<i>Foreword</i>	vii
<i>Preface</i>	ix
1. Introduction	1-13
1.1 Definition of Soil 1	
1.2 Definition of Soil Engineering 1	
1.3 Historical Review 1	
1.4 Soil Formation 3	
1.5 Soils of India 6	
1.6 Genetic Classifications of Indian Soils 11	
<i>References</i>	
2. Soil Mass and Preliminary Definitions	14-25
2.1 Soil-Mass 14	
2.2 Water Content 14	
2.3 Density and Unit Weight of Soil Solids 14	
2.4 Specific Gravity 15	
2.5 Voids Ratio and Porosity 16	
2.6 Degree of Saturation 17	
2.7 Density or Unit Weight of Soil Mass 17	
2.8 Density Index 21	
<i>References</i>	
3. Simple Soil Engineering Tests	26-60
3.1 Water Content 26	
3.2 Specific Gravity 28	
3.3 Particle-size Distribution 31	
3.4 Soil Consistency 41	
3.5 Voids Ratio 51	
3.6 Density Index 51	
3.7 Principal Types of Soil 52	
3.8 Properties of Soil Components ¹⁹ 53	
3.9 Identification and Description of Coarse-grained Soils 54	
3.10 Identification and Description of Fine-grained Soils 55	
<i>References</i>	
4. Classification of Soils	61-96
4.1 Particle-size Classification 61	

- 4.2 Highway Research Board Classification 63
- 4.3 ASTM Soil Classification 64
- 4.4 Indian Soil Classification 76
- 4.5 Potential Expansion 84
- 4.6 Addendum of Terms 92
- References*

5. Soil Structure 97-106

- 5.1 Soil Particles 97
- 5.2 Electrical Forces^{3,4} 98
- 5.3 Interparticle Forces in a Soil mass 100
- 5.4 Particle Arrangement in Coarse-grained Soils 102
- 5.5 Particle Arrangement in Clays 103
- 5.6 Particle Arrangement in Composite Soils 104
- References*

6. Soil Water 107-124

- 6.1 Structural Water 107
- 6.2 Adsorbed Water 107
- 6.3 Capillary Water 108
- 6.4 Free Water 115
- 6.5 Effective and Neutral Pressures 115
- 6.6 Equilibrium Water Content 119
- 6.7 Frost Action 121
- References*

7. Permeability 125-159

- 7.1 Head, Gradient and Poential 125
- 7.2 Darcy's Law 126
- 7.3 Validity of Darcy's Law 128
- 7.4 Other Formulae 131
- 7.5 Factors Affecting Permeability 135
- 7.6 Laboratory Determination of Permeability 139
- 7.7 Field Determination of Permeability 143
- 7.8 Average Permeability of Stratified Soil Masses 151
- 7.9 Capillarity-Permeability Test 154
- References*

8. Seepage, Flow net and Drainage 160-204

- 8.1 Seepage Pressure 160
- 8.2 Quick Condition 161

- 8.3 Laplace Equation 164
- 8.4 Flow Net and its Characteristics 166
- 8.5 Flow Net Construction 168
- 8.6 Flow Net for Anisotropic Soil 179
- 8.7 Deflection of Flow Lines at Interface of Dissimilar Soils 181
- 8.8 Application of flow Net 182
- 8.9 Phreatic Line in an Earth Dam 186
- 8.10 Piping 191
- 8.11 Protective Filter 195
- 8.12 Drainage 196
- References*

9. Soil Stress under Surface Loading 205-242

- 9.1 Boussinesq Equation 205
- 9.2 Vertical Pressure under a Uniformly Loaded Circular Area 212
- 9.3 Vertical Pressure under a Uniformly Loaded Rectangular Area 214
- 9.4 Vertical Pressure under a Line Load 216
- 9.5 Vertical Pressure under a Strip Load 220
- 9.6 Newmark's Chart 222
- 9.7 Equivalent Point Load Method 225
- 9.8 Two-to-one Method of Load Distribution 226
- 9.9 Load Acting below Surface 228
- 9.10 Maximum Shear 228
- 9.11 Westergaard Equation 232
- 9.12 Limitations of Elastic Formulae for Soils 238
- 9.13 Contact Pressure 238
- References*

10. Compressibility and Consolidation 243-302

- 10.1 Compressibility 243
- 10.2 Compression of Laterally Confined Soil 243
- 10.3 Compression of Undisturbed Specimen 247
- 10.4 Consolidation 249
- 10.5 Terzaghi's Theory of Consolidation 250
- 10.6 Consolidation Test 263
- 10.7 Consolidation Settlement 275
- 10.8 Secondary Consolidation 291
- 10.9 Consolidation Settlement - Further Considerations 293
- References*

11. Compaction	303-333
11.1 Definition	303
11.2 Laboratory Compaction Tests	303
11.3 Theory of Compaction and Factors Influencing Compacted Density	310
11.4 Effect of Compaction on Soil Properties	314
11.5 Measurement of Field Compaction	319
11.6 Field Compaction Methods	322
11.7 Placement Water Content	325
11.8 Field Compaction Control	327
<i>References</i>	
12. Shear Strength	334-417
12.1 Stress Analysis by Mohr Circle	334
12.2 Mohr's Strength Theory	337
12.3 Shear Strength of Soil	339
12.4 Direct Shear Test	342
12.5 Triaxial Compression Test ¹¹	346
12.6 Unconfined Compression Test	359
12.7 Shear Vane Test	363
12.8 Pore Pressure Parameters	364
12.9 Shear Strength of Saturated Cohesive Soils (Clays)	369
12.10 Shear Strength of Cohesionless Soil	382
12.11 Shear Strength of Saturated Silts	393
12.12 Shear Strength of Partly Saturated Clays and Other Composite Soils	393
12.13 Sensitivity and Thixotropy	396
12.14 Choice of Test Conditions and Shear Parameters	399
12.15 Hvorslev Shear Strength Parameters	403
<i>References</i>	
13. Earth Pressure and Retaining Structures	418-508
13.1 Definitions	418
13.2 Earth Pressure at Rest	421
13.3 Rankine's Earth Pressure Theory	422
13.4 The Wedge Theory of Earth Pressure	441
13.5 Rebhann's Graphical Method for Active Pressure	444
13.6 Culmann's Graphical Method for Active Pressure	458
13.7 Trial Wedge Method for Active Pressure	465
13.8 Wall with Broken Back	467
13.9 Wall with Submerged Backfill	469
13.10 The Wedge Theory for Cohesive Soil	471

- 13.11 The Wedge Theory for Passive Pressure 477
- 13.12 The Friction Circle Method for Passive Pressure 479
- 13.13 Design Requirements for Gravity Walls 482
- 13.14 Arching in Soils 486
- 13.15 Yield of Wall and Pressure Distribution 489
- 13.16 Strutted Excavations 491
- 13.17 Stability of Bottom of Excavation 493
- 13.18 Sheet Pile Walls 495
- 13.19 Cofferdams 501

References

14. Stability of Slopes

509-563

- 14.1 Failure of Infinite Slope 509
- 14.2 Failure of Finite Slope 512
- 14.3 The Swedish Method 513
- 14.4 Slope Stability of Earth Dams 525
- 14.5 Friction Circle Method 531
- 14.6 Taylor's Stability Number 534
- 14.7 Bishop's Method of Pore Pressure Determination 538
- 14.8 Bishop's Method of Slope-stability Analysis 541
- 14.9 Non-circular Slip Surface 555

References

15. Shallow Foundations

564-644

- 15.1 Types of Foundations 564
- 15.2 Bearing Capacity 564
- 15.3 Rankine's Analysis 566
- 15.4 Terzaghi's Analysis 567
- 15.5 Choice of Shear Parameters 576
- 15.6 Skempton's Analysis 576
- 15.7 Bearing Capacity Factors 578
- 15.8 Terzaghi Equations-Revised Recommendations 580
- 15.9 Meyerhof's Analysis 583
- 15.10 General Bearing Capacity Equation 585
- 15.11 BIS Code Recommendations 592
- 15.12 Foundation on Two-layer Cohesive Soil 593
- 15.13 Foundation of Multilayer Deposit 595
- 15.14 Foundation On or Near Slope 597
- 15.15 Bearing Capacity and Settlement under Prequick Condition 602
- 15.16 Plate Loading Test 604

xviii CONTENTS

- 15.17 Standard Penetration Test 608
- 15.18 Static Cone Penetration Test 613
- 15.19 Safe Bearing Pressure 616
- 15.20 Bearing Capacity from Building Code 620
- 15.21 Depth of Foundation 622
- 15.22 Settlement of Foundations 622
- 15.23 Relative Settlement of Plate and Foundation 627
- 15.24 Settlement by SPT-Alpan Method 628
- 15.25 Arnold Method of Settlement Prediction 632
- References*

16. Deep Foundations

645-701

- 16.1 Definitions 645
- 16.2 Classification of Piles 645
- 16.3 Pile Driving 646
- 16.4 Bearing Capacity of Piles 647
- 16.5 Dynamic Formulae 647
- 16.6 Static Formulae 652
- 16.7 Pile Loading Tests 653
- 16.8 Penetration Test 656
- 16.9 Pile Groups 657
- 16.10 Dynamic Formulae 659
- 16.11 Pile Bearing Capacity Factors 661
- 16.12 Static Formula 663
- 16.13 Pile Loading Tests 666
- 16.14 Group Action 668
- 16.15 Caissons 671
- 16.16 Well Foundations 672
- 16.17 Sinking of Wells 683
- 16.18 Wells in Cohesionless Soil 688
- 16.19 Wells in Cohesive Soil 693
- 16.20 Bearing Capacity of Well 696
- References*

17. Pavements

702-724

- 17.1 Structural Elements of Pavement 702
- 17.2 Types of Pavement 702
- 17.3 Failure of Pavement 703
- 17.4 Design Methods 703
- 17.5 Wheel Load 704

- 17.6 Group Index Method 705
- 17.7 California Bearing Ratio Method 706
- 17.8 North Dakota Cone method 712
- 17.9 Shear Strength Method 714
- 17.10 Modulus of Subgrade Reaction 715
- 17.11 Rigid Pavements 717
- 17.12 Soil-Cement Pavements 719
- 17.13 Some Correlations 720

References

18. Soil Stabilisation

725-764

- 18.1 Mechanical Stabilisation 725
- 18.2 Water Retentive Chemicals 734
- 18.3 Cement Stabilisation 736
- 18.4 Lime Stabilisation 743
- 18.5 Bitumen Stabilisation 744
- 18.6 Miscellaneous Chemicals 748
- 18.7 Complex Stabilisation 749
- 18.8 Thermal Stabilisation 749
- 18.9 Electrical Stabilisation 750
- 18.10 Stabilisation by Grouting 750

References

19. Expansive Soils and their Engineering Problems

765-787

- 19.1 Identification of Expansive Soils 765
- 19.2 Swelling Pressure 768
- 19.3 Black Cotton Soils 771
- 19.4 Stabilisation of Expansive Soils 773
- 19.5 Foundations in Expansive Soils 774

References

20 Site Investigations

788-819

- 20.1 Preliminary Work 788
- 20.2 Site Reconnaissance 788
- 20.3 Site Exploration 789
- 20.4 Phasing of Site Exploration 793
- 20.5 Excavation and Boring Methods of Subsurface Exploration¹⁰ 794
- 20.6 Types of Soil Samples 798
- 20.7 Design Features of Sampler Affecting Sample Disturbance 798
- 20.8 Types of Samplers 799

- 20.9 Procuring and Handling of Disturbed Samples¹⁰ 801
- 20.10 Procuring and Handling of Undisturbed Samples 804
- 20.11 Ground Water Observation 807
- 20.12 Record of Boring 808
- 20.13 Subsurface Soundings 810
- 20.14 Geophysical Exploration 813
- References*

21. Russian Practices 820-857

- 21.1 Classification of Soils 820
- 21.2 Subsident and Dilative Soils 822
- 21.3 General Deformation Modulus 823
- 21.4 Settlement of Foundations 826
- 21.5 Equivalent Stratum Method 832
- 21.6 Design Criteria for Foundations 840
- 21.7 Field Determination of Permeability 843
- References*

22. Some Regional Soils 847-857

- 22.1 Bombay Marine Clays 847
- 22.2 Rann of Kutch Marine Clays 848
- 22.3 South-East Asian Marine Clays 848
- 22.4 Laterites 850
- 22.5 Rajasthan Dune Sands 853
- 22.6 Bangladesh Soils 853
- References*

23. Some Aspects of Earth Dams 858-874

- 23.1 Types of Dams 858
- 23.2 Basic Design Requirements 859
- 23.3 Dam Section 859
- 23.4 Seepage Control 866
- 23.5 Piping and Heave 872
- 23.6 Control of Cracking 873
- References*

4. Stress Path Method 875-887

- 24.1 Stress Point and Stress Path 875
- 24.2 K_0 and K_r Lines 877
- 24.3 Typical Stress Paths 879
- 24.4 Principles of Stress Path Method 886
- 24.5 Application and Methodology 86
- References*

25. Machine Foundations	888-921
25.1 Modes of Vibration	888
25.2 Basic Concept of Vibration	889
25.3 Wave Propagation in Soil	902
25.4 Types of Machines and Foundations	903
25.5 Design Requirements	904
25.6 Design Methods	906
25.7 Barkan Method	907
25.8 Elastic Half Space Method	911
25.9 Lumped Parameter Method	915
<i>References</i>	
26. Laterally Loaded Piles	922-954
26.1 Subgrade Reaction Theory	922
26.2 Short and Long Piles	924
26.3 Approximate Methods for Ultimate Resistance and Deflection	926
26.4 Ultimate Resistance of Pile in Cohesive Soil	927
26.5 Ultimate Resistance of Piles in Cohesionless Soil	932
26.6 Deflection of Piles in Cohesive Soil	937
26.7 Deflection of Piles in Cohesionless Soil	940
26.8 Elastic Analysis	947
<i>References</i>	
Addendum	955-958
Index	959-973
