Foreword by Dr Ramesh Kumar

viii

Foreword by Dr LG Krishna

ix

Preface

x

1. General Orthopedics 1

Orthopedics history
Osteology
Fracture—definition and types 7
Fracture healing/delayed union, non-union, union, pseudoarthrosis 7
Bone grafting 9
Fracture in special situation
 Pathological fracture 9
 Stress fracture 10
 Periprosthetic fracture 10

2. Fracture Management Principles 15

Non-operative management—POP cast, brace, splint, traction, physiotherapy 15
Operative management 18
 AO principles 18
 Timing of surgery 18
Closed reduction v/s open reduction 18
Internal fixation v/s external fixation 19
Surgical excision 20
Articular fractures 20

3. Orthopedic Radiology 24

4. Polytrauma 35

Introduction 35
Triage 35
Sequence in management of polytrauma patients 36
ATLS, BLS, ALS and ACLS 36
Damage control orthopedics (DCO) 38
Crush syndrome 39
Compound fractures and management 40
Score—Gustilo, Ganga 41

5. Amputations 44

Indications 44
MESS (predictor of amputation) 45
Technique, ideal stump 46
Levels of amputation
Nomenclature 46

Special considerations in children 47
Complications 48
Prosthetics/orthotics 49

6. Upper Limb Fractures 53

Acute shoulder subluxation/dislocation 53
Fractures around shoulder and arm 54
Elbow 55
 Anatomy 56
 Supracondylar humerus fracture 56
 Compartment syndrome and VIC 57
 Myositis ossificans and MOP 58
Forearm 61
Distal end radius fracture—Colles', Smith, Barton 62
CRPS/Sudeck's osteodystrophy 63
Carpal injuries 63
Hand injury 64
Upper limb fracture eponyms 65

7. Pelvis and Hip Fractures 79

Hip joint applied anatomy 79
Gait 79
Examination of hip joint 80
Pelvic fracture 82
Acetabulum fracture 83
Hip dislocation and various hip deformity 84
Fracture neck of femur 86

8. Lower Limb Fractures 94

Deformities 94
Intertrochanteric and subtrochanteric fractures 94
Femur
 Fracture shaft of femur 96
 Distal femur fracture 97
 Fracture patella 97
 Floating knee 99
 Fat embolism syndrome 99
Tibial plateau fracture 100
Knee dislocation 100
Tibia fracture (fracture both bones leg) 100
Ankle injuries 101
Other foot injuries 104
Fall from height 105
Fracture eponyms 105

9. Spine Disorders 112

- Anatomy of vertebral column 112
- Concept of spinal stability 113
- Causes of spinal injury 113
- Spinal shock 114
- Cranial injuries—motorcyclist's fracture 114
- Cervical spine injuries 114
 - Jefferson's fracture 114
 - Hangman's fracture 115
 - SCIWORA 115
 - Clay-shoveler's fracture 115
 - Whiplash injuries 115
- DL spine injuries—chance fracture 116
- Management of spine injury 116
- Spondylolysis and spondylolisthesis 116
- Localising level of spinal cord injury 117
- Cauda equina and conus medullaris syndrome 120
- Incomplete spinal cord injury syndromes 120
- Disc prolapse and herniation 120
- Spinal canal stenosis 123
- Vertebroplasty and kyphoplasty 123

10. Sports Injuries and Cumulative Soft Tissue Trauma Disorders 129

- Shoulder joint 129
 - Frozen shoulder 129
 - Painful arc syndrome/impingement syndrome 129
 - Rotator cuff arthropathy, SLAP tear 129
 - Recurrent shoulder dislocation/subluxation 130
- Elbow 132
 - Tennis elbow, Golfer's elbow 132
 - Baseball pitchers', Javelin throwers' elbow 132
- Wrist and hand 132
 - Bowler's thumb, Skier's thumb/gamekeeper's thumb 133
 - Mallet finger/baseball finger 133
 - Jersey finger, trigger finger 133
 - de Quervain's disease, Dupuytren's contracture 134
 - Zones and pulleys 135
 - Ganglion
- Knee joint 135
 - Anatomy 135
 - Cruciate ligaments 135
 - Collateral ligament 136
 - Rotatory instabilities of knee 137
 - Menisci 137
 - Bursitis 139
 - Plica syndrome 139
- Miscellaneous 139
 - Athletic pubalgia, ankle sprain 139
 - Achilles tendon injury 139
 - Plantar fasciitis 140
 - Hammer toe, hallux valgus 140

11. Peripheral Nerve Injuries and Entrapment Syndromes 151

- Introduction 151
- General Nerve injury
 - Mechanism
 - Classifications 152
 - Degeneration/regeneration
 - Investigations 153
 - General Principles of Management 154
- Brachial plexus injury 155
- Axillary nerve injury 157
- Musculocutaneous nerve injury 157
- Radial nerve injury 157
- Medial nerve injury 159
- Ulnar nerve injury 161
- Sciatic nerve 162
- Nerve entrapment syndromes 165
 - Cheiralgia paresthetica, carpal tunnel syndrome 165
 - Cubital tunnel syndrome, Guyon's canal 165
 - Radial tunnel syndrome, pronator syndrome 166
 - Anterior interosseous syndrome 166
 - Morton's neuroma 166
 - Meralgia paresthetica, tarsal tunnel syndrome 166
 - Thoracic outlet syndrome 167

12. Infection of Bone and Joints 177

- Osteomyelitis 177
- Septic arthritis 182
- Tom Smith arthritis 184
- Transient synovitis of hip 184
- Fungal infection (Madura foot) 184
- Syphilis 185
- Hand infection (fascial spaces of palm) 185
- Tenosynovitis 186

13. Tuberculosis of Bone 193

- Skeletal tuberculosis 193
- Spine tuberculosis 195
- Tuberculosis of hip 198
- Tuberculosis of knee 200

14. Pediatric Orthopedic Deformities 205

- Special features of pediatric bone 205
- Physeal injuries 205
- Pediatric hip problems 206
 - Limping child, coxa vara 206
 - Developmental dysplasia of hip 207
 - Perthes' disease, SCFE 209
- Pediatric knee problems 210
 - Traumatic dislocation of distal femoral epiphysis 210

Congenital dislocation of knee	210
Angular deformities of knee	210
Genu varum/valgum	211
Tibia vara/Blount's disease	211
Chondromalacia patellae	211
Pediatric leg/foot problems	211
Rocker bottom foot	211
CTEV, congenital pseudoarthrosis	212
Upper limb—radial club hand	214
Madelung deformity	214
Congenital radioulnar synostosis	214
Congenital absence of pectoral muscle	214
Pediatric spine	214
Congenital muscular torticollis	214
Klippel-Feil syndrome	215
Sprengel shoulder, vertebra plana	216
Scoliosis/kyphosis	216
Scheuermann's kyphosis	218
Miscellaneous—battered baby syndrome	219

15. Bone Tumors 230

General facts	230
Metastasis	234
SBC, ABC, GCT	235
Osteochondroma	237
Enchondroma	238
Chondroblastoma	239
Chondromyxoid fibroma	239
Fibrous cortical defect	239
Fibrous dysplasia	240
Osteofibrous dysplasia	240
Neurofibromatosis	241
Hemangioma	241
Osteoid osteoma	242
Osteoblastoma, osteoma	242
Malignant tumors	243
Adamantinoma	243
Osteosarcoma	243
Ewing's sarcoma	243
Chondrosarcoma	246
Chordoma	247
Multiple myeloma	247
Eosinophilic granuloma	248
Synovial cell sarcoma	249
PVNS, bone island	249
Soft tissue sarcomas	249

16. Neuromuscular and Genetic Disorders 262

Skeletal dysplasias	262
Achondroplasia	262
Cleidocranial dysostosis	263
Osteogenesis imperfecta	264
Caffey's disease	266
Osteopetrosis	266

17. Metabolic Bone Diseases 271

Osteoporosis	271
Rickets (renal osteodystrophy)	274
Hypophosphatasia v/s hypophosphataemia	
Osteomalacia	277
Hyperparathyroidism	278
Scurvy	279
Fluorosis	281
Paget's disease	281

18. Joint Diseases 292

Joint anatomy	292
Synovial fluid analysis	292
Cartilage	293
Arthritis	294
Osteoarthritis	294
Inflammatory arthritis	296
Rheumatoid arthritis	296
Seronegative spondyloarthropathies	301
Ankylosing spondylitis	301
Psoriatic, reactive, enteropathic arthritis	306
Gout, CPPD	307
Neuropathic arthritis	
Hemophilic arthritis	309
Alkaptonuric arthritis	312
Synovial chondromatosis	312

19. Osteochondritis and AVN 324

AVN—scaphoid, talus, head of femur	
Osteochondritis—Kienböck's disease,	
Osgood-Schlatter's disease, osteochondritis	
dissecans	328

20. Orthopedic Surgery and Evaluation 333

Bone cement	333
Arthroscopy	333
Arthroplasty (hip and knee)	334
Patellar clunk syndrome	336
High tibial osteotomy (HTO)	337
Important surgical approach	337
