| <i>Preface to the Second Edition</i> | <i>vii</i> |
| <i>Preface to the First Edition</i> | <i>ix</i> |
| <i>Syllabus</i> | <i>xvii</i> |
| 1. DESIGN OF CURVED BEAMS | 1 |
| 1.1 Introduction | 1 |
| 1.2 Difference between a Straight Beam and a Curved Beam | 1 |
| 1.3 Stresses in Curved Beams (Winkler-Bach Equation) | 2 |
| 1.4 Steps to Solve Curved Beam Problems | 6 |
| 1.5 Stresses in Closed Rings | 39 |
| 1.6 Chain Links | 47 |
| 1.7 Condition for Bending Stress at Extreme Fibers to be Numerically Equal | 75 |
| VTU Question Papers | 82 |
| 2. CYLINDER AND CYLINDER HEADS | 97 |
| 2.1 Thin Cylinders | 97 |
| 2.2 Thin Cylindrical Shells Subjected to Internal Pressure | 97 |
| 2.2.1 Circumferential/Tangential/Hoop Stress | 98 |
| 2.2.2 Longitudinal or Axial Stress | 99 |
| 2.2.3 Maximum Shear Stress | 100 |
| 2.3 Thick Cylinders | 100 |
| 2.4 Difference between Thick and Thin Cylinders | 101 |
| 2.5 Lamé's Theory | 101 |
| 2.6 Wall Thickness | 106 |
| 2.6.1 For Brittle Materials | 106 |
| 2.6.2 For Ductile Materials | 107 |
| 2.7 Birnie's Equation | 107 |
| 2.8 Clavarino's Equation | 108 |
| 2.9 Barlow's Equation | 108 |
| 2.10 Changes in Cylinder Diameter | 108 |
| 2.11 Autofrettage/Self-hooping | 108 |
| 2.12 Compound or Composite Cylinders | 117 |
| 2.12.1 Tangential Stresses | 119 |
| 2.12.2 Radial Stresses | 120 |
| 2.13 Total Allowance or Interference | 123 |
| 2.14 Forces and Torques in Interference Fits | 124 |
| 2.15 Stresses due to Forces and Shrink Fits | 124 |
| 2.16 Cylinder Heads (End Closures) | 152 |
| 2.16.1 Flat Heads | 152 |
| 2.16.2 Spherical Dished Covers | 153 |
| 2.16.3 Shells Subjected to Internal Pressure | 154 |
| 2.16.4 Thickness of Stayed and Braced Plates | 154 |
| 2.16.5 Unstayed Flat Heads | 154 |
| VTU Question Papers | 160 |
| 3. BELT, ROPE AND CHAIN DRIVES | 168 |
| 3.1 Introduction | 168 |
| 3.2 Selection of a Belt Drive | 168 |
| 3.3 Materials Used for Belts | 168 |
| 3.4 Flat Belt Drives | 169 |
| 3.5 Length of Open Belt Drive | 169 |
| 3.6 Length of Cross Belt Drive | 171 |
| 3.7 Center Distance | 172 |
| 3.8 Velocity Ratio of Belt Drive | 173 |
| 3.9 Ratio of Driving Tensions in Flat Belts | 174 |

| | |
|--|------------|
| 3.10 Centrifugal Tension | 176 |
| 3.11 Ratio of Driving Tensions in Flat Belts Considering Centrifugal Tension | 177 |
| 3.12 Power Transmitted by Flat Belts | 179 |
| 3.13 Condition for Maximum Power Transmission | 180 |
| 3.14 Initial Tension in the Belt | 181 |
| 3.15 Effect of Initial Tension on Flat Belts | 182 |
| 3.16 Forces in Flat Belt | 183 |
| 3.17 Idler or Jockey Pulley | 183 |
| 3.18 Relation Between Diameter of Pulley and Thickness | 184 |
| 3.19 Design Procedure for Flat Belts | 197 |
| 3.20 V-Belts | 207 |
| 3.21 Advantages and Disadvantages of V-Belt over Flat Belt | 207 |
| 3.22 Types of V-Belts | 207 |
| 3.23 Dimensions of a Standard V Grooved Pulley | 208 |
| 3.24 Power Transmission | 208 |
| 3.25 Number of Belts | 209 |
| 3.26 Center Distance | 209 |
| 3.27 Pitch Length of the Belt | 209 |
| 3.28 Ratio of Driving Tensions in V-Belt | 210 |
| 3.29 Design Procedure for V-Belts | 222 |
| 3.30 Wire Ropes | 237 |
| 3.31 Choice of a Wire Rope | 238 |
| 3.32 Stresses in Hoisting Ropes | 238 |
| 3.33 Drum and Sheave Diameters | 239 |
| 3.34 Causes of Wire Rope Failure | 239 |
| 3.35 Applications of Wire Ropes | 240 |
| 3.36 Chain Drives | 249 |
| 3.37 Classification of Chains | 250 |
| 3.38 Velocity Ratio of Chain Drives | 250 |
| 3.39 Minimum Number of Teeth on Sprocket | 251 |
| 3.40 Center Distance | 251 |
| 3.41 Chain Length | 251 |
| 3.42 Power Transmitted | 252 |
| 3.43 Minimum Number of Strands in a Chain | 252 |
| 3.44 Actual Factor of Safety | 252 |
| 3.45 Definitions | 252 |
| 3.46 Design Procedure for Chain Drives | 253 |
| VTU Question Papers | 265 |

4. SPRINGS

277

| | |
|--|-----|
| 4.1 Introduction | 277 |
| 4.2 Classification | 277 |
| 4.3 Terms in Compression Springs | 278 |
| 4.4 Spring Materials | 280 |
| 4.5 End Connections for Helical Compression Springs | 281 |
| 4.6 Surge in Springs | 282 |
| 4.7 Stresses in Helical Coil Springs—Circular Wire | 282 |
| 4.8 Deflection in Helical Coil Springs—Circular Wire | 284 |
| 4.9 Energy Stored in Helical Coil Springs—Circular Wire | 285 |
| 4.10 Buckling of Helical Compression Spring | 286 |
| 4.11 Design Procedure for Helical Springs | 286 |
| 4.12 Spring Scale (F_o) | 303 |
| 4.13 Stresses and Deflection in Helical Springs—Non-Circular Wire | 323 |
| 4.14 Concentric Springs or Co-axial Springs or Composite Springs or Nested Springs | 327 |
| 4.15 Springs Subjected to Fatigue/Fluctuating Loads | 336 |
| 4.16 Helical Torsion Springs | 343 |
| 4.17 Belleville or Disc Springs | 348 |
| 4.18 Leaf Springs | 353 |
| 4.19 Laminated Spring | 355 |
| 4.20 Semi-Elliptical Laminated Spring | 356 |

| | |
|--|------------|
| 4.21 Equalized Stresses in Springs—Nipping | 360 |
| VTU Question Papers | 382 |
| 5. SPUR GEARS | 398 |
| 5.1 Introduction to Gears | 398 |
| 5.2 Classification of Gears | 398 |
| 5.3 Advantages of Gear Drive | 398 |
| 5.4 Disadvantages of Gear Drive | 398 |
| 5.5 General Profiles of Gear Tooth | 398 |
| 5.5.1 Comparison Between Involute and Cycloidal Teeth | 399 |
| 5.6 System or Pressure Angles of Gear Tooth | 399 |
| 5.7 Terms Used in Gears | 399 |
| 5.8 Gear Materials | 402 |
| 5.9 Design Consideration for Gear Drive | 402 |
| 5.10 Methods of Gear Drive | 403 |
| 5.11 Introduction to Spur Gears | 403 |
| 5.12 Beam Strength of a Gear Tooth: Lewis Equation | 403 |
| 5.13 Velocity Factor (C_v) | 406 |
| 5.14 Allowable Stress (σ) | 406 |
| 5.15 Design Methodology for Spur Gears | 406 |
| 5.16 Strength Factor | 407 |
| 5.17 Tangential Load (F_t) | 407 |
| 5.18 Forces Acting on Spur Gears | 407 |
| 5.19 Dynamic Tooth Load (F_d) | 408 |
| 5.20 Dynamic Load Factor | 409 |
| 5.21 Beam Strength or Endurance Strength or Static Tooth Load (F_{en}) | 409 |
| 5.22 Wear Tooth Load (F_w) | 409 |
| 5.23 Velocity Ratio (i) | 410 |
| 5.24 Methods of Gear Failure | 410 |
| 5.25 Design Procedure for Spur Gear Problems | 411 |
| 5.26 Design Alterations for a Spur Gear | 412 |
| 5.27 Basic Problems | 413 |
| 5.28 Problems on Forces and Stresses | 416 |
| 5.29 Problems Based on Unknown Diameter or Unknown Distance | 418 |
| 5.30 Problems Based on Known Diameter or Known Center Distance | 464 |
| 5.31 Problems on Power | 485 |
| VTU Question Papers | 494 |
| 6. HELICAL GEARS | 505 |
| 6.1 Introduction | 505 |
| 6.2 Advantages and Disadvantages of Helical Gear | 505 |
| 6.3 Comparison Between Spur and Helical Gears | 505 |
| 6.4 Terms Used in Helical Gears | 506 |
| 6.5 Proportions of Helical Gear | 507 |
| 6.6 Face Width (b) | 509 |
| 6.7 Virtual or Formative Number of Teeth (z_e) | 509 |
| 6.8 Force Analysis of Helical Gears | 510 |
| 6.9 Strength of a Helical Gear | 512 |
| 6.10 Design Methodology for Helical Gears | 512 |
| 6.11 Dynamic Tooth Load (F_d) | 513 |
| 6.12 Beam Strength or Endurance Strength (F_{en} or F_s) | 513 |
| 6.13 Wear Tooth Load (F_w) | 514 |
| 6.14 Herringbone Gears | 514 |
| 6.15 Design Procedure for Helical Gear Problems | 515 |
| 6.16 Basic Problems | 516 |
| 6.16.1 Problems on Transverse or Circular Pitch ($p = p_c$) or (p_t) | 516 |
| 6.16.2 Problems on Diametral Pitch (p_d) | 517 |
| 6.16.3 Problems on Normal Diametral Pitch (p_{dn}) | 523 |
| 6.16.4 Problems on Normal Module (m_n) | 524 |
| 6.17 Problems Based on Forces and Stresses | 528 |
| 6.18 Problems Based on Unknown or Unknown Center Distance | 530 |

| | |
|--|------------|
| 6.19 Problems Based on Known Diameter or Known Center Distance | 552 |
| 6.20 Problems on Herringbone Gears | 575 |
| 6.21 Problems on Power | 580 |
| 6.22 Problems on Factor of Safety | 589 |
| VTU Question Papers | 591 |
| 7. BEVEL GEARS | 597 |
| 7.1 Introduction | 597 |
| 7.2 Classification | 597 |
| 7.3 Types of Tooth on Bevel Gears | 598 |
| 7.4 Applications | 598 |
| 7.5 Advantages and Disadvantages | 599 |
| 7.6 Terminology | 599 |
| 7.7 Pitch Angle of Bevel Gears | 599 |
| 7.8 Forces Acting on Bevel Gear | 601 |
| 7.9 Other Relations | 602 |
| 7.10 Strength of a Bevel Gear | 602 |
| 7.11 Dynamic Load (F_d) | 604 |
| 7.12 Static Tooth Load or Beam Strength or Endurance Strength (F_{en}) | 604 |
| 7.13 Wear Tooth Load (F_w) | 605 |
| 7.14 Formative Number of Teeth (z_e) | 605 |
| 7.15 Power Transmitted | 605 |
| 7.16 Design Methodology for Bevel Gears | 605 |
| 7.17 Design Procedure for Bevel Gear Problems | 606 |
| 7.18 Basic Problems | 607 |
| 7.19 Problems on Forces and Stresses | 609 |
| 7.20 Problems Based on Unknown Diameter or Unknown Center Distance | 612 |
| 7.21 Problems Based on Known Diameter or Known Center Distance | 637 |
| 7.22 Problems on Miter Gears | 649 |
| 7.23 Problems on Power | 655 |
| 7.24 Problems on Factor of Safety | 664 |
| VTU Question Papers | 667 |
| 8. WORM GEARS | 675 |
| 8.1 Introduction | 675 |
| 8.2 Characteristics of Worm Gears | 675 |
| 8.3 Advantages and Disadvantages | 675 |
| 8.4 Applications | 676 |
| 8.5 Designation of Worm Gears | 676 |
| 8.6 Worm Gear Design Parameters | 676 |
| 8.7 Worm and Worm Gear Terminology | 676 |
| 8.8 Strength of a Worm Gear (F_t) | 679 |
| 8.9 Dynamic Strength (F_s) | 680 |
| 8.10 Materials for Worm and Worm Gears | 680 |
| 8.11 Force Analysis of Worm Gears | 681 |
| 8.12 Efficiency of Worm Gears | 682 |
| 8.13 Wear Tooth Load (F_w) | 683 |
| 8.14 Thermal Capacity of Worm Gears | 683 |
| 8.15 Power Rating | 684 |
| 8.16 Basic Problems | 684 |
| 8.17 Problems on Forces, Stresses and Efficiency | 692 |
| 8.18 Design Procedure for Worm Gear | 699 |
| 8.19 Problems Based on Unknown Diameter of Unknown Center Distance | 700 |
| 8.20 Problems Based on Known Diameter or Known Center Distance | 715 |
| 8.21 Problems on Power | 721 |
| VTU Question Papers | 732 |
| 9. DESIGN OF CLUTCHES | 739 |
| 9.1 Introduction to Clutches | 739 |
| 9.2 Classification of Clutches | 739 |
| 9.2.1 Positive Clutches | 739 |
| 9.2.2 Friction Clutches | 740 |

| | |
|--|------------|
| 9.3 Single Plate or Disc Clutch | 740 |
| 9.4 Multi-Plate Clutch | 740 |
| 9.5 Difference Between Single Plate and Multi-Plate Clutches | 741 |
| 9.6 Torque Analysis of Plate or Disc Clutch | 741 |
| 9.7 Basic Problems on Single Plate Clutch | 745 |
| 9.8 Basic Problems on Multi-Plate Clutch | 751 |
| 9.9 Design Problems on Plate Clutch | 759 |
| 9.10 Cone Clutch | 768 |
| 9.11 Torque Analysis of Cone Clutch | 768 |
| 9.12 Basic Problems on Cone Clutch | 773 |
| 9.13 Design of Cone Clutch | 784 |
| VTU Question Papers | 790 |
| 10. DESIGN OF BRAKES | 800 |
| 10.1 Introduction to Brakes | 800 |
| 10.2 Classification of Brakes | 800 |
| 10.2.1 Mechanical Brakes | 801 |
| 10.3 Brake Shoe | 801 |
| 10.4 Brake Lining | 802 |
| 10.5 Energy Equations | 802 |
| 10.6 Heating of Brakes | 804 |
| 10.7 Other Relations | 804 |
| 10.8 Block or Shoe Brakes | 808 |
| 10.9 Double Block or Shoe Brake | 821 |
| 10.10 Band Brakes | 827 |
| 10.10.1 Simple Band Brake | 827 |
| 10.11 Internal Expanding Shoe Brake | 858 |
| VTU Question Papers | 865 |
| 11. LUBRICATION AND BEARINGS | 887 |
| 11.1 Introduction to Lubrication | 887 |
| 11.2 Purpose of Lubricants | 888 |
| 11.3 Selection of the Proper Lubricant | 888 |
| 11.4 Lubrication Regimes | 888 |
| 11.4.1 Hydrodynamic or Full Fluid Film Lubrication | 888 |
| 11.4.2 Boundary Lubrication or Thin Film Lubrication | 889 |
| 11.4.3 Mixed Film Lubrication | 889 |
| 11.4.4 Elastohydrodynamic Lubrication (EHD or EHL) | 889 |
| 11.5 Properties of Lubricants | 889 |
| 11.6 Bearings | 892 |
| 11.6.1 Classification of Bearings | 892 |
| 11.6.2 Formation of Continuous Oil Film in a Journal Bearing | 894 |
| 11.7 Bearing Materials | 895 |
| 11.7.1 Properties of Bearing Materials | 895 |
| 11.8 Selection of Journal or Antifriction Bearing | 896 |
| 11.9 Petroff's Equation | 896 |
| 11.10 Bearing Characteristic Number (C) or Bearing Modulus for a Journal Bearing | 899 |
| 11.11 Sommerfeld Number | 900 |
| 11.12 Operating Pressure | 900 |
| 11.13 Terms and Conditions | 900 |
| 11.14 Heat Generated in Bearings | 902 |
| 11.15 Heat Dissipated by Bearings | 902 |
| 11.16 Problems on Petroff's Equation | 903 |
| 11.17 Problems on McKee's Equation | 910 |
| 11.18 Design Procedure for Journal Bearings | 942 |
| 11.18.1 Problems on Unknown Diameter | 942 |
| 11.18.2 Problems on Known Diameter | 951 |
| 11.19 Thrust Bearing | 958 |
| 11.19.1 Pivot Bearing | 958 |
| 11.19.2 Collar Bearing | 960 |
| 11.20 Allowable Pressure | 960 |
| VTU Question Papers | 964 |

| | |
|---|-------------|
| 12. ANTIFRICTION BEARINGS | 978 |
| 12.1 Introduction | 978 |
| 12.2 Classification of Rolling Contact Bearings | 978 |
| 12.3 Difference Between Rolling and Sliding Bearings | 979 |
| 12.4 Bearing Loads | 979 |
| 12.5 Terminology | 980 |
| 12.6 Equivalent Bearing Load (P) | 980 |
| 12.6.1 Basic Dynamic Load Rating or Specific Capacity (C) of Roller Bearings | 981 |
| 12.6.2 Dynamic Equivalent Loads for Roller Bearings | 981 |
| 12.6.3 Basic Static Load Rating of Roller Bearings | 982 |
| 12.6.4 Static Equivalent Loads (P_a) for Roller Bearings | 982 |
| 12.7 Fluctuating Load | 983 |
| 12.8 Load Life Relationships | 983 |
| 12.9 Reliability of a Bearing | 984 |
| 12.10 Bearing Sizes and Series | 985 |
| 12.11 Basic Problems on Radial Load | 985 |
| 12.12 Problems on Variable or Fluctuating Load | 989 |
| 12.13 Basic Problems on Combined Load | 995 |
| 12.14 Problems Based on Known Diameter | 1003 |
| 12.15 Problems Based on Unknown Diameter | 1014 |
| 12.16 Typical Problems | 1021 |
| VTU Question Papers | 1039 |
| 13. IC ENGINE PARTS | 1045 |
| 13.1 Piston | 1045 |
| 13.1.1 Functions of Piston | 1045 |
| 13.2 Parts of a Piston | 1045 |
| 13.3 Materials for Piston | 1046 |
| 13.4 Basic Design Considerations | 1047 |
| 13.5 Design of Piston | 1047 |
| 13.5.1 Thickness of Piston Head | 1047 |
| 13.5.2 Piston Rings | 1049 |
| 13.5.3 Piston Barrel | 1050 |
| 13.5.4 Piston Skirts | 1051 |
| 13.5.5 Piston Pin | 1051 |
| 13.6 Connecting Rod | 1071 |
| 13.7 Forces Analysis in Connecting Rod | 1071 |
| 13.7.1 Force on the Piston Due to Gas Pressure and Inertia of the Reciprocating Parts | 1071 |
| 13.7.2 Force Due to Inertia of the Connecting Rod | 1073 |
| 13.8 Design of Connecting Rod | 1075 |
| 13.8.1 Dimension of Cross Section of Connecting Rod | 1075 |
| 13.8.2 Dimension of the Crank Pin at the Big End and the Piston Pin at the Small End | 1077 |
| 13.8.3 Size of the Bolts for Big End Cap | 1078 |
| 13.8.4 Thickness of the Big End Cap | 1079 |
| 13.8.5 Whipping Stress or Bending Force Due to Inertia | 1079 |
| 13.9 Crankshaft | 1092 |
| 13.9.1 Classification | 1092 |
| 13.9.2 Materials | 1092 |
| 13.10 Design of Centre Crankshaft | 1093 |
| 13.10.1 Case 1: Centre Crankshaft at Top Dead Center Position | 1093 |
| 13.10.2 Case 2: Centre Crankshaft at an Angle of Maximum Torque | 1097 |
| 13.11 Design of Side Crankshaft | 1120 |
| 13.11.1 Case 1: Side Crankshaft at Top Dead Center Position | 1120 |
| 13.11.2 Case 2: Side Crankshaft at an Angle of Maximum Torque | 1125 |
| VTU Question Papers | 1139 |
