1919 1919	CONCINS	
0	Pre-requisite	1-4
Ch 1.	The Laplace Transforms	5-70
1.1	Introduction	5
1.2	The Laplace Transform	5
1.3	Linearity Property of Laplace Transformation	5
1.4	Existence of Laplace Transform	6
1.5	Laplace Transform of Some Elementary Functions	6
1.6	Translation or Shifting Theorems	15
1.7	Laplace Transform of Derivatives	23
1.8	Evaluation of Integrals	35
1.9	Some Important Special Functions	35
1.10	The Unit Step Function	52
	Comprehensive tables	66
Ch 2.	The Inverse Laplace Transforms	71-144
2.1	Introduction when an a substant of motanest a niller to not taking	71
2.2	Some inverse Laplace transforms	71
2.3	Properties of inverse Laplace transforms	72
2.4	Inverse Laplace transform of derivatives	94
2.5	Division by p	94
2.6	Multiplication by powers of p	95
2.7	Inverse Laplace transform of integrals	95
2.8	Convolution	102
2.9	The Heaviside expansion formula	103
	Comprehensive tables	136
Ch 3.	Applications of Laplace Transform to Solution of Differential Equation and Boundary Value Problems	145-234
3.1	Introduction	145
3.2	Solution of ordinary differential equation with Variable Coefficients	171
3.3	Solution of simultaneous ordinary differential equations	178
3.4	Application of Laplace transform to engineering problems	190
3.5	Applications of Laplace transform to solution of initial	
601-405	and boundary value problems	205
Ch 4.	Fourier Transform And Its Applications	235-318
4.1	Introduction	235
4.2	Fourier Sine and Cosine transforms	235
4.3	Relation between Fourier and Laplace transform	239
4.4	Fourier Transforms of the Derivative of a function	239
4.5	Finite Fourier transforms	264
4.6	Applications of Fourier transform	282
	Comprehensive tables	316

Ch 5.	Hankel and Mellin's Transforms	319-356
5.1	Introduction	319
5.2	Concepts of Bessel's Function	319
5.3	Some important recurrence relations	324
5.4	Some important results	324
5.5	Hankel transforms	325
5.6	The Hankel Transform of $\frac{d^2f}{du^2} + \frac{1}{u} \times \frac{df}{du} - \frac{n^2}{u^2} f$	327
57	Applications of Hankel transform to boundary value problems	333
5.8	The Finite Hankel transform	338
5.9	Mellin transforms	347
5.10	Inverse Mellin transform	347
31	Comprehensive tables	355
Ch 6	Application of Integral Transforms to Integral Equations	357-376
6.1		257
6.0	Application of Lonloss Transform to Datermine the solutions of	0 307
5.0.2	Voltorra Integral Equation with convolution type kernels	260
62	Application of Equation with convolution type kernels	300
0.3	application of Fourier Transform to determine the solution of	271
6.4	Singular Integral equations	371
0.4	Application of Mellin's transform to integral equations	372
0.0	Fox's integral equation	573
Ch 7.	Z-transforms	377-404
- 4	Introduction	377
1.1	a value of the second s	0.2
7.1 7.2	Z-transforms	377
7.1 7.2 7.3	Z-transforms Properties of Z-transform	377 377
7.1 7.2 7.3 7.4	Z-transforms Properties of Z-transform Z-transform of nf(n)	377 377 380
7.1 7.2 7.3 7.4 7.5	Z-transforms Properties of Z-transform Z-transform of nf(n) Z-transform of f(n)/n	377 377 380 380
7.1 7.2 7.3 7.4 7.5 7.6	Z-transforms Properties of Z-transform Z-transform of nf(n) Z-transform of f(n)/n Initial value theorem	377 377 380 380 381
7.1 7.2 7.3 7.4 7.5 7.6 7.7	Z-transforms Properties of Z-transform Z-transform of nf(n) Z-transform of f(n)/n Initial value theorem Final value theorem	377 377 380 380 381 381
7.1 7.2 7.3 7.4 7.5 7.6 7.7 7.8	Z-transforms Properties of Z-transform Z-transform of nf(n) Z-transform of f(n)/n Initial value theorem Final value theorem Partial sum theorem	377 377 380 380 381 381 381
7.1 7.2 7.3 7.4 7.5 7.6 7.7 7.8 7.9	Z-transforms Properties of Z-transform Z-transform of nf(n) Z-transform of f(n)/n Initial value theorem Final value theorem Partial sum theorem Convolution theorem of Z-transforms	377 377 380 380 381 381 382 382 382
7.1 7.2 7.3 7.4 7.5 7.6 7.6 7.7 7.8 7.9 7.10	Z-transforms Properties of Z-transform Z-transform of nf(n) Z-transform of f(n)/n Initial value theorem Final value theorem Partial sum theorem Convolution theorem of Z-transforms Inverse Z-transforms	377 377 380 380 381 381 382 382 382 382
7.1 7.2 7.3 7.4 7.5 7.6 7.7 7.8 7.9 7.10 7.11	Z-transforms Properties of Z-transform Z-transform of nf(n) Z-transform of f(n)/n Initial value theorem Final value theorem Partial sum theorem Convolution theorem of Z-transforms Inverse Z-transforms Evaluation of Inverse Z-transforms	377 377 380 380 381 381 382 382 382 382 382
7.1 7.2 7.3 7.4 7.5 7.6 7.7 7.8 7.9 7.10 7.11 7.12	Z-transforms Properties of Z-transform Z-transform of nf(n) Z-transform of f(n)/n Initial value theorem Final value theorem Partial sum theorem Convolution theorem of Z-transforms Inverse Z-transforms Evaluation of Inverse Z-transforms Solution of difference equation with constant coefficients by Z-transform	377 377 380 380 381 381 382 382 382 382 391 396
7.1 7.2 7.3 7.4 7.5 7.6 7.7 7.8 7.9 7.10 7.10 7.11 7.12 Ch 8.	Z-transforms Properties of Z-transform Z-transform of nf(n) Z-transform of f(n)/n Initial value theorem Final value theorem Partial sum theorem Convolution theorem of Z-transforms Inverse Z-transforms Evaluation of Inverse Z-transforms Solution of difference equation with constant coefficients by Z-transform Wave, Heat And Laplace Equations	377 377 380 380 381 381 382 382 382 382 382 391 396 405-484

8.10	Laplace equation in cylindrical coordinates	432
8.11	Laplace equation in spherical coordinates	433
8.12	Solution of two dimensional Laplace Equation : Separation of variables	435
8.13	Solution of Laplace equation of three dimensional	436
8.14	Parabolic differential equations	455
8.15	One Dimensional heat equation	455
8.16	Solution of one dimensional heat equation	457
8.17	Solution of two dimensional heat equation	457
8.18	Solution of three dimensional heat equation	458
8.19	Transmission line equations	459
Ch 9.	Fourier Series	485-554
9.1	Introduction	485
9.2	Periodic functions	485
9.3	Some important results	486
9.4	Determination of Fourier Coefficients: Euler's Formulae	487
9.5	Dirichlet's conditions	488
9.6	Fourier series for discontinuous functions	505
9.7	Change of interval	513
9.8	Half range series	522
9.9	Parsevel's identity for Fourier Series	533
9.10	Complex form of Fourier Series	536
	GLOSSARY	555-557
	COMPREHENSIVE TABLE FOR AREAS OF APPLICATION OF INTEGRAL TRANSFORMS	558

It is and a are rational numbers then, $\lim_{n \to \infty} \frac{x^n - a^n}{x^n - a^n} = \frac{m}{n} a^{n-n} (x, n)$
