Foreword to the Second Edition

Foreword to the First Edition

Preface to the Second Edition

Preface to the First Edition

vi	Meatal Foramen and Labyrinthine Segment	11
vii	Horizontal Segment of Facial Canal	12
viii	Vertical Segment of Facial Canal and Stylomastoid Foramen	13
ix	Bony Labyrinth, Semicircular Canals and Cochlea	13
	Open Cavity (Canal Wall Down) Mastoidectomy	14

Chapter 0

ENDOSCOPIC EAR SURGERY

i

History of Endoscopic Ear Surgery (EES)	i
Endoscopic Myringoplasty	vii
Endoscopic Stapedotomy	xiii

Chapter 1

PRE-REQUISITES FOR LEARNING MICROSURGERY OF THE EAR

1

Important Microsurgical Skills	1
Role of Temporal Bone Dissection and Knowledge of Temporal Bone Anatomy	1
Importance of Good Exposure	1
Hemostasis during Surgery	2
Role of Systematic Training and Standardization of Surgical Steps	2

Chapter 2

SURGICAL ANATOMY OF TEMPORAL BONE

3

Surface Landmarks of Temporal Bone	3
Cortical Mastoidectomy	4
Pneumatization Patterns in Mastoid Air Cells	5
Middle Ear Anatomy	5
Epitympanum	5
Mesotympanum	6
Protympanum	6
Posterior Tympanum	6
Hypotympanum	7
Middle Ear Ossicles, Ligaments and Mucosal Folds	8
Posterior Tympanotomy/ Facial Recess Approach	10
Facial Nerve Anatomy from Stylomastoid Foramen to Meatal Foramen	10

Chapter 3

INSTRUMENTS

16

Instruments for Tympanomastoid Surgery	16
Additional Instruments for Stapes Surgery	19
Materials	19

Chapter 4

PREOPERATIVE EVALUATION MEDICATIONS AND PREPARATION

20

Preoperative Evaluation	20
Preoperative Medications for Local Anaesthesia	20
Preoperative Preparation	21

Chapter 5

ANESTHESIA FOR CHRONIC OTITIS MEDIA SURGERY

24

Local Anesthesia for Chronic Otitis Media Surgery	24
Anesthesia of Middle Ear Mucosa	24
Preparation of Anesthetic Solution	24
External Auditory Canal Anesthesia	24
Post-aural Anesthesia	26
Advantages of Local Anesthesia	27

Chapter 6

SURGICAL PROCEDURES PERFORMED FOR OTITIS MEDIA AND ITS SEQUELAE

28

Procedures Performed for Dry Ears	28
Transcanal Myringoplasty	28
Post-aural Myringoplasty	28

Tympanoplasty (Myringoplasty with Ossiculoplasty) without Mastoidectomy	28
Procedures Performed for Discharging Ears	28
Tympanoplasty with Cortical Mastoidectomy	28
Tympanoplasty with Modified Intact Canal Wall (Closed Cavity) Mastoidectomy	28
Tympanoplasty with Canal Wall Down (Open Cavity) Mastoidectomy	29
Radical Mastoidectomy with Temporalis Fascia Grafting	29
Radical Mastoidectomy without Temporalis Fascia Grafting	29
Subtotal Petrosectomy with Total Obliteration of Cavity by Blind Sac Closure of External Auditory Meatus	29

Chapter 7

MYRINGOPLASTY 30

Surgical Approaches	30
Transcanal Myringoplasty	30
Surgical Technique	31
Harvesting of Temporalis Fascia	31
Transcanal Exposure	32
Freshening the Margins of Perforation	32
Canal Incisions and Elevation of Tympanomeatal Flap	32
Assessment of Ossicular Chain	35
Preparation of Graft Bed and Graft Placement	35
Closure	35
Post-aural Myringoplasty	37
Indications	37
Surgical Technique	37
Canal Incisions and Elevation of Posterior Meatal Skin Flap	38
Post-auricular Incision	40
Advantages of Post-aural Approach	41
Harvesting of Temporalis Fascia	41
Subcutaneous Tissue Incisions and Exposure of Middle Ear	43
Superior and Inferior Tympanomeatal Incisions	45
Scraping of Undersurface of Tympanic Membrane and Freshening the Margins of Perforation	46
Anterior Window	48
Elevation of Anteriorly based Tympanomeatal Flap	49
Posterior Part of Tympanomeatal Flap	49

Inferior Part of Tympanomeatal Flap	49
Superior Part of Tympanomeatal Flap	51
Skeletonizing of Malleus Handle	51
Assessment of Ossicular Chain	53
Preparation of Graft Bed	56
Underlay Temporalis Fascia Grafting with Exteriorization of Malleus Handle	57
Graft Placement	57
Repositioning of Posterior Meatal Skin Flap	62
Closure of Wound	63
Special Conditions in Myringoplasty	64
Canalplasty	64
Surgical Technique	64
Division of Tympanomeatal Flap	69
Medialized Malleus Handle with Umbo Touching the Promontory	69
Lateralization of Neotympanic Membrane and Anterior Canal Blunting	70

Chapter 8

TYMPANOPLASTY WITH/WITHOUT CORTICAL MASTOIDECTOMY 73

Tympanoplasty (Myringoplasty with Ossiculoplasty) without Mastoidectomy	73
Tympanoplasty with Cortical Mastoidectomy	73
Surgical Technique	74
Exposure of Mastoid Cortex	75
Simple/Cortical Mastoidectomy	77
Clearance of Middle Ear Hypertrophied Polypoidal Mucosa, Assessment of Ossicular Chain and Establishment of Air Pathways	84
Assessment of Air Pathways	86
Antro Meatal Fistula	89

Chapter 9

OSSICULOPLASTY 92

Principles of Hearing Reconstruction	92
Austin's Classification	92
Requirements for Primary Ossiculoplasty	93
Short Columella Ossiculoplasty or Myringostapediopexy	93
Surgical Steps	94
Shaping of the Incus Graft	95
Shaping of the Cartilage Graft	98
Placement of Ossicle Graft	98

Long Columella Ossiculoplasty or Myringoplastinopexy	100
Surgical Steps	101
Shaping of the Malleus Graft	101
Shaping of the Cartilage Graft	103
Placement of Ossicle Graft	103
Special Situations	106
Second Stage Ossiculoplasty/ Revision Ossiculoplasty	107
Indications for Planned Second Stage Ossiculoplasty	107
Causes for Persistent/Recurrent Hearing Loss	107
Surgical Technique for Second Stage/Revision Ossiculoplasty	108
Second Stage Ossiculoplasty	108
Revision Ossiculoplasty	109
Guidelines and Precautions for Successful Ossiculoplasty	110
Summary	111

Chapter 10

TYMPANOPLASTY WITH MODIFIED INTACT CANAL WALL (CLOSED CAVITY) MASTOIDECTOMY 112

Introduction	112
Indications for Tympanoplasty with Modified Intact Canal (Closed Cavity) Mastoidectomy	112
Surgical Technique	113
Canal Incisions and Elevation of Posterior Meatal Skin Flap	114
Post-auricular Incision and Harvesting of Temporalis Fascia	115
Subcutaneous Soft Tissue Incision and Exposure of Mastoid Cortex and Ear Canal	115
Exposure of the Mastoid Antrum	116
Development of Superior and Inferior Tympanomeatal Flaps	117
Canalplasty	117
Transcanal Exposure of Posterior Tympanum	118
Transcanal Atticotomy	119
Complete Removal of Cholesteatoma from Antrum, Attic and Middle Ear	120
Temporalis Fascia Grafting with Ossiculoplasty	129
Lateral Attic and Posterior Bony Wall Reconstruction	129
Repositioning of Posterior Meatal Skin Flap and Closure of Wound	134

Chapter 11

TYMPANOPLASTY WITH CANAL WALL DOWN (OPEN CAVITY) MASTOIDECTOMY 137

Circumferential Saucerization	138
Development of Superior and Inferior Tympanomeatal Flaps	141
Removal of Bony Canal Walls	142
Removal of Bridge	143
Complete Lowering of the Facial Ridge	143
Removal of Posterior Buttress	145
Total Disease Clearance and Smoothing of Mastoid Cavity	145
Mastoid Disease Clearance	145
Attic Disease Clearance	146
Disease Clearance Over Lateral Semicircular Canal	149
Removal of Anterior Buttress	149
Middle Ear Disease Clearance	150
Dissection Around Oval Window	150
Smooth Mastoid Cavity	152
Middle Ear Space Augmentation	153
Tympanoplasty	154
Free Skin Graft	158
Cavity Obliteration	159
Obliteration of Supralabyrinthine and Retrolabyrinthine Recess	160
Obliteration of Tip Recess	160
Obliteration of Deep Sinodural Angle	160
Meatoplasty	163
Closure of Wound	167
Varied Disease Conditions Observed in Open Cavity Mastoidectomy	168
Summary	168

Chapter 12

RADICAL MASTOIDECTOMY WITH/WITHOUT TEMPORALIS FASCIA GRAFTING 175

Radical Mastoidectomy with Temporalis Fascia Grafting	175
Radical Mastoidectomy without Temporalis Fascia Grafting	176

Chapter 13

MANAGEMENT OF MASTOID CAVITY PROBLEMS 177

Anaesthesia	178
Canal Incisions and Elevation of Posterior Meatal Skin Flap	179

Post-aural Incision and Harvesting of Temporalis Fascia	179
Circumferential Saucerization	181
Development and Elevation of Superior and Inferior Tympanomeatal Flaps	181
Removal of Remnant Posterior Canal Wall, Facial Ridge, Remnant Anterior and Posterior Buttress	183
Middle Ear Space Augmentation	183
Underlay Temporalis Fascia Grafting Ossiculoplasty and Free Skin Graft	183
Cavity Obliteration, Meatoplasty and Closure of Wound	184
Intact Bridge Mastoidectomy with Tympanoplasty	186

Chapter 14

SUBTOTAL PETROSECTOMY WITH BLIND SAC CLOSURE OF THE EXTERNAL AUDITORY CANAL 189

Indications in Chronic Otitis Media	189
Post-aural Incision	189
Subcutaneous Incisions, Elevation of Palva's Flap and Exposure of Mastoid Cortex and Middle Ear	189
Blind Sac Closure of the External Auditory Canal	189
Complete Resection of Canal Skin with Tympanic Membrane	190
Canal Wall Down Mastoidectomy and Management of Pathology	191
Harvesting of Fat from Abdominal Wall	191
Cavity Obliteration with Fat and Surrounding Soft Tissue and Closure of Wound	191

Chapter 15

IATROGENIC COMPLICATIONS OF CSOM SURGERY 193

Iatrogenic Facial Nerve Palsy	193
Bleeding	197
Lateral Sinus Injury	198
Labyrinthine Injury	198
Stapes Footplate Fracture/Subluxation	199
Posterior Canal Defects	199
Tegmen Plate Injury with CSF Leak/Brain Herniation	199
Infection	202

Chapter 16

MANAGEMENT OF COMPLICATIONS OF CSOM 207

Intratemporal Complications of CSOM	207
Intracranial Complications of CSOM	207
Management of Intratemporal Complications of CSOM	207
Facial Nerve Paresis/Palsy	207
Labyrinthine and Cochlear Fistula	207
Management of Intracranial Complications of CSOM	211
Lateral Sinus Thrombophlebitis	211
Meningitis/Extradural Abscess	211
Cerebral/Cerebellar Abscess	213
Brain Herniation into the External Auditory Canal and Middle Ear	213

Chapter 17

SPECIAL CONDITIONS AND SITUATIONS 217

Tympanosclerosis	217
Myringosclerosis	217
Tympanosclerosis	219
Middle Ear Atelectasis	224
Non-adhesive Type of Atelectasis	224
Adhesive Type of Atelectasis	229
Dry Ear Type	229
Discharge (Wet Ear) Type	229
Tuberculous Otitis Media	231
Cholesterol Granuloma	232
Congenital Cholesteatoma	233

Chapter 18

MALIGNANT OTITIS EXTERNA WITH SKULL BASE INFECTION 235

Introduction	235
Mode of Spread	235
Clinical Presentation	236
Medical Management	237
Surgical Management	237
Localized Disease in the External Auditory Canal	237
Extensive Granulation in the Tympanomastoid and Skull Base	237
Surgical Technique	237
Involvement of Stylomastoid Foramen and Adjacent Structures	237
Involvement of Infralabyrinthine cells and Jugular Foramen	239

Involvement of Attic and Peritubal Region 240
 Involvement of Anterior Tympanum, Anterior
 Attic and Adjacent Structures 243
 Conclusion 244

Chapter 19

SURGERY FOR OTOSCLEROSIS

247

Indications of Stapes Surgery 247
 Contraindications of Stapes Surgery 247
 Preoperative Medications for Stapes Surgery 247
 Surgical Technique 248
 Steps 248
 Rosen's Incision 248
 Elevation of Tympanomeatal Flap 248
 Mobilizing the Chorda Tympani 252
 Removal of Bony Overhang 253
 Making a Control Fenestra 256
 Cutting of Stapedius Tendon 257
 Disarticulation of Incudostapedial Joint 257
 Removal of Stapes Suprastructure 258
 Widening of Fenestra and Removal of
 Posterior Third of Footplate 259
 Estimation of Length and Width of Piston 260
 Insertion of Piston 261
 Harvesting of Tissue and Tissue Seal of the
 Fenestra 264
 Replacement of Tympanomeatal Flap 266
 Evaluation of Intraoperative Hearing 266
 Closure of Wound 266
 Difficult Situations and Problems during
 Stapes Surgery 267
 Very Narrow Canal 267
 Tympanic Membrane Perforation 267
 Atrophic Tympanic Membrane 269

Incus Necrosis 269
 Incus Dislocation 271
 Malleus/Incus Fixation 274
 Too Short Incus Long Process 274
 Obliterative Otosclerosis 275
 Overhanging/Dehiscent Facial Nerve 277
 Narrow Oval Window Niche 277
 Fractured/Floating Footplate 279
 Perilymph Gusher 280
 Persistent Stapedial Artery 282
 Revision Stapes Surgery 282
 Common Findings Observed during
 Revision Stapes Surgery 283
 Prosthesis Related 283
 Ossicular Chain Related 285
 Oval Window Related 285

Chapter 20

POSTOPERATIVE CARE, FOLLOW-UP AND DOCUMENTATION

288

Postoperative Care 288
 Closed Cavity Procedure 288
 Open Cavity Procedure 288
 Stapes Surgery 289
 Postoperative Instructions 289
 Chronic Otitis Media 289
 Stapes Surgery 290
 Follow Up 290
 Documentation 305
