Foreword by Ashok Kumar Basa

v

Preface

vii

Unit I: General Requirements of RCC Designs

1. General Requirements of Reinforced Cement Concrete

1.1 Introduction	1
1.2 Materials for Reinforced Cement Concrete	2
1.3 Cement Concrete	2
1.4 Steel Reinforcement	8
1.5 Requirements and Stresses of Steel Reinforcement	9
1.6 Design Loads	17
1.7 Arrangement of Reinforcement	22
Summary	25
Practice Questions	26

2. Design Philosophies

2.1 Introduction	29
2.2 Working Stress Method (Linear Elastic Theory)	30
2.3 Ultimate Load Method	32
2.4 Limit State Method	33
2.5 Characteristic Strength and Design Strength	34
2.6 Idealised Stress-Strain Curves for Materials	36
Summary	38
Practice Questions	40

3. Working Stress Method

3.1 Introduction	44
3.2 Assumptions in Linear Elastic Theory of RC Beam Sections	46
3.3 Equivalent Areas of Composite Sections	46
3.4 Neutral Axis in Bending Elements	48
3.5 Analysis and Design of Reinforced Beam Sections (Singly Reinforced)	51
3.6 Doubly Reinforced Beam Sections	59
3.7 Analysis and Design of T-beam Sections	69
Summary	85
Practice Questions	88

Unit II : Limit State Design of Beams

4. Limit State Design of Beam Section for Bending Moment

4.1 Introduction	98
4.2 Limit States of Safety and Serviceability	99
4.3 Characteristic and Design Values with Partial Safety Factors	99
4.4 Assumptions in Limit State of Collapse in Flexure	101
4.5 Stress Block Parameters	104
4.6 Design Parameters of Stress Block (IS:456-2000)	106
4.7 Analysis of Singly Reinforced Rectangular Sections	107
4.8 Moment of Resistance (M_u) as per (IS:456-2000)	109:
4.9 Design of Beam Section (Singly Reinforced)	111
4.10 Doubly Reinforced Rectangular Sections	118
4.11 Design of Doubly Reinforced Beam Sections	121
4.12 Analysis and Design of Flanged Beam Sections	127
Summary	143
Practice Questions	146

5. Limit State Design for Shear, Torsion, Bond and Development Length of Reinforcement in Beams

5.1 Limit State Design for Shear	160
5.2 Limit State Design for Torsion	169
5.3 Limit State Design for Bond	177
Summary	189
Practice Questions	191

6. Limit States of Serviceability for Bending Elements

6.1 Introduction	200
6.2 Limit State for Deflection	201
6.3 Cracking in Concrete Elements	206
Summary	217
Practice Questions	218

Unit III: Limit State Design of Slabs

7. Limit State Design of Slabs

7.1 Limit State Design of One-Way Simply Supported Slabs	222
7.2 Limit State Design of One-Way Continuous Slab	230
7.3 Limit State Design of Two-Way Simply Supported Slabs	237

7.4 Flat Slab	249
Summary	264
Practice Questions	267

Unit IV: Design of Compression Members (Columns)

8. Limit State Design of Columns

8.1 Introduction	274
8.2 Limit State Design of Columns	278
Summary	298
Practice Questions	300

Unit V: Design of Foundations

9. Limit State Design of Footings

9.1 Introduction	306
9.2 Design of Shallow Foundations	309
9.3 Pile Foundation	331
Summary	338
Practice Questions	341

Unit VI: Retaining Structure

10. Limit State Design of Retaining Walls

10.1 Introduction	349
10.2 Design of Cantilever Retaining Walls	355
10.3 Counterfort Retaining Walls	367
Summary	378
Practice Questions	380

11. Water Retaining Structures (Tanks)

11.1 Introduction	388
11.2 Design of Circular Tanks Resting on Ground	391
11.3 Rectangular Tanks Resting on Ground	396
11.4 Underground Tanks	405
11.5 Overhead Service Reservoirs (OHSR)	413
11.6 Design of Tower/ Shaft for OHSR	441
Summary	464
Practice Questions	470

UNIT VII: Miscellaneous Structures

12. Introduction to Prestressed Structural Concrete

12.1 Introduction	490
12.2 Basic Concepts	491
12.3 Classification and Types of Prestressing	496
12.4 Pretensioning and Post-tensioning Systems	497
12.5 End Anchorages and Prestressing Systems	498
12.6 Post-tensioning System and Anchorages	499
12.7 Losses of Prestress	504
Summary	528
Practice Questions	530

13. Design of RCC Staircases

13.1 Introduction	539
13.2 Design of Staircase	540
13.3 Loads on Staircase	540
13.4 Effective Span of Stairs	541
Summary	551
Practice Questions	552

14. Design of RCC Culverts

14.1 Introduction	558
14.2 Loads	559
14.3 Design of Slab Culvert	565
14.4 Box Culvert	571
Summary	581
Practice Questions	582

15. Yield Line Analysis of Slabs

15.1 Introduction	587
15.2 Assumptions	589
15.3 Characteristics	589
15.4 Sign Conventions and Yield Line Patterns	589
15.5 Moment Capacity across a Yield Line	589
15.6 Analysis of Ultimate Load Capacity of Slabs	592
15.7 Isotropically Reinforced SS Square Slab with U.D.L.	593
Summary	611
Practice Questions	613

<i>Key to Objective Questions</i>	619
-----------------------------------	-----

<i>Glossary</i>	623
