Preface

v

1. Importance of Heart Rate in Health and Disease 1

Dr. BK Mahala

- Heart Rate and its Epidemiology 1
- Regulation of HR and Significance of I_f Channel 3
- Factors Affecting HR and HRV 9
- Genetic Influences on HR and Longevity 16
- High RHR and its Association with Adverse Clinical and CV Outcomes 19

2. Heart Rate—a Risk Marker or a Risk Factor 29

Dr. CK Ponde

- Resting Heart Rate (RHR) for Cardiovascular (CV) Risk Evaluation 29
- High RHR and its Association with CV Risk Factors 35
- High HR and its Impact on Established CVD 40
- Evaluation of RHR as a CV Risk Factor 43

3. Heart Rate and Hypertension 50

Prof. (Dr.) JC Mohan

- Hypertension (HTN) and its Epidemiology 50
- Heart Rate and its Relationship with BP 53
- High RHR and its Significance in HTN 56
- Management of High RHR in Patients with HTN 64

4. Heart Rate and Coronary Artery Disease (CAD) 77

Prof. (Dr.) Monotosh Panja, Dr A Sreenivas Kumar

- Epidemiology of CVD 77
- Clinical Implications of Coronary Artery Disease (CAD) and Angina 79
- High Resting Heart Rate and its Impact on CAD and Angina 82
- Management of High RHR—Angina Perspective 87
- Spectrum of Clinical Evidence with Ivabradine in CAD and Angina* 96
- Take Home Summary 103

5. Heart Rate and Heart Failure 108

Dr. I Sathyamurthy, Dr. Rajeev Agrawala

- Epidemiology of Heart Failure 108
- Heart Failure (HF) Types and Clinical Course 113
- High RHR and its Impact on HFrEF 118
- Management of High RHR—HFrEF Perspective 122
- Take Home Summary 137

6. Heart Rate and other Clinical Scenarios**143***Dr. Brian Pinto*

Heart Rate (HR) in other Cardiovascular (CV) and Non-CV Scenarios 143

HR Modulation in CVD Beyond CAD and HF with Reduced Ejection Fraction (HFrEF) 145

HR Modulation in Non-CV Conditions 161

Take Home Summary 168
