Volume 1

Cardiovascular Emergencies in India (An Overview) 1

1. History Taking, Symptoms, Signs and Investigations in a Heart Patient (An Overview) 7

History Taking 7

Bedside History 7

Splinter Hemorrhages 9

Cardiac Syndrome X (Angina with Normal Coronary Arteries) 10

Intermittent Claudication 10

Exploring Hypertensive Heart Disease 11

Enquiring for Cor Pulmonale 12

Cardiac Chamber Enlargement Possibilities 12

How to Know About Past Cardiac Surgery? 12

Pericarditis, Effusion Constriction or Tamponade Possibilities 12

New York Heart Association Functional and Therapeutic Classification 14

Symptoms Resulting from a Raised Pulmonary Venous Pressure 14

Dyspnoea 14

Orthopnoea 15

Paroxysmal Nocturnal Dyspnoea 15

Acute Pulmonary Edema 15

Gradation of Dyspnoea 15

Cough 15

Haemoptysis (Coughing Out of Blood) 16

Symptoms of an Inadequate Coronary Blood Flow 16

Symptoms of Right to Left Intracardiac Shunts 16

Symptoms of Congestive Heart Failure 17

Cardiac Syncope 18

General Physical Examination 20

Cyanosis 24

Clubbing of the Fingers 25

Abdominal Pain 25

Abnormal Pulse 27

The Arterial Pulse 27

Large Amplitude Pulse 28

Small Amplitude Pulse	28
Pulse Varying in Amplitude	28
Anacrotic Pulse (Plateau Pulse, Slow Rising Pulse)	29
Water Hammer Pulse (Collapsing Pulse)	29
Pulses Bisferiens	30
Dicrotic Pulse	30
Carotid Pulse	31
Comparison of the Pulses	31
Blood Pressure	31
Jugular Venous Pressure	34
Abnormalities of Waveform in the Jugular	35
Normal Precordial Activity	37
Inspection	38
Palpation	38
Percussion	42
Auscultation	43
The Heart Sounds	46
Gallop Rhythm	51
Cardiac Murmurs	51
Systemic Flow Murmurs (Supraclavicular Systemic Bruits)	57
Venous Hum	57
Pericardial Friction Rub	59
Investigations Required in Establishing Diagnosis	59

2. Recognition and Management of Angina Pectoris

66

Main Categories of Angina Pectoris	66
Myocardial Ischemia in Angina Pectoris	69
Pathogenesis in Angina Pectoris	71
Incidence of Angina Pectoris	73
History in Angina Pectoris	73
Physical Examination in Angina Pectoris	74
Risk Factors	74
Laboratory Investigations	74
Management of Angina Pectoris	79

3. Recognition and Management of Acute Coronary Syndrome

92

Pathogenesis and Pathophysiology	93
Diagnostic Approach in ACS	94
Atrial Arrhythmia	111
Pharmacologic Anti-ischemic Therapy	123
Pharmacologic Anti-thrombotic Therapy	123
Pharmacologic Anticoagulation Therapy	125
Thrombolysis	126
Antiplatelet Agents	127
Analgesics	127
Beta-adrenergic Blockers	127
Anticoagulants	128
Adenosine Diphosphate Receptor Antagonists	128
Management of Non-ST-elevation Acute Coronary Syndromes (ACSS)	129
Coronary Interventions	131
Adjunctive Medical Therapy	135
Quick Readings	141

4. Invasive and Noninvasive Coronary Angiography

145

Historical Background	145
Main Objective of Coronary Angiography	146
Indications	147

Contraindications	147
Left Coronary System	150
Left Coronary Artery	150
Right Coronary System	153
Right Coronary Artery	153
Complications in Coronary Angiography	153
Fractional Flow Reserve	170
5. Right Ventricular Infarction	184
Pathophysiology	184
Frequency	185
History	185
Physical Examination	186
Imaging Studies	186
Management	190
6. Percutaneous Coronary Interventions (Balloon Angioplasty and Stentoplasty)	196
Indications for PCI	197
Contraindications to PCI	197
Preparation in Percutaneous Coronary Balloon Angioplasty Equipment	197
Types of Interventions Employed in Coronary Artery Disease	200
Post-procedure Outcome of PCI	211
First-in-Human Evaluation of a Novel Robot-assisted Coronary Angioplasty System	211
Complications Associated with PCI	222
7. Acute Pulmonary Edema	228
Types and Causes of Pulmonary Edema	228
Aetiological Factors in Pulmonary Edema	229
Symptoms in Pulmonary Edema	229
Clinical Examination in Pulmonary Edema	229
Management of Pulmonary Edema	230
Quick Readings in Management of Acute Pulmonary Edema	238
8. Recognition and Management of Heart Failure	241
Classification in Heart Failure	241
Pathophysiology of Heart Failure	242
Pathophysiology of Diastolic Heart Failure (DHF)	244
Aetiological Factors	246
Underlying Causes	247
Routine Laboratory Tests	256
Genetic Testing	258
Assessment of Hypoxemia	258
Management of Right Ventricular Failure	298
9. Management of Heart Failure with Implantation of Newer Devices	306
Cardiac Contractility Modulation	308
10. Recognition and Management of Syncopal Attacks	325
Laboratory Studies	332
Imaging Studies	332
Procedures	337
Emergency Department Care	338
11. Electrophysiological Study and Catheter Management of Cardiac Arrhythmias	346
Technical Considerations in Performance of Electrophysiological Study	347
Long-term Monitoring	381
Surgical Interventions in the Management of Cardiac Arrhythmias	381

12. Recognition and Management of Infective Endocarditis	384
Right-sided Endocarditis	400
13. Recognition and Management of Acute Myocarditis	411
Incidence and Prevalence	411
Etiological Factors	411
Epidemiological Features of Myocarditis	411
Age and Gender	411
Pathophysiology	412
Clinical History	413
Physical Signs and Symptoms	413
Noninvasive Diagnostic Studies	414
Laboratory Tests	415
Management in Myocarditis	416
14. Cardiac Tamponade	425
Pathophysiology	425
Physical Examination	426
Aetiological Factors	427
Differential Diagnoses	427
Laboratory Studies	427
Histologic Findings	431
Management	431
Further Outpatient Care	434
Quick Readings in Cardiac Tamponade	434
15. Recognition and Management of Cardiomyopathies	437
Definition and Classification	437
Dilated Cardiomyopathy	439
Hypertrophic Cardiomyopathy	442
Ischemic Cardiomyopathy	447
Restrictive Cardiomyopathy	452
Noncompaction Cardiomyopathy	455
Arrhythmogenic Right Ventricular Cardiomyopathy	457
Takotsubo Cardiomyopathy	461
16. Recognition and Management of cardiac Valvular Emergencies	466
Aetiological Factors in Valvular Dysfunctions	467
Valvular Emergencies	468
Specific Valvular Lesions	469
Mitral Valve Disorders	469
Surgical Intervention	475
Mitral Regurgitation	476
Mitral Valve Prolapse (Click Murmur Syndrome)	482
Aortic Valve Disorders	489
Aortic Stenosis	489
Aortic Regurgitation	493
Tricuspid Valve Disorders	501
Tricuspid Valve Stenosis	501
Tricuspid Valve Regurgitation	504
Pulmonary Valvular Disorders	508
Pulmonic Stenosis	508
Pulmonic Regurgitation	516
Emergency Prosthetic Valvular Heart Diseases	522
17. Deep Vein Thrombosis and Pulmonary Embolism	534
Epidemiology	535
Medical History	535

Pathophysiology	535
Signs and Symptoms	536
Physical Examination	537
Invasive Laboratory Studies	542
Noninvasive Laboratory Studies	543
Prevention of Pulmonary Embolism	551
Treatment	552
Long-term Monitoring	554

18. Aortic Dissection **556**

Classification	556
Dissection Sites	557
Descending Aortic Dissections	558
Diseases Leading to Aortic Dissection	558
Incidence	558
Severity	559
Lab Studies	560
Imaging Studies	560
Management	564

19. Peripheral Vascular Disease and Endovascular Therapy **580**

Anatomical Basis of Peripheral Vascular System	580
Clinical Examination	583
Epidemiological Features	595
Complications of PVD	595
Invasive and Noninvasive Techniques in PVD	597
Medications	600
How to Prevent PVD	605

20. Recognition and Management of Cardiac Arrhythmia **611**

Genesis of Cardiac Dysarrhythmia	611
Classification of Cardiac Arrhythmias	612
Sinus Tachycardia	614
Sinus Bradycardia	615
Sinus Arrhythmia	616
SA Block	617
Sinus Arrest	617
Sick Sinus Syndrome	618
Paroxysmal Sinus Tachycardia Resulting from Nodal Re-entry	619
Supraventricular Arrhythmia	619
Premature Atrial Ectopics (PAC)	621
Atrial Tachycardia	624
Chaotic Atrial Tachycardia (CAT)	624
Atrial Flutter	624
Atrial Fibrillation	625
Wandering Pacemaker	626
Junctional Ectopic Mechanisms: Premature and Escape Junctional Beats	627
Accelerated Idiojunctional Rhythm	628
Junctional Escape	630
Paroxysmal Supraventricular Tachycardia Resulting from AV Nodal Re-entry	631
Vagotonic Manoeuvres for PSV	631
Atrial Fusion Complexes	632
Simulate Diaphragmatic (Inferior) MI	641
Ventricular Arrhythmias	642
Premature Ventricular Complexes	643
Ventricular Tachycardia	647
Ventricular Fibrillation	649

Torsades De Pointes	651
Accelerated Idioventricular Rhythm	651
Ventricular Fusion Complexes	651
Ventricular Parasystole	652
Ventricular Flutter and Fibrillation	652
Pulseless Electrical Activity	652
Intraventricular Blocks	654
Long QT Syndrome	657
Short QT Syndrome	658
Brugada Syndrome	659
How are Arrhythmias Diagnosed?	660
Diagnostic Tests And Procedures	662
How are Arrhythmias Treated?	664
Ongoing Care	669
Lifestyle Changes	670
Newer Antiarrhythmic Drugs	670

21. Cardiogenic Shock

676

Historical Background	676
Physical Examination	677
Predisposing Factors in Cardiogenic Shock	677
Differential Diagnoses	679
Laboratory Studies	680
Imaging Studies	680
MRI/CT Scans	682
Approach Considerations	685
Procedures	687
Coronary Artery Bypass Grafting	696
Revascularization in the Shock Trial	697
Patient Transfer	697

Volume 2

22. Cardiopulmonary Resuscitative Procedures in Emergency Department

699

Aha Official Guidelines for CPR—Latest 2014/2015	699
Cardiopulmonary Resuscitation	705
Airway Management	708
Vascular Access	715
Management of Ventilation	722

23. Recognition and Management of Hypertensive Emergencies

728

Hypertensive Urgencies	729
Epidemiology	730
Aetiology	730
Diagnosis	730
Imaging Studies	730
Management	731

24. Noninvasive Ventilation in Acute Cardiopulmonary Failure

742

Pathophysiology of Cardiogenic Pulmonary Edema	743
Practical Aspects of Noninvasive Ventilation in Cardiogenic Pulmonary Edema	749

25. Cardiovascular Emergencies in Children and Adolescents

754

Approach to the Pediatric Patient with Cyanosis	756
Congestive Heart Failure	764
Cardiomyopathies	773

Cardiac Arrhythmias 775
 Kawasaki Disease 778
 Aortic Disease and Dissection 785
 Pulmonary Embolism 786
 Cardiac Tamponade 789
 Brugada Syndrome 792

26. Extracorporeal Membrane Oxygenation Support in Critically Ill Patients 798

Extracorporeal Membrane Oxygenation 798
 Types of Extracorporeal Membrane Oxygenation 798
 Indications for Extracorporeal Membrane Oxygenation 800
 Indications of ECMO in Adults 800
 Techniques Employed in ECMO 801
 Types of Patient Selected for Application of ECMO 803
 Contraindications 803
 Maintenance 803
 Complications 803

27. Pulmonary Artery (Swan-Ganz) Catheterization for Hemodynamic Monitoring in Emergency Department 807

Pulmonary Artery Catheterization 807
 Technical Developments 810

28. Direct Current Cardioversion (DC Shock) in Emergency Care 813

Defibrillation 813
 More on Defibrillation or Cardioversion 814

29. Artificial Cardiac Pacemaker Therapy 818

History in Pacemaker Implantation 818
 Basic Pacemaker Components 819
 Understanding Pacemaker Functions 822
 Advanced Pacemaker Functions 825
 Pacemaker Coding 827
 Types of Antibradycardia Pacemakers 829
 Single Chamber Atrial Demand Pacemakers 831
 Single Chamber Ventricular Demand Pacemakers 832
 Dual Chamber Pacemakers 833
 Atrial Sensing Ventricular Pacemakers 835
 Medical Indications of Antibradycardia Pacing 836
 Symptomatic Bradycardia 836
 Atrial Fibrillation with a Slow Ventricular Response 840
 Hypersensitive Carotid Sinus Syndrome 841
 Drug-induced Conduction Abnormalities 842
 Remaining ACC/AHA Recommendations 843
 Diagnosis and Evaluation for Antibradycardia Pacemaker Implantation 843
 Patient History 844
 Diagnostic Tests 844
 Selecting Pacemaker Device Type 848
 Preprocedure Care in Pacemaker Implantation 849
 Pacemaker Implantation Procedure Overview 849
 Immediate Postprocedure Care 852
 Monitoring Pacemaker Function 853
 Assessment of Pacemaker Performance 853
 Assessment of Patient Response to Antibradycardia Pacing 853
 Discharge Education 854
 Incision Care and Temporary Restrictions 854
 Basic Safety Measures 854

Notifying the Physician	855
Safety Measures: Electrical Equipment and Devices	856
Medical and Dental Procedures	857
Follow-up Care after Antibradycardia Pacemaker Implantation	858
Initial Follow-up	858
Long-term Follow-up	862
Transtelephone Monitoring	865
Troubleshooting Antibradycardia Pacemaker Function	867
End of Battery Life	867
Failure to Capture	870
Failure to Pace	871
Failure to Sense	871
Biventricular Pacing	872
Biventricular Pacing Systems	873
Biventricular Pacing Functions	874
Atrial-synchronized Biventricular Pacing Patterns	875
Criteria for Biventricular Pacemaker Implantation	875
Clinical Care of the Person Undergoing Biventricular Pacemaker Implantation	875
Long-term Follow-up	879
Emerging Trends in Pacemaker Therapy	881

30. Ventricular Assist Devices

890

Clinical Assessment of Advanced Heart Failure	890
Different Types of VADs Used	891
Bridge to Transplant or Destination Therapy	891
Clinical Indications in VADs Implantation	893
Preoperative Evaluation of Patient	893
Recovery from Surgery, Preparing for Hospital Discharge, and Return Home	893
Postoperative Patient Care after VAD Implantation	894
Radiographic/MRI/CT Imaging in Follow-up of VAD Patients	894
Medical Care on a VAD	895
Complications of VADs	897
Quality of Life on a VAD	898
Focus of Current Research	898

31. Noninvasive Cardiac Imaging

900

Chest Radiography	900
Assessment of Location of Cardiac Silhouette and Structural Alterations in Cardiovascular System	901
Assessment of Extrathoracic, Intrathoracic and Intracardiac Medical Devices	910
Emergency Echocardiography (Transthoracic, Transesophageal, Doppler and Color-doppler Echocardiography)	925
Single-photon Emission Computed Tomography	935
Cardiac Magnetic Resonance Imaging	937
Multislice Cardiac Computed Tomography	940

32. Recognition and Management of Pericardial Diseases

946

Acute Pericarditis	947
Pericardial Effusion	953
Cardiac Tamponade	958
Pericardial Constriction	961

33. Radiation and Chemotherapeutic Agents Related Heart Diseases

969

Cardiovascular Toxicity of Chemotherapeutic Agents	969
Monitoring of Cardiotoxicity	970
Recommendations for Cardiotoxicity Monitoring and Management	971
Radiotherapy-related Heart Disease	972
Treatment of Radiotherapy-related Heart Complications	978

34. Recognition and Management of Cardiovascular Effects of Hypothermia	981
Physical Examination	981
Mild Hypothermia (32–35°C)	982
Moderate Hypothermia (28–32°C)	983
Severe Hypothermia (<28°C)	983
Management	984
Cold Injury (Freezing and Nonfreezing Damage) of Limbs	991
35. Neonatal Cardiac Emergencies	996
Heart Disease in Newborn Baby	997
Laboratory Investigations	1008
Heart Failure in the Newborn Infant	1008
Hypoplastic Left Heart Syndrome	1008
36. Fetal Cardiac Emergent Interventions (An Overview)	1028
Fetoscopic and Ultrasonographic Techniques in FCI	1029
Fetal Ultrasonography in Diagnosis and Management of Congenital Disorders	1029
Pharmacological FCI	1030
Fetal Tachyarrhythmias	1031
Fetal Bradycardia	1036
Fetal Hydrops Due to Other Cardiac Causes	1037
Fetal Aortic Valvuloplasty	1047
Fetal HLHS with Intact or Highly Restrictive Atrial Septum	1051
Right Sided Fetal Cardiac Lesions	1053
Fetal Complete Heart Block	1053
Fetal Pulmonary Atresia with Intact Ventricular Septum (PA/IVS)	1054
Future Directions	1062
37. Heart Transplantation in Adults	1065
First Heart Transplant in India	1065
The Heart Transplant Process	1066
What to Expect before a Heart Transplant?	1067
Contact with the Transplant Center During the Wait	1067
During a Heart Transplant	1067
After a Heart Transplant	1067
Managing Transplant Medicines and their Side Effects	1068
Risks of a Heart Transplant Surgery	1069
Heart Transplant Surgical Procedures	1070
The Heart Biopsy Regimen	1073
38. Toxicologic Cardiovascular Emergencies	1078
Digitalis Toxicity	1078
Calcium Channel Blocker	1084
Beta-blocker	1084
Tricyclic Antidepressant Overdose	1086
Cocaine Toxicity	1088
Alcohol Abuse	1095
Tobacco Abuse	1097
Yellow Oleander Poisoning	1098
39. Sudden Cardiac Death	1102
Pathophysiology	1102
Risk Factors of SCD	1103
Mortality/Morbidity	1104
Physical Examination	1105
Etiological Factors	1106
Diagnostic Considerations	1119
Laboratory Studies	1121

Medical Care 1126
 Surgical Care 1132
 Medication Summary 1134

40. Hematological Disorders Affecting Cardiovascular System 1144

Anemia as a Risk Factor for Cardiovascular Disease 1144
 Pathophysiology 1144
 Other Reasons why Anemia may be Associated with CVD Outcomes 1145
 Does the Cause of Anemia affect CVD Risk? A Potential Protective Effect of Iron Deficiency 1146
 Observational Studies and Interventional Trials Relating Anemia to CVD Outcomes 1146
 The Role of Anemia in the Progression of Congestive Heart Failure 1148
 Underlying Cause of Anemia in CHF 1149
 Guidance for Anemia in Heart Disease 1153
 Relationship between Blood Disorders and the Cardiovascular System 1154
 Cardiovascular Effect of Sickle Cell Disease with Chronic Hemolytic Anemia 1155
 Cardiovascular Effects in Thalassemias 1159
 Iron Cardiomyopathy 1160
 Prosthetic Heart Valves 1160
 Hematologic Disorders in Patients with Cyanotic Congenital Heart Disease 1162
 Coagulation Abnormalities and Cardiovascular Disease 1162
 Complications of Oral Anticoagulants in Cardiovascular Disease 1163

41. Cardiovascular Emergencies in Athletes 1172

What is Athletes Heart? 1173
 Definition of Athletic Heart Syndrome 1173
 Athletic Heart Historical Perspectives 1173
 What is Athletic Heart Syndrome? 1174
 Physiology of Athletic Heart Syndrome 1174
 Cardiac Enlargement: Pathology Versus Physiological Adaptation 1174
 The 'Athletic Heart Syndrome' a Critical Review 1175
 Diagnosis of Athletic Heart Syndrome 1175
 Is Athletic Heart Syndrome Dangerous? 1176
 How is Athletic Heart Syndrome Treated? 1176
 Management of Cardiovascular Emergencies 1206

42. Cardiac Abnormalities in Electrolyte Imbalance 1211

Potassium 1212
 Hypokalemia 1212
 Hyperkalemia 1213
 Calcium and Phosphorus 1214
 Magnesium 1217
 Sodium 1221

43. Scope of Telemedicine in Emergency Cardiology 1226

Indian Scenario of Telemedicine 1228
 Telemedicine and Heart Failure 1236
 Implantable Devices Monitoring with Telemedicine 1237
 Future Challenges and Opportunities 1238

44. Cardiovascular Emergencies in Air Travelling 1244

Precautions to be Observed by Travelers in Case of Cardiovascular Diseases 1245
 Patients with Implantable Pacemaker and Implantable Cardioverter/Defibrillator 1247
 DVT and Thromboembolism during Air Travel 1248
 Aspirin Therapy in the Prevention of Thromboembolism and Pulmonary Embolism 1250

Appendix: Newer Innovations in the Field of Cardiology 1253

Anti-aging Drug may be Just Five Years Away 1253
 Hypertension Guidelines 1253

Value of FFR in clinical practice	1254
Computed Fractional Flow Reserve Derived from Coronary CT Angiography	1255
Vitamin D and Cardiovascular Disease	1255
The ECG of the Future	1256
New Android ECG System to Patients, Athletes Keep a Close Eye on Heart	1257
SEEQ Mobile Cardiac Telemetry System	1257
Monitoring Your Health with Your Mobile Phone ECG	1257
Cardiodefender Smartphone-based ECG, a 21st Century Holter Monitor	1258
Pen on the Pulse: A Better way to Measure Blood Pressure	1258
Wrist Reducing High Blood Pressure Vessel Cleaning Machine	1259
Next Generation of Vital and Blood Pressure Measurement	1260
Noninvasive Glucometer from OrSense Approved in Europe	1261
24 hours SpO ₂ Ambulatory Blood Pressure Monitoring Color LCD SpO ₂ ABPM BP Monitor	1261
2014 New Wireless/Wifi Treadmill Stress Test System for Cardiac Stress Exercise in GYM/home with CE and ISO	1262
Clinical Application of Central Blood Pressure	1262
A Pocket-sized Echocardiography Machine	1264
Electronic Stethoscopes: What is New for Auscultation?	1264
Cardionics Amplified for the Hard of Hearing and Hearing Impaired Electronic Stethoscope for Physician	1266
Contemporary Reviews in Interventional Cardiology	1267
Summary of Stent Technology	1269
Transcatheter Aortic Valve Replacement or TVI	1269
Watchman and Lariat Procedures in Prevention of Atrial Fibrillation Stroke	1272
Cheap Blood Pressure Verapamil may Reverse Diabetes-related Death of Pancreatic Beta Cells, Cures Diabetes in Mice, Human Trials Announced	1273
Delhi Based Duo Build World's Cheapest and Smallest Ventilator that Fits in Pocket	1274
Current Innovations in Pacemaker Therapy	1275
Advances in Implantable Cardioverter Defibrillator Technology	1279
Subcutaneous ICD Technology	1280
Bio-hybrid Kidney Powered by Heart in the Offing	1281
Soon Vaccine to Lower Cholesterol	1282
Injectable Alternatives to Statins	1283
Vaccination Against Angiotensins for the Treatment of Hypertension	1284
Circadian Rhythm in Cardiovascular Disease	1284
Nobel Prize in Medicine is Awarded to Three Americans for Work on Circadian Rhythm	1285
Endovascular Repair of Complex Aortic Aneurysms	1285
Scientists Created a Pig-human Hybrid Embryo for Human Organ Transplantation	1286
Transplant Breakthrough as Scientists Implant Human Stem Cells into Pigs Genetically Modified to Accept Them	1287
Heart Cells Transformed Into 'Biological Pacemaker'	1288
IIT Guwahati Team Develops Silk Patch to Repair Damaged Heart Tissue	1293
Noninvasive Cardiac Radiation for Ablation of Ventricular Tachycardia	1293
Telomeres and Telomerase in Cardiovascular Diseases	1293
BCG Vaccine in Type I Diabetes Mellitus	1293
