Preface

vii

Chapter 1: Introduction to the Human Body 1

Introduction 1
Important Terms 1
Anatomy and Physiology Subjects are Studied Together 2
Classification of Human Beings 2
Levels of Body Organization 2
Description and Functions of Organ Systems 4
Regional Anatomy and Anatomical Positions 6
Body Parts 6
Body Regions 6
Important Directional Terms 7
Body Planes 8
Body Cavities 9
Body Membranes 10
Visceral Organs (Viscera) 12
Mesentery 15
Homeostasis 16
Major Factors that Cause Diseases 17
Pathophysiology and Pathology 17
Radiology 17
Horizontal Integration of the Premedical Subjects 17
Bibliography 18
Multiple Choice Questions (MCQs) 18
Match the Columns 19

Chapter 2: Cell Structure, Functions and Tissues 20

Cell 20
Eukaryotic Cell 20
Cell Organelles 21
Cell Components Involved in Protein Synthesis and Transmission of Hereditary Characters 24
Cell Division 27
Mitosis 27
Cellular Injury and Death of Cells 29
Transport of Substances Across the Cell Membrane 29
Tissues 31
Epithelial Tissues 32
Connective Tissues 36
Muscle Tissue 41
Nervous Tissue 42
Bibliography 44
Multiple Choice Questions (MCQs) 44
Match the Columns 46

Chapter 3: Integumentary System 47

Introduction 47
Components of the Integumentary System 47
Hair 52

Nails 53
Sudoriferous Glands 53
Sebaceous Glands 54
Ceruminous Glands 54
Physiology of the Integumentary System 55
Pathophysiology 57
Hair Disorders 60
Nail Disorders 61
Disorders of Skin Glands 62
Regulation of Body Temperature 62
Wound Healing 64
Bibliography 66
Multiple Choice Questions (MCQs) 66
Match the Columns 67

Chapter 4: Skeletal System 68

Introduction 68
Functions of Bones 68
Microscopic Structure of Bone 68
Cross Section of Bone 69
Parts of Bones 69
Types of Bones 71
Axial Skeleton 72
Hyoid Bone and Auditory Ossicles 74
Vertebrae 75
Ribs and Sternum 77
Appendicular Skeleton 78
Pectoral Girdle and upper limb bones 78
Pelvic Girdle and Lower Limb bones 80
Patella (Knee Cap) 82
Articulations 83
Skeletal System Physiology 84
Skeletal Homeostasis 85
Bone Fractures 85
Healing of Bone Fracture 85
Main Diseases Related to Bones 86
Bibliography 87
Multiple Choice Questions (MCQs) 87
Match the Columns 88

Chapter 5: Muscular System 89

Introduction 89
Muscle Types 89
Functions of the Muscles 90
Muscle Names 90
Muscle Actions 91
Names of Skeletal Muscles 92
Group Actions in Skeletal Muscle 95

Gross Anatomy of a Skeletal Muscle 96
 Important Skeletal Muscles 98
 Muscles of the Back 100
 Muscles of the Shoulder and the Upper Limb 106
 Muscle Physiology 114
 Important Muscle Diseases 116
 Bibliography 117
 Multiple Choice Questions (MCQs) 117
 Match the Columns 118

Chapter 6: Nervous System 119

Introduction 119
 Functions of the Nervous System 120
 Central Nervous System 121
 Brain 121
 Ganglia 123
 Brain Components and Functions 125
 Cerebrum 126
 Diencephalon 129
 Limbic System 129
 Cerebellum 131
 Brain Waves as Recorded in an Electroencephalogram 132
 Peripheral Nervous System (PNS) 135
 Somatic Nervous System 136
 Autonomic Nervous System (ANS) 136
 Sympathetic Nervous System (SNS) 137
 Nerve Structure 142
 Neurotransmitters 143
 Neuron Physiology 144
 Neuromuscular Disorders 148
 Bibliography 150
 Multiple Choice Questions (MCQs) 150
 Match the Columns 153

Chapter 7: Sense Organs 154

Introduction 154
 Skin 154
 Eye 154
 Accessory Structures of the Eye 155
 Anatomical Structure of the Eyeball 158
 Cornea 159
 IRIS 160
 Pupil 161
 Sclera 161
 Choroid 162
 Ciliary Body 162
 Eye Lens 163
 Anatomy of Lens 163
 Retina 163
 Blood Supply of the Eye 165
 Eye Physiology 166
 Refractory Errors (Refractive Errors) of the Eye 166
 Eye Colours 167
 Eye Disorders 168
 Eye Infections 170
 Eye Cancers 172

Ear 173
 Ear Physiology 177
 Disorders of the Ear 178
 Infections of Ear 179
 Nose 180
 Physiology of Smell 181
 COVID-19 182
 Sinuses 182
 Throat 182
 Tongue 183
 Tongue Diseases 185
 Bibliography 186
 Multiple Choice Questions (MCQs) 186
 Match the Columns 189

Chapter 8: Cardiovascular System 190

Introduction 190
 Anatomy of the Heart 191
 Pericardium 195
 Blood Vessels 196
 Objectives 203
 Cardiac Cycle 203
 Effects of Advancing Age on Cardiovascular System 209
 Bibliography 210
 Multiple Choice Questions (MCQs) 210
 Match the Columns 212

Chapter 9: Blood 213

Introduction 213
 Erythropoiesis 214
 Erythrocytes 214
 Leukopoiesis 215
 Thrombopoiesis 217
 Platelets 217
 Anemia 219
 Human Blood Group Systems 219
 Rhesus Blood Group System 219
 Hemostasis 220
 Mechanism of Blood Coagulation: Coagulation Cascade 220
 Blood Plasma 221
 Hematological Disorders 222
 Thalassemias 223
 Leukemias 224
 Bibliography 225
 Multiple Choice Questions (MCQs) 225
 Match the Columns 226

Chapter 10: Lymphatic System 227

Introduction 227
 Lymph 227
 Spleen 229
 Thymus Gland 231
 Appendix 233
 Lymphatic Diseases 233
 Bibliography 234
 Multiple Choice Questions (MCQs) 234
 Match the Columns 234

Chapter 11: Respiratory System **235**

Introduction 235
Parts of the Respiratory System 235
Lungs 241
Physiology of Respiration 243
Respiratory Tract Infections (RTIs) 245
COVID-19 247
Bibliography 248
Multiple Choice Questions (MCQs) 248
Match the Columns 249

Chapter 12: Digestive System **250**

Introduction 250
Mouth 251
Salivary Glands 251
Mumps 252
Tongue 252
Teeth 252
Teeth Diseases 254
Gums (Gingiva) 255
Esophagus 257
Stomach 258
Small Intestine 263
Large Intestine 266
Liver 271
Liver Functions 273
Pancreas 274
Peritoneum 277
Hernia 277
Physiology of Digestion 279
Physiology of Absorption of Digested Food 280
Effects of Ageing on the Gastrointestinal (GI) System 280
General Diseases of the Gastrointestinal Tract 281
Diseases of Pancreas 284
Bibliography 285
Multiple Choice Questions (MCQs) 285
Match the Columns 288

Chapter 13: Urinary System **289**

Introduction 289
Kidneys 289
Functional Microunits of Kidney 294
Kidney Functions 296
Physiology of Kidney 297
Renin–Angiotensin–Aldosterone System (RAAS) 298

Index

Diseases of the Kidneys 300
Bibliography 302
Multiple Choice Questions (MCQs) 302
Match the Columns 304

Chapter 14: Reproductive System **305**

Introduction 305
Male Reproductive System 306
Morphology of Human Spermatozoa 309
Female Reproductive System 311
Vagina 312
Menstruation 319
Menstrual Cycle 319
Contraception 326
Effects of Aging on Reproductive Systems 328
Common Disorders of Male Gonadal Function 328
Common Disorders of Female Gonadal Function 329
Sexually Transmitted Diseases (STDs) (Venereal Diseases) 330
Bibliography 334
Multiple Choice Questions (MCQs) 334
Match the Columns 336

Chapter 15: Endocrine Systems **337**

Introduction 337
Hypothalamus 338
Pituitary Gland 342
Thyroid Gland 343
Thyroid Diseases 345
Parathyroid Glands 346
Diseases of Parathyroid Glands 346
Adrenal Glands (Suprarenal Glands) 347
Hormones of the Adrenal Glands 349
Adrenal Gland Disorders 349
Pineal Gland 350
Bibliography 351
Multiple Choice Questions (MCQs) 352
Match the Columns 354

Chapter 16: Practicals **355**

Compound Microscope 355
Setting up of the Microscope 357
Areolar Connective Tissue 359
Complete Hemogram 367
Clinical Significance 370
Bibliography 376

377
