Foreword

Preface to the Ninth Edition

Preface to the First Edition

vii

ix

xi

1. Introduction to Care of Newborn Babies

1

- Evolution of neonatology 1
- The art of neonatology 2
- Maternal health and newborn survival 2
- Global neonatal health 3
- Myths and misconceptions regarding newborn care 3
- Essential newborn care 4
- Neonatal morbidity 4
- The levels of newborn care 6
- Improving the quality of maternal and newborn care 6
- Nomenclature and definitions 8
- Clinicopathological classification of perinatal deaths 12
- Neonatal autopsy 12
- Primary causes of neonatal deaths 15

2. Organization of a Neonatal Intensive Care Unit

18

- Physical facilities 19
- Personnel 23
- Equipment 24
- Cot-side laboratory facilities 41
- Transport of sick neonates 42
- Procedure manual for the NICU 47
- Cooperation between obstetricians and neonatologists 47

3. Preventive Neonatology

50

- Prenatal care 50
- Care of the mother during pregnancy 51
- High-risk pregnancies 52
- Fetal monitoring 53
- Identification of genetic and developmental anomalies 56

- Assessment of fetal wellbeing 60
- Fetal diagnosis and therapy 65
- Common causes of perinatal deaths 67
- Reduction of perinatal mortality 68
- Reduction of LBW babies 68
- Prevention of neonatal infections 69
- Universal precautions for HIV 75
- Prevention of congenital malformations 77
- Prevention of rhesus alloimmunization 77

4. Maternal Disorders and Fetal Outcome

79

- Disorders peculiar to pregnancy 79
- Nutritional status of the mother 82
- Chronic systemic disorders 83
- Maternal infections 84
- Endocrinal disorders 85
- Miscellaneous disorders 88

5. Perinatal Pharmacology

91

- Maternal medications and fetal or neonatal hazards 91
- Medications to the lactating mother and neonatal hazards 99
- Medications to the baby 101

6. Care of the Baby in the Labor Room

111

- The 'first' breath 111
- Physiological basis of resuscitation 112
- Fetal hypoxia 113
- Pathophysiology of asphyxia 114
- What is birth asphyxia? 115
- Evaluation of the infant at birth 115
- Basic care of a normal baby at birth 118
- Resuscitation of an asphyxiated baby 120
- Resuscitation of preterm babies 124
- Post-resuscitation care of an asphyxiated baby 125

Systemic manifestations of severe birth asphyxia 126
 Hypoxic-ischemic encephalopathy 126
 Brain-oriented resuscitation 130
 Whole body cooling 132
 Home delivery 135
 Routine care of the baby in the labor room 136
 Examination of the placenta 137
 Umbilical cord blood banking 138

7. Examination of the Baby 142

Maternal and perinatal history 142
 Examination at birth 144
 Screening for congenital malformations 144
 First-day examination 145
 Daily “clinical screening” of the baby 148
 Examination and screening at discharge 148
 Assessment of gestational age 149
 Evaluation of a sick baby 155

8. Care of the Normal Newborns 160

Basic care of normal newborn babies 160
 Mother’s role in the care of her baby 160
 Breastfeeding 160
 Body massage 162
 Skin care and baby bath 163
 Immunizations 165
 Common neonatal problems 168
 Common developmental peculiarities 172
 First ambulatory visit 175

9. Traditional and Cultural Practices for the Care of Newborn Babies 176

Importance of traditional health care practices 176
 Types of traditional health care practices 177

10. Essential Perinatal and Neonatal Care in the Community 180

Demographic profile 180
 The current perinatal scene 180
 Infrastructure for MCH services 181
 Essential perinatal/neonatal care 183
 Home care of low birth weight babies 186
 Neonatal morbidity and mortality 187
 The role of National Neonatology Forum 188
 Innovative strategies for newborn care in India 189

Home care of newborn babies 190
 Research issues and priorities 190
 National maternal and child health programs 190
 Integrated management of neonatal and childhood illnesses 193
 Innovative training programs 197
 Strategies to improve newborn health and survival 197

11. Humanized Care and Rhythmic Stimulation of Newborn Babies 200

The virtues of the womb 200
 Technology-oriented newborn care 200
 Principles of humanized care 201
 Baby-friendly ambience in the NICU 201
 Gentle rhythmic stimulation 203

12. Ethical, Social and Legal Issues in Perinatal Medicine 207

Principles governing ethical decisions 207
 Is it justified to establish neonatal intensive care facilities in a developing country? 209
 Withholding and withdrawal of life support 209
 Communication as the key to enhance doctor–patient relationship 210
 Ethical dilemmas 211
 Ethics of organ transplantation 212
 Handling end-of-life situations and neonatal deaths 212
 Violence against health care professionals 213

13. Fluids, Electrolytes and Acid–Base Disorders 216

Fluids and electrolytes balance 216
 Physiological requirements of fluids and electrolytes 217
 Assessment of fluids and electrolytes status 219
 Common fluids and electrolytes disturbances 220
 Acid–base disorders 222

14. Temperature Regulation 225

Response to cold 225
 Thermoneutral environment 226
 Hypothermia 227
 How to keep the babies warm? 227
 Kangaroo-mother care 231

Prevention of hypothermia 232
 Neonatal cold injury 233
 Hyperthermia 233

15. Feeding and Nutrition

Feeding of normal babies 235
 Breastfeeding 235
 Virtues of breast milk 235
 Composition of human milk 237
 Baby-Friendly Hospital Initiative 244
 Adequacy of lactation 247
 Common feeding problems 247
 FAQs regarding breastfeeding 248
 Bottle feeding 253
 Feeding with a cup and spoon or *paladay* 255
 Feeding of preterm and low birth weight babies 256
 Human milk banking 262
 Technique of gavage feeding 265
 Nasojejunal feeding 266
 Criteria for adequacy of feeding 267
 Parenteral nutrition 268

16. Perinatal Infections

Intrauterine infections 275
 SARS-COV-2 or COVID-19 282
 Congenital malaria 283
 Congenital tuberculosis 283
 Perinatal HIV infection 283
 Congenital syphilis 287
 Chlamydial infections 288
 Bacterial infections 289
 Defense mechanisms of the fetus and newborn 289
 Superficial bacterial infections 292
 Neonatal septicemia 293
 The sepsis screen 298
 Systemic candidiasis 302
 Tetanus neonatorum 303

17. Disorders of Weight and Gestation 307

Low birth weight babies 307
 Preterm babies 307
 Small-for-dates babies 318
 Fetal growth 318
 Common determinants of intrauterine growth retardation 320

Therapeutic interventions 323
 Large-for-dates babies 326
 Post-term babies 328

18. Jaundice

Bilirubin turnover 330
 Assessment of severity of jaundice 331
 Causes of jaundice 332
 Physiological jaundice 332
 Pathological jaundice 323
 Hemolytic disease of the newborn (HDN) 334
 Breast milk jaundice 337
 Dangers of hyperbilirubinemia 338
 Pathogenesis bilirubin-induced brain damage 340
 Management of hyperbilirubinemia 342
 Measures to reduce serum bilirubin 345
 Phototherapy 345
 Exchange blood transfusion 349
 Persistent neonatal jaundice 350
 Cholestatic disorders 350
 Acute liver failure 354

19. Respiratory Disorders 358

Pulmonary physiology 358
 Blood gases 358
 Lung surfactant 360
 Respiratory distress in newborn babies 360
 Respiratory system disorders 361
 Meconium aspiration syndrome 361
 Intrauterine and postnatal pneumonia 364
 Early-onset Group-B streptococcal infection 366
 Hyaline membrane disease 367
 Massive pulmonary hemorrhage 373
 Pneumothorax 373
 Transient tachypnea of the newborn 373
 Bronchopulmonary dysplasia 374
 Pleural effusion 376
 Differential diagnosis of RDS 377
 Recurrent apnea 378
 Stridor 382

20. Cardiovascular Disorders 386

Fetal and neonatal circulation 386
 Persistent pulmonary hypertension 387
 Patent ductus arteriosus 390

Congenital complete heart block 392
 Supraventricular tachycardia 393
 Congenital cardiac malformations 393
 Evaluation of the neonate with suspected congenital heart disease 396
 Cardiac failure 399
 Cardiac surgery and percutaneous transcatheter cardiac interventions 405
 Shock 406
 Hypertension 410

21. Renal Disorders 412

Physiological considerations 412
 Laboratory evaluation 413
 Prenatal ultrasound 415
 Common renal disorders 415
 Acute renal failure 416
 Renal malformations 420
 Congenital nephrotic syndrome 421
 Urinary tract infection 421
 Nephrocalcinosis 422
 Abdominal masses 422
 Renal masses 424
 Intraperitoneal masses 425
 Pelvic masses 425

22. Neurological Disorders 427

Neurological examination 427
 Primitive reflexes 429
 Clinical syndromes of neurological disorders 431
 Intracranial hemorrhage 432
 Intraventricular hemorrhage 433
 Neurological sequelae of hypoxic-ischemic encephalopathy 436
 Periventricular leukomalacia 438
 Birth trauma to CNS 439
 Peripheral nerve palsies 439
 CNS malformations 441
 Jitteriness 444
 Neonatal seizures 444
 Floppy neonate 451

23. Hematologic Problems 455

Bleeding disorders 455
 Hemorrhagic disease of the newborn 455
 Vitamin K prophylaxis 456
 Thrombocytopenia or qualitative defects of platelets 458

Disseminated intravascular coagulation 459
 Anemia 463
 Polycythemia and hyperviscosity 467
 Arterial and venous thromboses 468
 Transfusion of blood and blood components 469
 Exchange blood transfusion 471

24. Metabolic Disorders 475

Hypoglycemia 475
 Hyperglycemia 481
 Hypocalcemia 481
 Osteopenia of prematurity 485
 Hypercalcemia 487
 Hypomagnesemia 487
 Late metabolic acidosis 487
 Inborn errors of metabolism (IEM) 488
 Newborn screening program 498
 Neonatal thyroid screening 499

25. Surgical Conditions 502

Medical management of surgical neonates 502
 Optimal timing for surgery 504
 Gastrointestinal obstruction 505
 Esophageal atresia and tracheoesophageal fistula 505
 Anorectal anomalies 510
 Intestinal perforation 513
 Necrotizing enterocolitis 514
 Respiratory surgical emergencies 518
 Congenital diaphragmatic hernia 519
 Urological conditions 521
 Ambiguous external genitalia 521
 Nonretractable prepuce (phimosis) 524
 Cleft lip and cleft palate 525
 Exomphalos (omphalocele) 526
 Gastroschisis 526
 Myelomeningocele 526
 Talipes equinovarus (clubfoot) 527
 Calcaneovalgus deformity 528
 Genu recurvatum 528
 Congenital dislocation of hips 528

26. Miscellaneous Conditions 531

Birth injuries 531
 Cyanosis 533
 Indications for oxygen therapy 534

Retinopathy of prematurity	537	
Bronchopulmonary dysplasia	542	
Edema and hydrops fetalis	543	
Ascites	546	
Dermatological disorders	546	
Vesiculobullous skin eruptions	546	
Bacterial infections	547	
Congenital syphilis	548	
Developmental disorders	548	
Neonatal erythroderma	550	
Ichthyosis	551	
Vascular nevi	552	
Disorders of pigmentation	553	
Twins	555	
Iatrogenic disorders	557	
27. Assisted Ventilation and Advanced Life Support	561	
Bag and mask ventilation	561	
Tracheal intubation	563	
Chest compressions	564	
Continuous positive airway pressure (CPAP)	565	
Nasal intermittent positive pressure ventilation (NIPPV)	568	
Mechanical ventilation	569	
Indications for mechanical ventilation	570	
Physiologic basis of assisted ventilation	571	
Types and modes of mechanical ventilators	573	
Newer modalities of assisted ventilation	575	
Ventilator variables	579	
Establishment of assisted ventilation	581	
Ventilator settings in common disease states	583	
Ventilator emergencies	587	
Weaning from the ventilator	588	
Inhaled nitric oxide (iNO)	589	
Extracorporeal membrane oxygenation (ECMO)	590	
Supportive care during ventilation	591	
28. Follow-up Program for High-risk Newborns	596	
Indications for follow-up	596	
Counseling and documentation at discharge	597	
The follow-up schedule	597	
Physical growth	597	
Neuromotor development and cognition	598	
Vision	599	
Hearing	600	
Systemic disorders	601	
Early intervention program	601	
29. Procedures	604	
Maternal and fetal procedures	604	
Amniocentesis	604	
Chorionic villus sampling	605	
Cordocentesis	606	
Fetal skin and muscle biopsy	607	
Intrauterine transfusion	607	
Fetal scalp blood sampling	608	
Neonatal procedures	608	
Analgesia and sedation	609	
Collection of urine	610	
Collection of blood samples	611	
Intravenous infusion	613	
Intraosseous infusion	614	
Percutaneous central venous catheterization	615	
Umbilical vessel catheterization	616	
Peripheral arterial cannulation	619	
Exchange blood transfusion	619	
Peritoneal dialysis	621	
Neurological procedures	622	
Transillumination with cold light	624	
Pleural aspiration	624	
Pericardiocentesis	625	
Abdominal paracentesis	625	
Measurement of blood pressure	626	
Appendices	629	
Index	639
