, Transcription and Translation, Gene Mutations and Regulation of Gene Expression, Applications of Molecular Technologies

Section IV: Nutrition	128
------------------------------	------------

General Nutrition, Vitamins, Minerals

Section V: Oncogenesis and Immunity	160
--	------------

Xenobiotics, Oncogenesis, Immunity, Antioxidant Defense System and Oxidative Stress

Section VI: Clinical Chemistry	191
---------------------------------------	------------

pH and Acid–Base Balance, Metabolism of Hemoglobin, Organ Function Tests, Water and Electrolytes

Section VII: ECM	216
-------------------------	------------

Extracellular Matrix
