PREFACE page vii

Part One General Dispensing

1	Introduction	3	10	Suspensions	100
2	Types of Dispensed Preparation	8	11	Emulsions and Creams	120
3	Containers and Closures	13	12	Powders and Oral Unit-dosage Forms	168
4	Labelling	24	13	Ointments, Pastes and Jellies	192
5	Weights and Measures	31	14	Suppositories and Pessaries	232
6	Fundamental Operations	35	15	Incompatibility	253
7	Colour and Flavour	47	16	Dispensing of Proprieties and Manufacture of Nostrums	265
8	Calculations	54	17	Surgical Dressings	270
9	Solutions	67	18	Medical Gases	288

Part Two Sterilisation Practice

19	Microbiological Aspects of Sterilisation Processes	299	25	Sterility Testing	541
20	The Formulation of Injections	314	26	Aseptic Processing	579
21	Containers and Closures	357	27	Gaseous Sterilisation	614
22	Sterilisation by Heat	395	28	Sterilisation by Radiations	623
23	The Preparation of Heat-sterilised Injections	442	29	Ophthalmic Products	634
24	Aseptic Technique	494	30	Sterilisation of Equipment and other Articles	663

Appendixes

1	Reducing Agents and Antioxidants	677	6	Sterilisation Methods, Preservatives and Stabilisation Methods for Eye-drops	693
2	Pyrogen Tests	682	7	Packaging and Labelling of Non-sterile Dispensed Preparations	696
3	Incompatibilities of Bactericides for Parenteral Use	686	8	The Imperial System	699
4	Classification of Injections under Methods of Sterilisation	687	9	Latin Terms and Abbreviations	720
5	Classification of Injections under Methods of Stabilisation	689	10	Posology	724
