

# **Contents**

<b>Preface .....</b>	<b>V</b>
<b>1 Absorption of Drugs .....</b>	<b>1</b>
Introduction .....	1
Cell Membranes .....	1
Mechanisms of Drug Absorption .....	4
Factors Influencing Drug Absorption .....	13
Drug Absorption from routes other than Oral Route .....	47
<i>In vitro</i> Models of Absorption.....	59
<i>In Silico</i> Methods of Drug Absorption .....	71
Questions .....	72
<b>2 Distribution of Drugs .....</b>	<b>73</b>
Introduction .....	73
Factors Affecting Drug Distribution .....	73
Volume of Distribution .....	82
Protein Binding .....	84
Factors Affecting Protein Binding .....	87
Kinetics of Protein Binding .....	88
Tissue Binding .....	90
Drug Interactions .....	91
<i>In vitro</i> Models of Drug Distribution .....	92
Questions .....	93
<b>3 Drug Metabolism (Biotransformation) .....</b>	<b>94</b>
Introduction .....	94

---

Introduction to Phase I and Phase II Reactions .....	94
Phase I Reactions .....	95
Phase II Reactions .....	113
Factors Affecting Metabolism of Drugs .....	122
Bioactivation .....	125
First Pass Effect .....	127
<i>In Vitro</i> Models of Metabolism .....	127
Questions .....	131
<b>4 Excretion .....</b>	<b>132</b>
Introduction .....	132
Renal Excretion .....	132
Concept of Clearance .....	137
Factors Affecting Renal Excretion .....	140
Non-renal Routes of Elimination .....	143
Questions .....	149
<b>5 Prodrugs .....</b>	<b>150</b>
Introduction .....	150
Types of Prodrugs .....	150
Applications of Prodrugs .....	154
Questions .....	164
<b>6 Pharmacokinetics—Basic Considerations .....</b>	<b>165</b>
Introduction .....	165
Drug Concentration-Time Profile .....	165
Orders of Processes .....	167
Pharmacokinetic Models .....	171
Laplace Transformation .....	172
Questions .....	179
<b>7 One Compartment Model .....</b>	<b>180</b>
Introduction .....	180
Intravenous Injection .....	180
Intravenous Infusion .....	187
Loading and Maintenance Dose .....	192
First Order Absorption .....	193
Questions .....	197

<b>8 Multicompartment Model .....</b>	<b>198</b>
Introduction .....	198
Intravenous Injection .....	200
Intravenous Infusion .....	206
First Order Absorption (Extravascular Administration) ...	207
Multicompartment Model .....	208
Questions .....	209
<b>9 Nonlinear Pharmacokinetics .....</b>	<b>210</b>
Introduction .....	210
Michaelis Menten Equation .....	210
Clearance .....	220
Area Under the Curve .....	222
Enzyme Induction .....	223
Questions .....	225
<b>10 Non-Compartmental Analysis .....</b>	<b>226</b>
Introduction .....	226
Plasma concentration-Time Curve Parameters .....	227
Statistical Moments .....	228
Bioavailability .....	229
Clearance .....	230
Half Life .....	230
Absorption .....	231
Volume of Distribution .....	232
Questions .....	234
<b>11 Applications of Pharmacokinetics .....</b>	<b>235</b>
Dose Adjustment in Renal Failure .....	235
Multiple Dosing .....	238
Individualization .....	240
Questions .....	248
<b>12 Bioequivalence .....</b>	<b>249</b>
Introduction .....	249
Important Definitions .....	250
Bioequivalence Study Parameters .....	252
Bioequivalence Study Protocol .....	254

---

Study Design .....	255
Subjects .....	256
Bioanalysis of Samples .....	256
Reference and Test product .....	257
Statistical Methods .....	257
Reporting .....	257
Exemption .....	258
Where Bioequivalence Study is Irrelevant .....	258
Regulatory Requirements for Bioequivalence Studies .....	258
Good Clinical Practices in Bioequivalence .....	259
Questions .....	262
<b>13 Introduction to Bioanalysis .....</b>	<b>263</b>
Introduction .....	263
Basic Concepts of pH .....	263
Extraction of Drug From Plasma .....	265
Analytical Techniques in Bioanalysis .....	268
Bioanalytical Method Validation .....	270
Stability of the Analyte in Biological Fluid.....	274
Bioanalytical Method.....	275
<i>Appendix I .....</i>	277
Review of Basic Mathematics .....	277
Examples of Biopharmaceutical Calculations .....	283
<i>Appendix II .....</i>	288
<i>Index .....</i>	295
