<i>Preface</i>	<i>vii</i>
<i>Introduction</i>	<i>xv</i>
<b>1. Congenital Heart Disease and its Risk Factors</b>	<b>1</b>
Introduction	1
Incidence and Causes	3
Adverse Genetic Risk Factors	3
Adverse Environmental Risk Factors	4
Congenital Heart Disease in More Detail	6
Foetal and Newborn Circulation and its Implications for Infants Born with Congenital Heart Disease	10
Diagnostic Tests	15
Non-Genetic Risk Factors	19
Summary of Treatment for Paediatric Congenital Heart Disease—Non Surgical Treatment	24
Surgical Treatment	26
Prognosis	27
<b>2. Understanding Congenital Heart Disease Diagnosis     and Classification</b>	<b>29</b>
Diagnosis	29
Sequential Segmental Classification	30
Determining the Situs	31
Identifying the Cardiac Position	32
Key Points of the Sequential Segmental Classification	38
<b>3. Nursing the Young Patient in Paediatric Cardiac     Surgery</b>	<b>47</b>
Introduction	47
Preoperative Nursing Care	47
Newborns and Infants	48
Toddlers	49
Preschool Age	50
School Age	50
Adolescent	51
Nursing and Premedication	52

#### **4. Perioperative Nursing in the Cardiac Operating Room 54**

Introduction	54
Assisting the Surgeon	54
Positioning the Patient	56
Cardiopulmonary Bypass Preparation	65
Incision	68
Cannulation and Cardiopulmonary Bypass	73
Going on Bypass	85
Coming off the Bypass Machine	87
Sequence for Assisting the Surgeon with Placing a Child on Cardiopulmonary Bypass	91
Sequence for Assisting the Surgeon with Discontinuation of Cardiopulmonary Bypass	95
Effects of Cardiopulmonary Bypass on Neonates and Infants	97
Peritoneal Dialysis Catheter	104
Ultrafiltration and Modified Ultrafiltration	104
Cardioplegia and Hypothermia	105
Circulatory Arrest	105
Defibrillation Paddles	106
Pacing the Heart	108
Delayed Chest Closure	112
Extracorporeal Membrane Oxygenation (ECMO)	112
Emergency Chest Reopening in the Neonatal Intensive Care Unit	115

#### **5. Nurses' Overview of Paediatric Cardiac Anomalies, Surgical Procedures and Techniques for Congenital Heart Defects 117**

Introduction	117
--------------	-----

##### **Section 1: When Chambers and Valves are in Normal Sequence and Normal Position and Shunting is Predominant 118**

Patent Ductus Arteriosus (PDA)	121
Patent Ductus Arteriosus Repair—Technique	127
Patent Foramen Ovale (PFO)	132
Atrial Septal Defect (ASD)	135
Atrial Septal Defect Repair—Technique	144
Ventricular Septal Defect (VSD)	149
Ventricular Septal Defect Repair—Technique	157
Atrioventricular Septal Defects (AVSDs)	161

Common Types of Atrioventricular Septal Defects	164
Atrioventricular Septal Defect Repair—Technique	166
<b>Section 2: When Chambers and Valves are in Normal Sequence and Normal Position and Stenosis or Obstruction is Predominant</b>	169
Univentricular Heart	169
Blalock-Taussig Shunt, Glenn and Fontan Procedure	171
Blalock-Taussig Shunt Procedure—Technique	174
Glenn Shunt Procedure—Technique	178
Extracardiac Fontan Procedure—Technique	185
Tricuspid Valve Stenosis or Atresia (Obstructed or Absent Atrioventricular Connection)	193
Ebstein Anomaly	195
Pulmonary Valve Stenosis or Atresia (Obstructed or Absent Ventriculoarterial Connection)	198
Pulmonary Stenosis / Atresia with a Ventricular Septal Defect	203
Pulmonary Stenosis / Atresia with Intact Ventricular Septal Defect	209
Mitral Valve Stenosis or Atresia (Obstructed or Absent Atrioventricular Connection)	210
Aortic Valve Stenosis or Atresia and Subaortic Membrane (Obstructed or Absent Ventriculoarterial Connection)	210
Subaortic Membrane (SAM)	215
Ross Procedure—Technique	220
Bentall Procedure—Technique	234
David Procedure—Technique	236
<b>Section 3: When Chambers and Valves are not in Normal Sequence and Normal Position—Atrioventricular Discordance and Ventriculoarterial Discordance</b>	240
Double Inlet Left ventricle and Double Inlet Right Ventricle (Atrioventricular Discordance)	240
Congenitally Corrected Transposition of the Great Arteries (Atrioventricular and Ventriculoarterial Discordance)	244
Tetralogy of Fallot (Ventriculoarterial Discordance)	251
Tetralogy of Fallot Repair—Technique	256
Double Outlet Right Ventricle (Ventriculoarterial Discordance)	260
Double Outlet Left Ventricle (Ventriculoarterial Discordance)	265

Truncus Arteriosus (Ventriculoarterial Discordance)	266
Truncus Arteriosus Repair—Technique	271
Transposition of the Great Arteries (Ventriculoarterial Discordance)	277
Transposition of the Great Arteries Repair—Technique	283
Rastelli Procedure—Overview	290
Nikaidoh Operation—Technique	294
DKS Procedure—Technique	301
<b>Section 4: Anomalies of the Great Arteries (Anomalies of the Pulmonary Artery and Aorta)</b>	302
Anomalous Origin of the Left Coronary Artery from the Pulmonary Artery	302
ALCAPA Repair—Technique	305
<b>Section 4.1: Anomalies of the Aorta</b>	311
Coarctation of the Aorta (CoA)	312
Coarctation of Aorta Repair—Technique	315
Interrupted Aortic Arch (IAA)	323
Aortopulmonary Window (APW)	329
Aortopulmonary Window Repair—Technique	331
Hypoplastic Left Heart Syndrome	332
Norwood Procedure—Technique	337
<b>Section 4.2: Anomalies of the Venous Connections</b>	
<b>Anomalies of Pulmonary Veins</b>	355
Partial and Total Anomalous Pulmonary Venous Return or Drainage (PAPVD, TAPVD)	355
PAPVD Repair—Technique	361
TAPVD (Supracardiac and Infracardiac) Repair—Technique	362
TAPVD (cardiac) Repair—Technique	363
Scimitar Syndrome	364
Repair of Scimitar Anomaly—Technique	365
<b>Section 5: Other Cardiac Anomalies</b>	367
Cor Triatriatum	367
Vascular Rings/Slings	368
Ectopia Cordis	372
<i>References</i>	373
<i>Index</i>	382
