

Contents

Preface

v

1. Basic Communication System	1
2. Analogue Systems: Amplifiers, Operational Amplifiers, Oscillators, Parametric Amplifiers, Power Amplifiers, Push-pull Amplifiers	44
3. Antenna Propagation and Radar	97
4. Audio Signal Processing, Bar Code and Data Matrix Technology and Codes and Coding Formats	190
Section A: Audio Signal Processing	190
Section B: Bar Code and Data Matrix Technology	194
Section C: Codes and Coding Formats	201
5. Computer in Communications	214
6. Digital Communication Systems	233
7. Error Control	282
8. Coding in Digital Communication Systems	295
9. Filters	325
10. Information Theory	351
11. Memories	363
12. Microwave Devices and Communication Technology	376
13. Modulation and Demodulation	416
14. Networks in Computing	447

15. Noise	470
16. Optical Communications, Devices and Systems	491
17. Wave Propagation and Satellite Communication System	541
18. Signals	582
19. Television (TV) Communications, Systems and Signals	596
20. Transmission Lines and Waveguides	629
Section A: Transmission Lines	629
Section B : Waveguides	660
21. Advanced Optical Communication Systems and Optical Networks: Wavelength Division Multiplexing (WDM) Technology	716
22. Cellular and Spread Spectrum Communications (Wireless Technologies)	765
<i>Appendix: Essential Mathematics</i>	804
<i>Index</i>	817
