

CONTENTS

<i>Preface</i>	<i>v</i>
<i>Syllabus Course—BP202T, BP208P</i>	<i>ix</i>
2(I)-1 Classification of Organic Compounds	1
Classification of Organic Compounds Based on Structure	1
Classification of Organic Compounds Based on Functional Groups	4
2(I)-2 IUPAC Systems of Nomenclature of Organic Compounds	5
IUPAC Nomenclature of Organic Compounds	5
Alkanes—Saturated Hydrocarbons	5
Alkanes and Alkynes—Unsaturated Hydrocarbons	8
Alcohols	9
Ethers	10
Aldehydes	11
Ketones	12
Carboxylic Acids	13
Esters	14
Amines	14
2(I)-3 Introduction to Isomerism	15
Types of Isomerism	15
Questions	18
2(II)-1 Aliphatic Alkane Hydrocarbons: Methods of Preparation and Properties	21
Alkanes	21
2(II)-2 Aliphatic Alkene Hydrocarbons: Methods of Preparation and Properties	28
Methods of Preparation of Alkenes	28
Properties of Alkenes	29
2(II)-3 Conjugated Dienes: Stability, Preparation and Chemical Reaction	37
Methods of Preparation of Conjugated Dienes	38
Properties of Dienes	39
2(II)-4 Aliphatic Elimination Reactions: E₁ versus E₂ Mechanisms	43
E ₁ Reaction	44
E ₂ Reaction	46
Questions	50
2(III)-1 Alkyl Halides: Preparation, Properties and Useful Halide Derivatives	52
Preparation of Alkyl Halides by Alcohols	53
Physical Properties of Alkyl Halides	53
Reactions of Alkyl Halides	54
Some Important and Useful Halide Derivatives	55
2(III)-2 Alcohols: Introduction, Nomenclature, Qualitative Test and Methods of Preparation	58
Nomenclature of Alcohols	58
Classification of Alcohols	59
Classification of Monohydric Alcohols	59
Qualitative Tests for Alcohols	60
Differentiating Tests for Primary, Secondary and Tertiary Alcohols	61
Methods of Preparation of Alcohols	62

2(III)-3 Aliphatic Alcohols: Properties, Chemical Reactions and Introduction to Some Important Alcohols	67
Physical Properties of Alcohols	67
Acidity of Alcohol	67
Some Commercially Available Important Alcohols	72
2(III)-4 Aliphatic Nucleophilic Substitution: S_N1 and S_N2 Reactions	75
Types of Aliphatic Nucleophilic Substitution Reactions	75
<i>Questions</i>	81
2(IV)-1 Carbonyl Group: Introduction, Nomenclature and Qualitative Tests	83
Nomenclature of Carbonyl Group	83
Qualitative Tests for Carbonyl Compounds	83
2(IV)-2 Aldehydes and Ketones: General Methods of Preparation	87
General Methods of Preparation of Aldehydes and Ketones	87
2(IV)-3 Aldehydes and Ketones: Properties and Important Reactions	92
Reactions of Aldehydes and Ketones	92
A. Reactions of Carbonyl Group	92
B. Reactions Involving the Alpha-Carbon	101
2(IV)-4 Important and Useful Carbonyl Compounds	109
<i>Questions</i>	116
2(V)-1 Aliphatic Carboxylic Acids: Introduction, Nomenclature and Methods of Preparation	118
Nomenclature of Aliphatic Carboxylic Acids	118
Qualitative Analysis for Acids, Amides and Esters	118
General Methods of Preparation of Carboxylic Acids	119
2(V)-2 Carboxylic Acids: Physical and Chemical Properties	124
Properties of Carboxylic Acids	124
Chemical Reactions of Carboxylic Group	126
2(V)-3 Some Important Carboxylic Acids and their Derivatives	128
2(V)-4 Aliphatic Amines: Introduction, Nomenclature and Methods of Preparation	134
Qualitative Tests for Aliphatic Amines	134
Methods of Preparation of Aliphatic Amines	136
2(V)-5 Aliphatic Amines: Properties, Important Chemical Reactions and Useful Amines	140
Chemical Reactions of Amines	141
Some Important Medicinally Active Amines	143
<i>Questions</i>	145
Practicals (BP208P)	147
Qualitative Organic Analysis	147
A. Preliminary Tests	147
B. Physical Constants	147
C. Analysis for Elements Present	147
D. Solubility Tests	149
E. Test for Unsaturation	149
F. Tests for Functional Groups	150
G. Preparation of Derivatives of Organic Compounds	155
Write up Procedure for Identification of an Unknown Organic Compound	159
Index	163
