Preface	v
---------------	---

Section 1 Obstetrics

1. Anatomy and Physiology of Female Genital Organs	3
2. Diagnosis of Pregnancy	12
3. Antenatal Care	16
4. Haemorrhage in Early Pregnancy	21
5. Ectopic Pregnancy	27
6. Antepartum Haemorrhage	29
7. Toxaemias of Pregnancy	33
8. Some Diseases in Pregnancy	38
9. Diseases of Genital Tract in Pregnancy	42
10. Preterm Labour; Post-term Pregnancy	45
11. Normal Labour	50
12. Complications of Third Stage Labour	59
13. Abnormal Presentation	62
14. Multiple Pregnancy: Hydramnios	76
15. Abnormal Umbilical Cord and Foetal Anomalies	80
16. Cephalopelvic Disproportion	83
17. Abnormal Uterine Contraction	85
18. Maternal Injuries in Labour	88
19. Puerperium	90
20. Operations in Obstetrics	94
21. Drugs Acting on Uterus	100

Section 2

Neonate Care

22. Care of the Newborn	103
-------------------------------	-----

Section 3

Gynaecology

23. Some Diagnostic Methods in Gynaecology	109
24. Puberty and Menopause	113
25. Disorders of Menstruation	118
26. Retroversion of Uterus, Genital Prolapse and Hypertrophy of Cervix	126
27. Infertility; Vaginismus; Dyspareunia, Frigidity	132
28. Fertility Control	136
29. Diagnosis of Sex; Intersex, Virilism, Hirsutism	145
30. Complete Perineal Tear, Uterine Inversion; RVF	147
31. Urinary Incontinence and Genitourinary Fistula	149
32. Pelvic Inflammatory Diseases	154
33. Uterine Fibroid and Endometriosis	162
34. Malignancies of Genital Tract	168
35. Ovarian Tumours/Radiotherapy/Chemotherapy	176
36. Backache, Pruritus Vulvae; Leukorrhoea	179
37. Paediatric and Geriatric Gynaecology	181
38. Oestrogen and Progesterone Hormone Therapy	182
39. Operations in Gynaecology	185
