## Part 1: TESTS ON SOIL SUBGRADE

---

|                                                                            |    |
|----------------------------------------------------------------------------|----|
| 1. Grain Size Analysis                                                     | 3  |
| 2. Liquid Limit and Plastic Limit                                          | 7  |
| 3. Shrinkage Factors of Soil                                               | 12 |
| 4. <i>In Situ</i> Density (Core Cutter Method and Sand Replacement Method) | 16 |
| 5. Compaction Test                                                         | 22 |
| 6. Laboratory California Bearing Ratio (CBR) Test                          | 26 |
| 7. Triaxial Test                                                           | 31 |
| 8. Plate Load Test                                                         | 38 |
| 9. North Dakota Cone Test                                                  | 42 |

## Part 2: SOIL CLASSIFICATION

---

|                                         |    |
|-----------------------------------------|----|
| 10. Indian Standard Soil Classification | 47 |
|-----------------------------------------|----|

## Part 3: TESTS ON AGGREGATE

---

|                                                 |    |
|-------------------------------------------------|----|
| 11. Aggregate Crushing Value Test               | 55 |
| 12. Impact Value of Aggregate                   | 59 |
| 13. Los Angeles Abrasion Values                 | 62 |
| 14. Deval Abrasion Test                         | 65 |
| 15. Specific Gravity and Water Absorption Tests | 68 |
| 16. Soundness Test                              | 72 |
| 17. Shape Test                                  | 76 |
| 18. Stripping Value of Road Aggregate           | 83 |

## Part 4: TESTS ON BITUMINOUS MATERIALS

---

|                                                                                 |     |
|---------------------------------------------------------------------------------|-----|
| 19. Softening Point of Bituminous Material                                      | 87  |
| 20. Ductility Test                                                              | 90  |
| 21. Penetration Test                                                            | 93  |
| 22. Specific Gravity Test for Bitumen                                           | 96  |
| 23. Viscosity Test                                                              | 98  |
| 24. Flash Point and Fire Point Test                                             | 101 |
| 25. Solubility of Bituminous Material in Carbon Disulphide or Trichloroethylene | 103 |
| 26. Loss in Heating                                                             | 105 |
| 27. Fraass Breaking Point Test                                                  | 107 |
| 28. Separation Test for Modified Bitumen                                        | 109 |

|                             |     |
|-----------------------------|-----|
| 29. Elastic Recovery Test   | 111 |
| 30. Marshall Stability Test | 113 |

## Part 5: FIELD TESTS

|                                                             |     |
|-------------------------------------------------------------|-----|
| 31. Test on Bitumen Emulsion and Cutback Bitumen            | 119 |
| 32. Tests on Polymer and Rubber Modified Bituminous Binders | 122 |
| 33. Water Sensitivity Test on Compacted Bituminous Mixes    | 125 |
| 34. Benkelman Beam Deflection                               | 128 |
| 35. Hveem Stabilometer Test                                 | 131 |
| 36. Skid Resistance Test                                    | 133 |
| 37. Dynamic Cone Penetrometer Test                          | 135 |
| 38. Tests on Bituminous Pavement Layer                      | 137 |
| 39. Unevenness Measurements by Bump Integrator and MERLIN   | 140 |

## APPENDICES

|                                                                                          |     |
|------------------------------------------------------------------------------------------|-----|
| <i>Appendix I: Important Value of Aggregates</i>                                         | 145 |
| <i>Appendix II: Properties of Bitumen and Tar</i>                                        | 147 |
| <i>Appendix III: Marshall's Mix Properties, Skid Resistance Value and Polished Value</i> | 148 |
| <i>Appendix IV: Requirements of Bitumen Emulsion and Cutback Bitumen</i>                 | 149 |
| <i>Bibliography</i>                                                                      | 153 |
| <i>Index</i>                                                                             | 155 |
