<i>Preface to the Second Edition</i>	<i>v</i>
<i>Preface to the First Edition</i>	<i>vii</i>
<i>Syllabus</i>	<i>xix</i>
CHAPTER 1: Introduction to Medicinal Chemistry	1–3
CHAPTER 2: QSAR and Drug Design	4–27
1. Introduction	4
2. Parameters	5
2.1 Lipophilic Parameters	6
2.2 Polarizability Parameters	13
2.3 Electronic Parameters	14
2.4 Steric Substitution Constant	16
2.5 Other Parameters	18
3. Quantitative Models	18
3.1 Hansch Analysis	19
3.2 Free Wilson Analysis	22
3.3 The Fujita-Ban Modification	23
3.4 Mixed Approach	24
3.5 The Topliss Decision Tree	24
CHAPTER 3: Prodrugs	28–51
1. Introduction	28
2. Utility of Prodrugs	29
3. Ideal Requirements of Prodrugs	31
4. Types of Prodrugs	31
4.1 Carrier Linked Prodrug	31
4.2 Bio-precursor of Prodrug	36
5. Applications of Prodrugs	38
5.1. Pharmaceutical Applications	38
5.2 Pharmacological Applications	41

CHAPTER 4: Combinatorial Chemistry	52–60
1. Introduction	52
2. Solid Phase Synthesis	53
2.1 Parallel Synthesis	56
2.2 Mix and Split Technique	56
3. Solution Phase Synthesis	58
4. Screening	59
5. Applications	60
CHAPTER 5: Computer Aided Drug Design	61–71
1. Introduction	61
2. Various Models	61
2.1 Molecular Modeling	61
2.2 Creating a Molecular Model using Molecular Mechanics	65
2.3 Molecular Dynamics	67
2.4 Quantum Mechanics	69
2.5 Hybrid QM/MM	71
CHAPTER 6: Antisense Drugs	72–76
1. Introduction	72
2. Design of Antisense Drug	73
2.1 Structure Consideration	74
3. Drug Therapy	75
CHAPTER 7: Local Anti-infective Agents	77–94
1. Introduction	77
2. Classification	77
2.1 Alcohols and Related Compounds	78
2.2 Aldehydes	79
2.3 Phenols and their Derivatives	80
2.4 Oxidizing Agents	85
2.5 Halogen-Containing Compounds	86
2.6 Cationic Surfactants	88
2.7 Dyes	91
2.8 Mercury Compounds	94
CHAPTER 8: Preservatives	95 – 100
1. Introduction	95
2. Classification	95
2.1. Acids	95

2.2. Esters	96
2.3. Alcohols	99
2.4. Phenols	99
2.5. Mercurial Compounds	99
2.6. Quaternary Ammonium Compounds	100
CHAPTER 9: Antifungal Agents	101–122
1. Introduction	101
2. Classification	103
2.1. Fatty Acids	104
2.2 Phenols and their Derivatives	104
2.3 Nucleoside Antifungals	106
2.4 Antifungal Antibiotics	108
2.5 Allyamine and Related Compounds	112
2.6 Azole Antifungal Agents	113
2.7 Newer Antifungal Agents	121
CHAPTER 10: Urinary Tract Anti-infective Agents	123–136
1. Introduction	123
2. Classification	123
2.1 Sulfonamides	124
2.2 Quinolones	124
2.3 Nitrofurans	133
2.4 Methenamine and its Salts	135
CHAPTER 11: Antitubercular Agents	137–144
1. Introduction	137
2. Classification	138
2.1 First Line Agents	138
2.2 Second Line Agents	141
CHAPTER 12: Antiviral and AntiAIDS Agents	145–169
1. Introduction	145
2. Classification	148
2.1 Purine Nucleoside and Nucleotide	149
2.2 Pyrimidine Nucleoside and Nucleotide	154
2.3 Miscellaneous Agents	155
3. Anti-HIV Agents	156
3.1 Reverse Transcriptase (RT) Inhibitors	156
3.2 Non-Nucleoside RT Inhibitors	161

3.3 HIV Protease Inhibitors	163
3.4 Neuroamidase Inhibitors	169
CHAPTER 13: Antiprotozoal Agents	170–176
1. Introduction	170
2. Classification	170
2.1 Intestinal Amoebiasis	170
2.2 Extra Intestinal Amoebiasis	172
2.3 Both Intestinal and Extra Intestinal Amoebiasis	173
CHAPTER 14: Anthelmintics	177–186
1. Introduction	177
2. Classification	177
2.1 Piperazines	178
2.2 Benzimidazole	179
2.3 Heterocyclics	182
2.4 Natural Products	183
2.5 Vinyl Pyrimidines	184
2.6 Amide	185
2.7 Imidazo Thiazole	186
CHAPTER 15: Antiscabious and Antipedicular Agents	187–189
1. Introduction	187
CHAPTER 16: Antibacterial Sulphonamides	190–209
1. Introduction	190
1.1 Nomenclature of Sulphonamides	191
1.2 General Properties	191
1.3 Crystalluria and the pKa	191
1.4 Mechanism of Action	192
1.5 Structure Activity Relationship	193
1.6 Therapeutic Uses	194
2. Classification	195
2.1 Sulphonamides for General Infections	199
2.2 Sulphonamides for Intestinal Infections	203
2.3 Sulphonamides for Local Infections	204
2.4 Sulphonamides for Dermatitis	205
2.5 Sulphonamides for Urinary Tract Infection	206
2.6 Sulphonamide Combinations	208

CHAPTER 17: Antimalarials	210–222
1. Introduction	210
2. Classification	212
2.1 Cinchona alkaloids	212
2.2 4-Aminoquinolines	213
2.3 8-Aminoquinolines	216
2.4 Pyrimidine Analogues	218
2.5 Sesquiterpene Lactone	220
2.6 Miscellaneous	221
CHAPTER 18: Antibiotics	223–269
1. Introduction	223
2. Classification	224
2.1 β -Lactam Antibiotics	225
2.2 Aminoglycoside Antibiotics	245
2.3 Tetracyclines	251
2.4 Macrolide Antibiotics	258
2.5 Lincomycins	261
2.6 Polypeptide Antibiotics	262
2.7 Nitrobenzene Derivative	265
2.8 Steroidal Antibiotic	268
2.9 Miscellaneous	269
CHAPTER 19: Antineoplastic Agents	270–311
1. Introduction	270
2. Classification	272
2.1 Alkylating Agents	274
2.2 Antimetabolites	282
2.3 Antibiotics	290
2.4 Plant Products	296
2.5 Enzymes	300
2.6 Hormones	300
2.7 Immunotherapy	305
2.8 Cytoprotective Agents	306
2.9 Antineoplastic Platinum Compounds	307
2.10 Tyrosine Kinase Inhibitors	309
2.11 Protein Kinase Inhibitors	310
2.12 Topoisomerase Inhibitors	310
2.13 Miscellaneous	311

CHAPTER 20: Antihypertensive Agents	312–344
1. Introduction	312
2. Classification	313
2.1 Angiotensin Converting Enzyme (ACE) Inhibitors	314
2.2 Angiotensin Antagonist	320
2.3 Calcium Channel Blockers	323
2.4 Diuretics	331
2.5 β -Adrenergic Blockers	331
2.6 Mixed α and β -Adrenergic Blockers	336
2.7 α -Adrenergic Blockers	338
2.8 Centrally Acting Sympatholytic Agents	339
2.9 Vasodilators	340
2.10 Adrenergic Neuron Blockers	344
CHAPTER 21: Cardiovascular Agents	345–366
1. Drugs for the Treatment of Congestive Heart Failure (or) Cardiac Agents	345
1.1 Cardiac Glycosides	345
2. Drugs for the Treatment of Angina Pectoris (or) Antianginal Agents	351
2.1 Introduction	351
2.2 Classification	352
2.3 Potassium Channel Opener	355
2.4 Miscellaneous	356
3. Drugs for the Treatment of Cardiac Arrhythmias (or) Antiarrhythmic Drugs	358
3.1 Introduction	358
3.2 Classification	358
3.2.1 Membrane Stabilizing Agents	359
3.2.2 β -Adrenergic Blocking Agents	364
3.2.3 Repolarization Prolongators	365
3.2.4 Calcium Channel Blockers	366
CHAPTER 22: Antihyperlipidemic Agents	367–378
1. Introduction	367
2. Classification	368
2.1 HMG-CoA Reductase Inhibitors	368
2.2 Fibrin acid Derivatives	371
2.3 Bile acid Sequestrants	375
2.4 LDL Oxidation Inhibitors	376

2.5 Pyridine Derivatives	376
2.6 Cholesterol Absorption Inhibitors	377
2.7 Miscellaneous Agents	378
CHAPTER 23: Coagulants and Anticoagulants	379–388
1. Coagulants	379
1.1 Introduction	379
2. Anticoagulants	382
2.1 Introduction	382
2.2 Classification	383
2.2.1 <i>In vivo</i> Anticoagulants	383
CHAPTER 24: Endocrines	389–392
1. Introduction	389
1.1 Oxytocin	389
1.2 Vasopressin	390
CHAPTER 25: Hypoglycemic Agents	393–414
1. Introduction	393
1.1 Classification of Diabetes Mellitus	393
2. Insulin	395
2.1 Introduction	395
2.2 Biosynthesis of Insulin	396
2.3 Production of Insulin	399
2.4 Insulin Preparation	399
3. Oral Hypoglycemic Agents	403
3.1 Introduction	403
3.2 Classification	403
3.2.1 Sulfonyl Ureas	403
3.2.2 Biguanides	408
3.2.3 Meglitinides	408
3.2.4 Thiazolidinones	409
3.2.5 Alpha-Glucosidase Inhibitors	409
3.2.6 Aldose Reductase Inhibitors	411
3.2.7 Dipeptidyl Peptidase-4 (DPP-4) Inhibitors	412
3.2.8 GLP-1 Agonists	414
CHAPTER 26: Thyroid and Antithyroid Drugs	415–426
1. Thyroid Drugs	415
1.1 Introduction	415

1.2 Bio-synthesis of Thyroid Hormone	416
1.3 Conformational Properties of Thyroid Hormones	418
1.4 Synthetic–Thyroid Hormones	419
2. Anti-thyroid Drugs	422
2.1 Introduction	422
2.2 Classification	422
2.2.1 Thioureylenes	422
2.2.2 Ionic Inhibitors	425
2.2.3 Radioactive Iodine	426
2.2.4 Iodides	426
CHAPTER 27: Diuretics	427–445
1. Introduction	427
2. Classification	429
2.1 Thiazide and Hydrothiazide Diuretics	429
2.2 Carbonic Anhydrase Inhibitors	433
2.3 Sulphonamide Diuretics	436
2.4 Aldosterone Antagonists	439
2.5 High Ceiling or Loop Diuretics	439
2.6 Pyrazinoyl Guanidines	443
2.7 Miscellaneous Diuretics	444
CHAPTER 28: Diagnostic Agents	446–457
1. Introduction	446
2. Classification	446
2.1 Gall Bladder Function	447
2.2 Gastric Function	448
2.3 Liver Function	449
2.4 Ophthalmic Diagnostic Aids	450
2.5 Pancreatic Function	451
2.6 Kidney Function	451
2.7 Lymphatic System	452
2.8 Bronchial Airway Hyperacidity	453
2.9 Drug Hypersensitivity	453
2.10 Drugs Used in X-ray Contrast Medium	454
2.11 Miscellaneous	456
CHAPTER 29: Steroids and Related Compounds	458–495
1. Introduction	458
1.1 Structure and Stereochemistry	459

1.2 Nomenclature	460
1.3 Steroid Biosynthesis	461
1.4 Mechanism of Action	462
2. Sex Hormones	463
2.1 Androgens	463
2.2 Estrogens	469
2.3 Gestogens (Corpus Luteum Hormones)	477
3. Adrenocorticoids	481
3.1 Glucocorticoids	482
3.2 Mineralocorticoids	490
4. Oral Contraceptives	492
4.1 Types of Contraceptives	493
Index	497–504
