Contents

	Introduction	
1.	Plastics	
ļ	History	
ļ	Formation of plastics	
,	Types of plastics	
,	The molecular structure and properties	
(Common plastics and their properties	
Ì	Classification of thermoplastics	
,	The form of the raw material	
1	Preparation of thermoplastics for moulding	
	Recycling	
- 1	Recyching	
	Acronyms	
2.	Acronyms Injection Moulding of Thermoplastics, the Equipment	
2. 	Acronyms Injection Moulding of Thermoplastics, the Equipment History of injection moulding	
2. 	Acronyms Injection Moulding of Thermoplastics, the Equipment History of injection moulding The injection moulding process	
2.	Acronyms Injection Moulding of Thermoplastics, the Equipment History of injection moulding The injection moulding process The moulding equipment	
2.	Acronyms Injection Moulding of Thermoplastics, the Equipment History of injection moulding The injection moulding process The moulding equipment Special machine configurations	
2.	Acronyms Injection Moulding of Thermoplastics, the Equipment History of injection moulding The injection moulding process The moulding equipment Special machine configurations Specifications of injection moulding machines	
2. 	Acronyms Injection Moulding of Thermoplastics, the Equipment History of injection moulding The injection moulding process The moulding equipment Special machine configurations Specifications of injection moulding machines Injection Moulding of Thermoplastics the Process	
2. 	Acronyms Injection Moulding of Thermoplastics, the Equipment History of injection moulding The injection moulding process The moulding equipment Special machine configurations Specifications of injection moulding machines Injection Moulding of Thermoplastics the Process The process	

x Comprehensive Injection Moulding	
The mould filling mechanism	101
The forces	102
Post operations on mouldings	105
Trouble shooting	106
4. Design of Injection Moulds for Thermoplastics	118
Design of injection moulds	118
Special mould designs	182
Classification of injection moulds	212
Procedure for designing an injection mould	213
Design of injection moulded articles	216
5. Mould Making	226
Mould manufacturing	226
Materials for injection moulds	234
Post-treatments	239
6. Intrusion Injection Moulding	244
The process	244
The equipment	245
The mould	246
Advantages and disadvantages	246
Applications	246
7. Injection Compression Moulding	247
The process	247
The equipment	251
The mould	252
Advantages	254
Fields of application	255
8. Multi-component Injection Moulding	256
The process	256
The equipment	258

Co	mtents xi
The mould	259
The product design	261
Alternative processes for multi-component mou	ulding 264
Advantages	268
Fields of application	268
Sandwich Injection Moulding	269
The process	269
The equipment	271
The mould	272
The product design	272
Faults and remedies	273
Alternative methods of sandwich moulding	274
Advantages	276
Applications	276
Fusible Core Injection Moulding	277
The moulding process	277
The materials	278
The equipment	279
The moulds	281
Advantages and disadvantages	282
Applications	282
Injection Moulding of Structural Foams	283
The process	283
Gas-assisted and Water-assisted	
Injection Moulding	292
The process	292
The materials	298
The equipment	299
The equipment The mould design	299 303

xii Comprehensive Injection Moulding	
Advantages	310
Applications	311
Faults and remedies	311
External gas moulding	315
The water injection technology	317
Advantages and disadvantages	318
13. Powder Injection Moulding	322
The process	322
The equipment	328
The mould	328
The product design	331
Advantages	331
Applications	332
14. Injection Moulding of Thermosetting Plastics	333
The materials	333
The process	335
The equipment	338
Injection moulds for thermosets	343
The product design	351
Trouble shooting	355
Advantages and disadvantages	360
15. Injection Moulding of Liquid Silicone Rubber	361
The material	361
The moulding process	362
Eiection	364
The moulding machine	365
The mould	366
Two component injection moulding with LSR	370
Trouble shooting	372
Causes	374
Fields of application	375
