

Contents

<i>Preface</i>	<i>vii</i>
1. Introduction to Research	1
2. Research Question	6
3. Research Process	9
4. Association in Medical Research	13
5. Research Hypothesis	17
6. Study Designs	23
7. Searching Literature	31
8. Subject Selection	35
9. Causality in Medical Research	42
10. Protocol Writing	46
11. Review of Literature	52
12. Bias and Errors	56
13. Diagnostic Testing in Basic and Clinical Epidemiology	62
14. Surveys, Questionnaire and Scales	70
15. Validating in Medical Research	76
16. Testing Reliability in Medical Research	80
17. Data Collection	83
18. Clinical Epidemiology Tools in Medical Research	88
19. Basic Statistical Tools in Medical Research	92
20. Level of Significance	110
21. Relative Risk and Odds Ratio	113

22. Thesis Writing	117
23. Getting Published	120
24. Plagiarism, Falsification, Fabrication in Medical Research	126
25. Taking Consent in Medical Research	129
26. Medical Ethics	132
27. Intention to Treat Analysis	135
28. Number Needed to Treat (NNT), Number Needed to Harm (NNH), Hazard Ratios	140
29. Evidence-Based Medicine	143
30. Recent Advances in Medical Research Administration in India	147
31. Present Effectively	151
32. Meta-analysis in Medical Research	155
33. Design and Execution of Clinical Trials	160
34. Systematic Review	167
35. Double Blind Randomized Clinical Trials	171
36. Interpreting Research Data	177
37. Publishing a Research Paper	182
38. Evaluating the Medical Literature	188
39. Effect Size	191
40. Survival Analysis	194
41. Uncontrolled Clinical Trials	197
42. Research Integrity	199
<i>Appendix 1: Commonly Used Terms in Medical Research</i>	201
<i>Appendix 2: Commonly Used Terms in Clinical Trials</i>	211
<i>Index</i>	219
