<i>Foreword by Pradeep Seth</i>	v
<i>Preface to the Second Edition</i>	vii
<i>Preface to the First Edition</i>	viii
<i>Abbreviations</i>	ix
1. Historical Development of Immunology	1
2. Host Parasite Relationship	10
3. Immunity	22
4. Antigens, Antigenicity, Immunogen	30
5. Adjuvants and Delivery System	40
6. Antibody (Immunoglobulin)	46
7. Theory of Antibody Formation	63
8. Complement System	67
9. Immune System	79
10. Cytokines	115
11. The Cellular basis of Immune Response	127
12. Mucosal Immunity	143
13. Hypersensitivity	150
14. Major Histocompatibility Complex	163
15. Transplantation Immunology	174
16. Diversity of Immunoglobulin	181
17. Tolerance and Autoimmune Diseases	189
18. Tumor Immunology	196
19. Hybridoma and Monoclonal Antibody	204
20. Polymerase Chain Reaction (PCR)	217
21. Vaccine and Antiserum	225
22. Immunity to Microbial Infection	237
23. Effector Immune Mechanism	258
24. Immunodiagnostic Tools	266
<i>Bibliography</i>	279
<i>Selected Readings</i>	308
<i>Index</i>	309
