<i>Preface</i>	v
<i>How to use this Logbook</i>	vi
CM 2.1 : Learning aids to CM 2.1: Study of humanities and social sciences.	1
CM 2.1 : Describe the steps and perform clinico-sociocultural and demographic assessment of individual, family and community.	2
CM 2.1 : Describe the steps and perform clinico-sociocultural and demographic assessment of individual and family.	6
CM 2.2 : Describe the sociocultural factors, family types, its role in health and disease and demonstrate in a simulated environment the correct assessment of socio-economic status.	10
CM 2.3 : Describe and demonstrate in a simulated environment the assessment of barriers to good health and health seeking behaviors.	14
CM 1.9 : Demonstrate the role of effective communication skills in health in simulated environment.	18
CM 1.10 : Demonstrate the important aspects of doctor–patient relationship in a simulated environment.	21–22
CM 3.7 : Identify and describe the identifying features and life cycle of vectors of public health importance and their control measures.	26
CM 4.3 : Demonstrate and describe the steps in evaluation of health promotion and education program.	28
CM 5.2 : Describe and demonstrate the correct method of performing a nutritional assessment of individual, family, and community by using the appropriate method.	36
CM 5.4 : Plan and recommend a suitable diet for an individual and families based on local availability of foods and economic status, etc. in a simulated environment.	42
CM 6.1 : Formulate a research question for a study.	46
CM 6.2 : Describe and discuss the principles and demonstrate the methods of collection, classification, analysis, interpretation, and presentation of statistical data.	50
CM 6.3 : Describe and discuss the application of elementary statistical methods including the test of significance in various study designs.	54
CM 6.4 : Enumerate, discuss, and demonstrate simple statistical methods, frequency distribution, measure of central tendency and dispersion.	54
CM 6.4 : Enumerate, discuss, and demonstrate common sampling techniques.	58
CM 7.4 : Define, calculate, and interpret morbidity and mortality indicators based on a given set of data.	62

CM 7.6 : Enumerate and evaluate the need of screening tests.	68
CM 7.7 : Describe and demonstrate the steps in the investigation of an epidemic of communicable disease and describe the principles of the control measures.	74
CM 7.9 : Describe and demonstrate the applications of computers in medicine.	78
CM 8.6 : Educate and train health workers in disease surveillance, control, treatment, and health education.	82
CM 9.2 : Define, calculate, and interpret demographic indices including birth rate, and fertility rates.	86
CM 17.2 : Describe community diagnosis and community therapy.	90
Pandemic Management Modules 3.1 to 3.3	93–95
Study of Humanities and Social Sciences	98
Foundation Course	99
Professional Development including AETCOM	100
Family Adoption Program	101–105
Pandemic Module F	106
Vertical and Horizontal Integration of Various Competencies	107
Simulation-based Learning: Skills Laboratory	108
Sports, Yoga and Extracurricular Activities	109
SDL including Family Adoption Program	110–119
Final summary	120
References	120
