Foreword

vi

Preface

vii

1. Applied Anatomy of the Female Genital Organs	1
■ External female genitalia 1	
Vulva 1	
Vulval blood supply 2	
Vulval lymphatic drainage 3	
■ Internal female genitalia 3	
Vagina 3	
Vaginal blood supply 3	
Vaginal lymphatic drainage 3	
Nerve supply of vagina 3	
■ The uterus 3	
Blood supply of the uterus 5	
■ Lymphatic drainage 5	
Uterine supports 5	
■ The cervix 5	
■ Lymphatic drainage of cervix 6	
■ Fallopian tubes 6	
■ The ovary 7	
2. Development of Female Genital Organs and Its Congenital Anomalies	9
■ Introduction 9	
■ Development of the gonads 9	
■ Development of fallopian tubes, uterus, cervix and vagina 10	
■ Development of lower genital tract 11	
■ Development of external genitalia 12	
■ Congenital abnormalities 12	
Vulva 12	
Uterine anomaly 12	
Vaginal 15	
Fallopian tubes 15	
Ovaries 15	
Disorder of sex development (DSD) 15	
3. Gynecological Examination	18
■ Introduction 18	
■ Gynecological history taking 18	
■ The gynecological examination 21	
■ Performance of gynecological examination 21	
■ Abdominal examination 21	
■ Pelvic examination 25	
4. Puberty and Its Abnormalities	30
■ Definition 30	
■ Physical changes in puberty 30	
Female secondary sex characteristics 31	
Definition of puberty terminology 31	
Tanner stages 31	

- Hormonal changes of puberty 32
- Abnormal pubertal development 34

5. Menstruation

37

- Definition 37
- Hormones of menstrual cycle 37
- Hypothalamopituitary ovarian axis 39
- Hormonal changes in menstrual cycle 39
 - Ovarian cycle 39
 - Uterine or endometrial cycle 41
- Summary of menstrual cycle regulation 43
 - Normal limits of menstruation 44
- Clinical aspects and management of menstruation 44
 - Postponement or advancement of menstruation 45

6. Disorders of Menstruation—Abnormal Uterine Bleeding

47

- Introduction 47
- Types of menstrual disorders 47
 - Abnormal uterine bleeding 48
 - FIGO classification: causes of abnormal uterine bleeding 48
- Menorrhagia (heavy menstrual bleeding) 50
- Metrorrhagia (intermenstrual bleeding) 56
- Oligomenorrhea (infrequent menstrual bleeding) 56
- Polymenorrhea 56
- Hypomenorrhea 57

7. Dysfunctional Uterine Bleeding

59

- Definition 59
- Classification 59
- Pathophysiology 59
- History 60
- Physical examination 60
 - Diagnosis 60
- Investigations 61
- Treatment 61

8. Dysmenorrhea

65

- Introduction 65
- Classification 65
- Etiology 66
- Clinical presentation 66
 - Diagnosis of primary dysmenorrhea 66
 - Diagnosis of secondary dysmenorrhea 67
 - Investigation 67
- Treatment 68

9. Premenstrual Syndrome

71

- Definition 71
- Classification 71
 - Etiopathology 72
 - Diagnostic approach 72
- Diagnosis of PMS 72
- Diagnosis of PMDD 72
- Treatment 73

10. Primary Amenorrhea

75

- Definition 75
- Causes of primary amenorrhea 75

Diagnostic approach to a patient with primary amenorrhea 76

Investigations 77

- Secondary sexual development is good apart from amenorrhea 78
 - Congenital and anatomical abnormalities of vagina and uterus 78
 - Cryptomenorrhea 78
- Mayer-Rokitansky-Küster-Hauser (MRKH) syndrome 79
- Resistant ovary syndrome 80
- Androgen insensitivity syndrome 80
- Hypothalamic amenorrhea 80
- Pituitary amenorrhea 81
 - Turner's syndrome (gonadal dysgenesis) 82
 - Pure gonadal dysgenesis 83
 - XY gonadal dysgenesis (swyer's syndrome) 83
 - Mixed gonadal dysgenesis 84
- Constitutional delay in puberty 84
- Congenital adrenal hyperplasia 84

11. Secondary Amenorrhea

87

- Introduction 87
- Physiological amenorrhea 88
- Secondary amenorrhea 88
 - Definition 88
 - Pathophysiology 88
 - Causes 88
 - Diagnosis 89
 - Investigations 90
 - Approach to patient with secondary amenorrhea 92
 - Treatment 92

12. Polycystic Ovary Syndrome

96

- Definition 96
- Pathophysiology 96
- Symptoms and signs 96
- Diagnosis 97
- Investigations 98
- Treatment 98

13. Reproductive Tract Infections

102

- Introduction 102
- Types of infection 102
- Sites of reproductive tract infections 103
 - Candidiasis 103
- Bacterial vaginosis 104
- Iatrogenic infections of reproductive tract 106
- Sexually transmitted infections 107
 - Syndromic management of sexually transmitted infections 107
 - Syndromic management protocol 109
- Protocol for lower abdominal pain due to pelvic inflammatory disease 110
- Trichomonas vaginalis 117
- Gonococcal infection 117
- Chlamydia infection 118
- Syphilis 118
- Genital herpes 119
- Human papilloma virus (HPV) infection 120
- HIV infection 120
- Prevention of reproductive tract infections 121

14. Vaginal Discharge	124
■ Introduction	124
■ Causes of vaginal discharge	124
Clinical presentation	126
Syndromic management	127
Investigations	127
Treatment	127
Partner notification	128
15. Pruritus Vulvae and Other Vulval Lesions	130
■ Pruritus vulvae	130
Etiology	130
■ Clinical presentation	131
■ Differential diagnosis	131
■ Investigations	131
■ Treatment	132
■ Lichen sclerosus (lichen sclerosus ET atrophicus)	132
Lichen planus	132
Complications of pubic hair removal	133
Chronic vulval pain	133
Bartholin's gland cyst and abscess	133
16. Infertility	135
■ Definition	135
■ Epidemiology	135
■ Etiology	136
■ General guidance on evaluation of infertility	136
■ Male infertility	136
Definition/etiology	136
Evaluation of male partner	137
Investigations	138
WHO reference limit for normal semen analysis	138
Treatment approach	139
■ Female infertility	141
Etiology	141
Evaluation of female partner	142
The infertility evaluation	143
Assessment of ovulation	143
Assessment of tubal factors	145
Assessment of uterine factors	147
Cervical factors	148
Peritoneal factors	148
Ovarian reserve tests	148
Unexplained infertility	149
Treatment of female infertility	149
Treatment of anovulation	150
Treatment of tubal factor infertility	151
Treatment of cervical factor	152
Treatment of uterine factor	152
Treatment of peritoneal factor, infertility and endometriosis	153
Treatment of unexplained infertility	153
Assisted reproductive technology	153
■ In vitro fertilization (IVF) and embryo transfer (ET)	154
■ Gamet intrafallopian transfer (GIFT)	155
■ Intracytoplasmic sperm injection (ICSI)	155
■ Outcomes of ART	156

17. Endometriosis	159
■ Etiology 159	
■ Pathophysiology 160	
■ Clinical presentation 161	
■ Staging 163	
■ Differential diagnosis 163	
■ Investigations 164	
■ Treatment 164	
■ Prognosis 169	
18. Adenomyosis	171
■ Introduction 171	
■ Pathophysiology 171	
■ Risk factors 172	
■ Clinical presentation 172	
■ Investigations 173	
■ Differential diagnosis 173	
■ Treatment 173	
19. Chronic Pelvic Pain	175
■ Causes 175	
■ Diagnosis 176	
■ Investigations 177	
■ Treatment 178	
■ Sources of chronic pelvic pain 179	
Endometriosis 179	
Endosalpingiosis 179	
Pelvic inflammatory disease (PID) 179	
Adhesions 179	
Residual ovarian syndrome (ovarian remnant syndrome) 179	
Trapped ovarian syndrome (ovarian retention syndrome) 179	
Pelvic congestion syndrome 179	
Interstitial cystitis 180	
Irritable bowel syndrome 180	
20. Uterine Leiomyoma (Fibroid, Myoma, Fibromyoma)	182
■ Introduction 182	
■ Etiology 182	
■ Risk factors 183	
■ Classification 183	
■ Pathology 184	
■ Secondary changes 185	
■ Clinical features 186	
■ Differential diagnosis 188	
■ Investigations 189	
■ Treatment 190	
21. Benign Ovarian Lesions	195
■ Etiology 195	
■ Clinical presentation 198	
■ Differential diagnosis 199	
■ Investigations 199	
■ Complications of ovarian cysts 201	
Ovarian torsion 201	
Rupture 202	
Infection 203	
Hemorrhage 203	
Pseudomyxoma peritonei 203	
Malignant change 203	

- Treatment 203
- Prognosis 204

22. Precancerous Lesions of Cervix—Cervical Intraepithelial Neoplasia (CIN) 207

- Cervical anatomy review 207
- Human papilloma virus (HPV) and carcinogenesis 208
- Cervical intraepithelial neoplasia (CIN) 209
 - Natural history of CIN 211
- Clinical findings 211
- Screening for prevention of cervical cancer 211
- Initiation of screening 212
 - Discontinuation of screening 213
- The 2001 Bethesda system 213
- Diagnosis of CIN 214
- Prevention of CIN 216
- Management of histologic diagnosis of CIN 216

23. Cervical Cancer 221

- Definition 221
- Epidemiology 221
- Etiology 222
- Pathophysiology 222
- Primary prevention 223
- Clinical presentation 223
- Differential diagnosis 224
- Investigations 224
- Staging and prognosis 225
- Treatment approach 227
- Complications 229
- Modalities of treatment 230

24. Ovarian Malignancy 234

- Introduction 234
- Epidemiology 234
- Pathophysiology 235
- Classification 236
- Prevention 237
- Clinical presentation 237
- Investigations 238
- Staging 239
- Treatment approach 241
- Prognosis 244

25. Endometrial Carcinoma 246

- Etiology 246
- Pathology 247
- Clinical presentation 247
- Investigations 248
- Staging 249
- Treatment 250
- Prognosis 250

26. Gestational Trophoblastic Neoplasia 252

- Introduction 252
- Pathophysiology 252
- Clinical presentation 253
- Investigations 254

■ Work up 255 - Diagnosis 255 - Staging 255 - Prognostic scoring 255 - Treatment 255 ■ Follow up 257 ■ Prognosis 257	
27. Pelvic Organ Prolapse	259
■ Definition and types 259 ■ Etiology 260 ■ Supports of pelvic organs 262 ■ Clinical presentation 265 ■ Differentiation between rectocele and enterocele 267 ■ Stages of pelvic organ prolapse 267 ■ Differential diagnosis 267 ■ Investigations 268 ■ Prevention of pelvic organ prolapse 268 ■ Treatment approach 269 ■ Mesh 273	
28. Urinary Incontinence	277
■ Introduction 277 ■ Etiology 278 ■ Diagnostic approach 280 - Investigations 282 ■ Treatment 283	
29. Vesicovaginal Fistula	288
■ Introduction 288 ■ Etiology 288 ■ Classification 290 ■ Clinical presentation 291 ■ Investigations 291 ■ Prevention of vesicovaginal fistula 292 ■ Treatment 292	
30. Anal Incontinence—Old Complete Perineal Tear (CPT)	296
■ Introduction 296 ■ Perineal tear and old complete perineal tear 297 ■ Clinical presentation 297 ■ Differential diagnosis 299 ■ Investigations 299 ■ Preoperative preparation 299 ■ Surgical procedure 300 ■ Complications 301	
31. Menopause and Hormone Therapy	304
■ Introduction 304 ■ Pathophysiology 305 ■ Clinical effects of menopause 305 ■ Symptoms and signs 306 ■ Diagnosis 307 ■ Management of menopause 307	
32. Postmenopausal Vaginal Bleeding	311
■ Introduction 311 ■ Causes 312	

- Approach to a patient with postmenopausal bleeding per vagina 313
- Differential diagnosis 313
- Investigations 314
- Treatment 315

33. Contraception

318

- Introduction 318
- Counselling 318
- Contraceptive methods 319
- Contraceptive effectiveness 320
- Behavioural methods 320
- Barrier methods 321
- Hormonal contraception 323
- Combined oral contraceptive 323
- Contraceptive patch 328
- Contraceptive vaginal ring 328
- Combined injectable contraceptive 328
- Progestogen-only contraception 329
- Progestogen-only pill (POP) 329
- Progestogen injections 330
- Implant 331
- Intrauterine devices 331
- Female sterilization 337
- Male sterilization 340
- Emergency contraception (postcoital contraception) 342

34. Common Minor Gynecological Operations

347

- Dilatation and curettage 347
- Hysterosalpingography 351
- Cervical biopsy 353

35. Major Operations in Gynecology

357

- Consent for surgery 357
- Hysterectomy 358
- Steps of abdominal hysterectomy 359
- Steps of vaginal hysterectomy 360
- Postoperative management of hysterectomy patient 361
- Complications of hysterectomy 361
- Myomectomy 362
- Laparoscopy 363
- Hysteroscopy 367

36. Medical Termination of Pregnancy (MTP)

370

- Introduction 370
- Medical Termination of Pregnancy Act 370
- Methods of MTP 372
 - Methods of MTP first trimester 372
 - Medical abortion 372
 - Surgical termination of pregnancy 374
 - Methods of MTP in second trimester 376
 - Medical methods 376
 - Surgical methods 378
 - Complications of MTP 378

37. Instruments, Specimens and X-rays

382

- Instruments 382
- Specimens 389
- X-ray plates 393
