Preface	iii
---------------	-----

OBSTETRICS

IMPORTANT TOPICS

1. Spermatogenesis and Oogenesis.....	3
2. Fertilization Basics.....	4
3. Signs in Pregnancy	5
4. Pregnancy Dating.....	6
5. Antenatal Care in Pregnancy.....	7
6. Vaccination in Pregnancy.....	8
7. Aneuploidy Screening.....	9
8. Antenatal Investigations.....	12
9. Important USG Images.....	13
10. Placental Hormones.....	16
11. Amniotic Fluid: Source and Disorders	19
12. Hematological Changes in Pregnancy.....	22
13. Anemia in Pregnancy.....	23
14. Heart Diseases in Pregnancy.....	26
15. Renal Changes in Pregnancy.....	28
16. Thyroid Gland Changes in Pregnancy.....	29
17. Drugs in Pregnancy.....	31
18. Teratogenic Drugs	32
19. Antiphospholipid Antibody.....	34
20. Cervical Insufficiency.....	35
21. Abortions	36
22. Medical Termination of Pregnancy.....	37
23. Ectopic Pregnancy	38
24. Molar Pregnancy.....	41
25. Placenta Previa.....	43
26. Abruptio Placenta	45
27. Diabetes in Pregnancy.....	46
28. Infections in Pregnancy.....	50
29. Pregnancy-Induced Hypertension (PIH).....	53
30. HELLP Syndrome and Liver Disorders in Pregnancy.....	57
31. Doppler Studies in Pregnancy.....	58
32. Twins.....	59
33. Preterm Birth.....	63

34. Established Preterm Labor.....	64
35. PROM and PPROM.....	66
36. Post-Term Pregnancy.....	66
37. Rh Negative Pregnancy.....	67
38. Antepartum Fetal Assessment.....	69
39. Biophysical Profile (Manning's Score).....	70
40. Amniotic Fluid Assessment.....	70
41. Important Risk Factors in Obstetrics.....	71
42. Maternal Pelvis.....	72
43. Fetal Skull	74
44. Terminology Related to Labor.....	75
45. Leopold Maneuver.....	77
46. Some Important Concepts.....	78
47. Induction of Labor	79
48. Cardinal Movements of Labor.....	80
49. Normal Stages of Labor.....	81
50. Abnormal Stages of Labor.....	82
51. Obstructed Labor	83
52. WHO Recommendations for Management of Labor	84
53. Important Points Related to Third Stage of Labor.....	85
54. Drugs Used in AMTSL and PPH.....	86
55. Methods of Placental Separation	86
56. Retained Placenta	87
57. Placenta Accreta Spectrum (PAS)	88
58. Partogram.....	89
59. Labor Care Guide.....	92
60. Postpartum Hemorrhage.....	94
61. Postpartum Collapse	96
62. Cord Prolapse.....	98
63. Perineal Tear and Episiotomy.....	99
64. Malpresentation	100
65. Breech.....	101
66. External Cephalic Version	105
67. Intrapartum Fetal Monitoring.....	106
68. Important Points on Cesarean Section.....	108
69. Instrumental Delivery.....	109
70. Uterine Rupture.....	110
71. IMPORTANT TABLES	113
Table 1: C/I to breastfeeding	113
Table 2: Obstetric causes of DIC.....	113
Table 3: Lab investigations in DIC.....	113
Table 4: Methods of doing MTP	113
Table 5: Radiological signs of IUD.....	113
Table 6: GOI: High-risk pregnancy.....	113

Table 7: Color codes on antenatal card	113
Table 8: Danger symptoms and signs in pregnancy.....	113
Table 9: Nutritional requirements in pregnancy and lactation	114
Table 10: Symphysiofundal height (SFH).....	114
Table 11:	114
Table 12: Other important PYQs	115
Table 13: Pelvis.....	115
Table 14: Swellings on fetal head.....	115
Table 15: Important points on hyperemesis gravidarum	116
Table 16: Gravida and parity.....	116
Table 17: Alpha fetoprotein	116
Table 18: hCG: Clinical implications of the measurement of hCG.....	117
Table 19: Events of early pregnancy	117
Table 20: Fetal circulation Important points.....	117
Table 21: Important one-liners for FMGE.....	117
Table 22: Important radiological signs in pregnancy	117
Table 23: Basics of placenta.....	118
Table 24: Important drug dosages in obstetrics.....	118
Table 25: Time of termination of pregnancy in different conditions.....	119
72. IMPORTANT IMAGES	120
73. IMPORTANT FOR INI-CET	121

GYNECOLOGY

IMPORTANT TOPICS

74. Menstrual Cycle.....	125
75. Amenorrhea.....	127
76. Phases of Menstrual Cycle.....	129
77. Important Images Related to Menstrual Cycle	130
78. Hyperestrogenic Conditions.....	134
79. Abnormal Uterine Bleeding (AUB).....	135
80. Endometrial Hyperplasia.....	138
81. Endometrial Cancer	139
82. Important Next Steps	141
83. Menopause.....	143
84. Hirsutism	145
85. PCOS (Stein-Leventhal Syndrome)	146
86. Endometriosis	148
87. Fibroid.....	151
88. Important Images of Fibroid, Polyp and Adenomyosis.....	154
89. Gynecological Procedures	156
90. Colposcopy and Cone Biopsy.....	158
91. Cervical Intraepithelial Neoplasia (CIN).....	159

92.	Cancer Cervix.....	161
93.	Hysteroscopy.....	164
94.	Asherman Syndrome.....	165
95.	Hysterosalpingography.....	166
96.	Genital TB.....	167
97.	Vaginitis.....	168
98.	Pelvic Inflammatory Disease (PID).....	169
99.	Syndromic Management.....	170
100.	Müllerian Malformations.....	171
101.	Normal Sexual Development in Males.....	174
102.	Normal Sexual Development in Females.....	175
103.	Development of External Genitalia.....	176
104.	Female External Genitalia.....	177
105.	Puberty.....	178
106.	Disorders of Sex Development: 46, XX Individuals.....	179
107.	46, XY DSD.....	181
108.	Workup of a Case of Ambiguous Genitalia.....	182
109.	DSD-46, XY Karyotype with Exactly Female Looking Genitalia and Presenting as Primary Amenorrhea.....	183
110.	Primary Amenorrhea.....	184
111.	Primary Amenorrhea with Uterus Absent.....	185
112.	Primary Amenorrhea with Uterus Present.....	186
113.	Secondary Amenorrhea.....	188
114.	Prolactin Disorders: Prolactinoma and Sheehan Syndrome.....	190
115.	Female Infertility and Anovulation.....	191
116.	Ovarian Hyperstimulation Syndrome.....	193
117.	Female Infertility — POI.....	193
118.	Female Infertility: Tubal Cause.....	194
119.	Male Infertility.....	195
120.	Algorithm for Obstructive Azoospermia.....	196
121.	ART Procedures.....	197
122.	Prolapse.....	198
123.	Urinary Fistula.....	201
124.	Vulval Cancer.....	202
125.	IMPORTANT TABLES	209
	Table 26: pH of vagina at different ages.....	209
	Table 27: Cervix: Corpus Ratio.....	209
	Table 28: Contents of blood ligament.....	209
	Table 29: Fallopian tube.....	210
	Table 30: Muscles attached to perineal body.....	210
	Table 31: Emergency Contraception.....	210
	Table 32: Mechanism of action of some important contraceptives.....	211
	Table 33: Oral contraceptive pills (OCPs).....	211
	Table 34: Absolute contraindications of OCPs.....	212

Table 35: LARC methods.....	213
Table 36: DMPA injection	213
Table 37: IUCD generations.....	213
Table 38: Important IUCDs.....	214
Table 39: Comparison of CuT 380 and Mirena.....	214
Table 40: Absolute contraindications of IUCD	215
Table 41: Contraceptives included in National Family Planning Program.....	215
Table 42: Important PYQs.....	215
Table 43: Failure rate of contraception.....	216
Table 44: Postpartum contraceptive use	216
Table 45: Risk factors and protective factors related to ovarian cancer	219
Table 46: WHO classification of types of ovarian cancer.....	220
Table 47: Epithelial ovarian tumor	220
Table 48: Pseudomyxoma peritonei	220
Table 49: Important PYQs on epithelial tumors	220
Table 50: Important PYQs on germ cell tumors.....	221
Table 51: Ovarian tumor and tumor markers.....	221
Table 52: Meigs syndrome and Pseudo-Meigs syndrome.....	221
Table 53: HPE findings of ovarian tumor.....	221
Table 54: Differences between benign and malignant adnexal mass	222
126. IMPORTANT IMAGES OF OVARIAN TUMORS	222
127. IMPORTANT INSTRUMENTS IN GYNECOLOGY	225
128. IMPORTANT PAP SMEAR IMAGES OF INFECTIONS.....	226
