Preface

v

Section 1: ANATOMY

1. Supraspinatus	3	31. Hamstring Muscles	35
2. Iliotibial Band	3	32. Posterior Interosseous Nerve	36
3. Brachial Plexus	4	33. Knee Joint	37
4. Tensor Fasciae Lata	5	34. Blood Supply to Talus	39
5. Ligaments of the Knee Joint	5	35. Distraction Osteogenesis	40
6. Talus	7	36. Erb's Point	41
7. Femoral Triangle	8	37. Foot Drop	42
8. Surgical Anatomy of Hip Joint	9	38. Radial Nerve	44
9. Lunate	11	39. Cross-section Anatomy of the Wrist	45
10. Scarpa's Triangle	12	40. Struthers' Ligament	46
11. Blood Supply to the Spinal Cord	12	41. Anterolateral Surgical Approach to Hip Joint	47
12. Sciatic Nerve	13	42. Femoral Anteversion	48
13. Synovial Plicae	14	43. Perforators of Thigh	49
14. Psoas Major	15	44. Endochondral Ossification	50
15. Extensor Mechanism of the Knee	16	45. Rotator Cuff Muscles	51
16. Arches of the Foot	17	46. Proximal Femur	51
17. Blood Supply to Femoral Head in Adult	18	47. Meniscus	53
18. Petit's Triangle and its Importance	19	48. Common Peroneal Nerve	54
19. Typical Lumbar Vertebrae and its Significance	19	49. Nutrient Artery	54
20. Ligament of Bigelow and its Importance	20	50. Shoulder Joint	55
21. Longus Colli	21	51. Corona Mortis	57
22. Anterior Cruciate Ligament	22	52. No Man's Land Zone 2	57
23. Scaphoid	22	53. External Rotators of the Hip	58
24. Axillary Artery	24	54. Transverse Acetabular Ligament	59
25. Ankle Joint	26	55. Small Muscles of the Hand	59
26. Vertebral Canal	28		
27. Posterior Approach to Hip Joint	28		
28. Posterior Cruciate Ligament Injury	30		
29. Collateral Ligament Injuries of the Knee	30		
30. Carpal Tunnel Syndrome	33		

Section 2: PHYSIOLOGY

1. Epiphyseal Growth	65
2. Wallerian Degeneration	66
3. Remodelling of Bone	66
4. Articular Cartilage and Regeneration	68

Section 3: BIOCHEMISTRY

26. Creatine Phosphokinase/Creatine Kinase	141
27. Anabolic Hormones of Bone	141
28. Total Parenteral Nutrition	142
29. Glucose Tolerance Test	143
30. Hyperlipidemia	144
31. Glucagon	144
32. Skeletal Muscle Structure	145
33. Adenosine Triphosphate	145
34. Hormones that Regulate Calcium Metabolism	146

Section 4: PHARMACOLOGY

1. Chemotherapy for Ewing's Sarcoma	151
2. Intra-articular Steroids	151
3. Immunomodulators	151
4. Allopurinol	153
5. Raloxifene	153
6. Interferon Alpha	154
7. Low Molecular Weight Heparin	154
8. Tamoxifen Citrate	155
9. Zoledronic Acid	155
10. Diclofenac Sodium	156
11. Isoniazid	157
12. Cisplatin	157
13. Methylprednisolone	158
14. Bisphosphonates: Action and Uses	160
15. Baclofen: Action and Adverse Reactions	160
16. Indomethacin: Action and Application	161
17. Rifampicin	161
18. Teriparatide	162
19. Tramadol	162
20. Thromboprophylactic Drugs	163
21. Chemotherapy in Osteosarcoma	163
22. Chondroprotective Agents	164
23. Steroids	164
24. Febuxostat	166
25. Cefixime	166
26. Management of Anaphylactic Shock	166
27. Monoclonal Antibodies	167
28. Viscosupplementation	168
29. Pain Management in Arthroplasty	168
30. Lignocaine Toxicity	170

31. Biological Therapy in Treatment of Rheumatoid Arthritis	170
32. Immunosuppressive Drugs	171
33. Synthetic Bone Substitutes	171
34. Platelet-rich Plasma	172
35. Alendronate vs Teriparatide	172
36. Antitubercular Drugs	173
37. Methotrexate	174
38. Opioid Analgesics	175
39. Fourth-generation Cephalosporins	175
40. Metronidazole	176
41. Deep Vein Thrombosis: Prophylaxis and Management	176
42. Fluorouracil	177

Section 5: MICROBIOLOGY

1. Antibiotic Resistance	181
2. Rheumatoid Factor	181
3. Human Immunodeficiency Virus	183
4. Enzyme-linked Immunosorbent Assay	189
5. <i>Clostridium welchii</i>	189
6. Actinomycosis	191
7. SPOT Test	192
8. Beta-hemolytic Streptococci	192
9. Mycetoma	193
10. Methicillin-resistant <i>Staphylococcus aureus</i>	194
11. Bone Bank	195
12. <i>Clostridium tetani</i>	196
13. Hydatid Disease of Bone	197
14. Gas Gangrene	198
15. Application of BACTEC System	199
16. Segregation of Hospital Waste	199
17. Polymerase Chain Reaction	200
18. Multidrug-resistant Tuberculosis	202
19. Periprosthetic Infections in Orthopaedics	203
20. Gonococcal Arthritis	204
21. Sterilisation of Orthopaedic Implants	205
22. Nosocomial Infections	206
23. Flash Sterilization	207
24. Pseudomonas	208
25. Retrovirus	208

26. Seronegative Arthropathies	209
27. Sterilization of Metallic and Non-metallic Implants	211
28. Tetanus Prophylaxis and Prevention	211
29. Universal Precautions	212
30. Hepatitis B Virus	213
31. Reverse Transcription Polymerase Chain Reaction	214
32. Immunoglobulins	216
33. Autoclave Sterilization	217
34. <i>Mycobacterium tuberculosis</i>	217
35. T Lymphocytes	218
36. Recent Advances in Tuberculosis Diagnosis	218
37. Acid-fast Bacilli	219
38. Louis Pasteur	219

Section 6: PATHOLOGY

1. Bone Biopsy	223
2. Myositis Ossificans	224
3. Anaplasia	225
4. Heterotopic Calcification	227
5. Rheumatoid Nodules	228
6. Sickle Cell Trait	228
7. Tubercular Osteomyelitis	230
8. Syphilis	231
9. Tubercle	233
10. Role of Rheumatoid Nodules in Rheumatoid Arthritis	234
11. Tuberculosis of Spine	236

12. Osteoarthritis	237
13. Paget's Disease (Osteitis Deformans)	239
14. Osteonecrosis (Avascular Necrosis)	240
15. Pathogenesis of Chronic Osteomyelitis	241
16. Septic Arthritis	242
17. Fine Needle Aspiration Cytology	243
18. Plasma Cell	244
19. Acute Inflammation	245
20. Psoriatic Arthritis	246
21. Spinal Muscular Atrophy	246
22. Chondrosarcoma	247
23. Frozen Section	249
24. Histiocytosis	249
25. Fracture Healing	250
26. Immunohistochemistry	251
27. Granuloma	253
28. Hyperparathyroidism	254
29. Giant Cell Variants	256
30. Mucopolysaccharidosis	257
31. Marie Strumpell Disease	258
32. Fat Embolism Syndrome	259
33. Psoas Abscess	262
34. Systemic Lupus Erythematosus	263
35. Anti-citrullinated Protein Antibody	264
36. Virchow's Triad	265
37. Lyme Disease	266
38. Brown Tumours	267
39. Autoimmunity	267
40. Neonatal Osteomyelitis	269
