<i>Preface</i>	v
<i>Color Plates 1–6</i>	<i>Between 48 and 49</i>
<i>Color Plates 7–16</i>	<i>Between 128 and 129</i>

THEORY

1. Horticulture: Definition, Branches, Importance and Scope	1
2. Horticulture and Botanical Classification	5
3. Soil and Climate for Horticultural Crops	10
4. Nursery Raising and its Importance	28
5. Plant Propagation Methods	38
6. Propagating Structures	51
7. Seed Dormancy and Seed Germination	57
8. Principles of Orchard Establishment	65
9. Principles and Methods of Training and Pruning	71
10. Juvenility and Flower Bud Differentiation	76
11. Unfruitfulness	79
12. Pollination, Pollinizers and Pollinators	84
13. Fertilization and Parthenocarpy	89
14. Medicinal and Aromatic Plants—Importance and Scope	93
15. Importance of Plant Bio-regulators in Horticulture	97
16. Irrigation Methods and Fertilizer Application in Horticultural Crops	101

PRACTICAL

Exercise 1: Identification of Garden Tools and their Uses	104
------------------------------------------------------------------	------------

Exercise 2: Identification of Horticultural Crops	108
Exercise 3: Preparation of Seed Bed/Nursery Bed	116
Exercise 4: Practice of Sexual and Asexual Methods of Propagation including Micropropagation	119
Exercise 5: Layout and Planting of Orchard	128
Exercise 6: Training of Fruit Trees	131
Exercise 7: Pruning of Fruit Plants	134
Exercise 8: Preparation of Potting Mixture	137
Exercise 9: Fertilizer Application in Different Horticultural Crops	140
Exercise 10: Visit Commercial Nurseries/Orchards	147
