	SECTION I: Introduction to 3D Technology	
1.	3D Printing Biosphere for Medical and Orthopaedic Applications Vaibhav Bagaria	3
2.	Fundamentals of 3D Software and Hardware Technologies in Orthopaedic Chetan Sood, Ravikant Kamal	10
3.	Techniques, Benefits and Challenges of 3D Technology in Orthopaedics Bhavuk Garg, Jaiben George	20
4.	3D Modeling and Simulation for Preoperative Planning Ankit Dadra, Siddhartha Sharma, Rohit Arora, Prasoon Kumar	26
5.	3D Printing in Orthopaedic Teaching and Training Maryada Venkateshwar Reddy, Sujitkumar Vakati R, Falguni Pati, Bojedla Sri Sai Ramya	36
6.	Regulatory Issues and Quality Control in 3D Printed Orthopaedic Implants Vibhu Krishnan Viswanathan, Vijay Kumar Jain	48
7.	Three-dimensional Medical Imaging in Orthopaedics: Acquisition, Digitization, 3D Reconstruction, and Applications Bhushan S Borotikar, Surabhi Thatte	55
	SECTION II: 3D Printing in Orthopaedics	
8.	Biomaterials in Orthopaedics and 3D Printable Biomaterials Falguni Pati, Sujitkumar Vakati R, Maryada Venkateshwar Reddy, Bojedla Sri Sai Ramya	75
9.	3D Printed Synthetic Bone Grafts: The Future Sujitkumar Vakati R, Falguni Pati, Maryada Venkateshwar Reddy, Bojedla Sri Sai Ramya	90
10.	Bioprinting in Orthopaedics Kavita Kumari Thakur, Ramesh R Lekurwale	98
11.	Patient-specific Instrumentation and Implants: Design for Defect and Deformity (3D) Vikas Jain, Lalit Maini	103
12.	Fusion Imaging in Surgical Planning Abhay Meena, Lalit Maini	116
13.	Role of 3D Printing in Orthopaedic Oncology Abhijeet Ashok Salunke, Lalit Maini, Nandlal Bharwani, Vikas Warikoo, Keval Patel, Raghavendra Bhalerao, Krupa Shah, Shashank Pandya	124

	SECTION III: Deformity Correction and Skeletal Optimization using 3D Technology	
14.	Proximal Femoral Neck Lengthening Osteotomy using 3D Technology Taral Nagda, Lalit Maini, Vikas Jain, Jaideep Dhamele, Sagar Parekh, Rashi Gupta	135
15.	Multiaxial Deformities: Optimal Correction by 3D Technology Amit Sharma, Lalit Maini	147
SE	CTION IV: Regional Skeletal Solutions in Trauma and Non-Trauma using 3D Technolo	gy
16.	3D Printing in Pelvi-Acetabular Trauma Tarun Verma, Lalit Maini	157
17.	3D Printed Pedicle Trajectory Guides for Complex Spinal Deformities Vyom Sharma, Aju Bosco, Anand Ramachandran	163
18.	3D Printed Cups for Total Hip Replacement: An Update on the Technology and the Surgical Technique Shobit Deshmukh, Vaibhav Bagaria	177
19.	Role of 3D Printing in Foot and Ankle Trauma and Orthopaedics Rajiv Shah, Shivam Shah	189
20.	Reconstruction of Severe Glenoid Defects in Shoulder Arthroplasty: The Role of 3D Technology Daniel LJ Morris, Ben W Gooding, Amol A Tambe	197
SEC	CTION V: Science and Research Behind 3D Metal Printing and Osteointegration Conce	pts
21.	Porous Metal Scaffolds for Enhanced Osseointegration: A Comprehensive Examination of Preclinical and Clinical Applications Jaideep Singh Bhardwaj, Souptick Chanda	207
22.	Basics of FEA in 3D Printed Implants Souptick Chanda	214
	SECTION VI: Computer-aided Simulations of 3D Printed Implants	
23.	Role of Computer-aided Design and Numerical Simulations in 3D Printed Orthopaedic Implants Kumar Satyam, Kumar Kartikeya, Anil Kumar, Murali Pullela, Enrique Escobar de Obaldia	221
	SECTION VII: Computer-Assisted Orthopaedic Surgery	
24.	Introduction to Computer-Assisted Orthopaedic Surgery (CAOS) Karthik Vishwanathan	231
25.	Non-Robotic Options Humanoid Robotics: 3D Planning with Mixed Reality Navigation Manish R Shah, Darshan U Shah, Monil D Patel, Dharan H Shah	235
	SECTION VIII: Virtual Reality in Orthopaedics Training	
26.	Virtual Reality in Orthopaedics Abhishek Jain	249
	SECTION IX: Challenges and Ethical Considerations	
27.	Regulatory Issues and Quality Control in 3D Printing Nitish Bansal	257

	SECTION X: Different Case Studies with 3D Technology Applications	
28.	Trabecular Cone Utilization for Effective Defect Management in Revision Total Knee Arthroplasty (TKA): A Case Report Yuvarajan Palanisamy	263
29.	Towards Personalized Hand Reconstruction: 3D Printed Biodegradable Implants for Bony Tumours Chinmoy Das, Partha Pratim Das	269
