<i>Foreword by MB Agarwal</i>	v
<i>Foreword by Shirish N Daftary</i>	vi
<i>Foreword by PK Shah</i>	vii
<i>Preface</i>	xi
1. Introduction	1
2. Red Blood Cells	2
Normal value	2
Morphology of red blood cells	2
Properties of red blood cells	3
Variations in number of red blood cells	5
Microcytes	7
Macrocytes	7
Anisocytes	7
Variations in shape of red blood cells	7
Variations in structure of red blood cells	8
3. Erythropoiesis	10
Definition	10
Site of erythropoiesis (Fig. 3.1)	10
Stages of erythropoiesis	12
Factors necessary for erythropoiesis	16
Maturation factors	17
Factors necessary for haemoglobin formation	18
4. Haemoglobin	19
Normal haemoglobin content	19
Functions of haemoglobin	19
Normal value and distribution of iron in the body	26
Dietary iron	27
Absorption of iron	28
Transport of iron	28
Storage of iron	28
Daily loss of iron	29
Regulation of total iron in the body	29
5. Haematological Changes in Pregnancy	30
6. Anaemia in Pregnancy	32
Introduction	32
Prevalence of anaemia in pregnancy	32

Erythropoiesis in pregnancy 32
Types of anaemia 33

7. Iron Deficiency Anaemia 35

Diet in relation to nutritional anaemia (Fig. 7.1) 34
Worm infestation 35
Multiple pregnancies 35
Effects of anaemia on pregnancy 35
Clinical features of iron deficiency anaemia 36
Investigation 37
Peripheral blood smear 37
RBC indices 38
Special investigation 38
Other investigation 38
Management 39
Anaemia Mukh Bharat 40
Management 41
Antenatal 41
Management of anaemia 42
Newer iron preparations 43
Indications 44
Important safety information 45
Antenatal care 49
Management of labour in anaemic patient 49
During puerperium 49
Contraception 50

8. Megaloblastic Anaemia in Pregnancy 51

Introduction 51
Pathophysiology 51
Clinical features 52
Diagnosis 52
Dimorphic anaemia 53
Folate deficiency 53
Vitamin B₁₂ deficiency 53

9. Haemolytic Anaemias 55

Microangiopathic haemolytic anaemia 56
HELLP syndrome 56

10. Haemoglobinopathies 58

Sickle cell disease (SCD) 58
Thalassaemia in pregnancy 60
Beta thalassaemia major 61

11. Aplastic Anaemia 63

Introduction 63

12. Platelet 65

Introduction 65
Structure and composition 65
Normal count and variations 68

Physiological variations	68
Properties of platelets	68
Functions of platelets	68
Role in blood clotting	69
Role in clot retraction	69
Role in prevention of blood loss (haemostasis)	69
Role in repair of ruptured blood vessel	69
13. Coagulation Cascade and Platelet Disorder in Pregnancy	70
Platelet disorder in pregnancy	72
14. Gestational Thrombocytopenia	74
15. Immune Thrombocytopenic Purpura (ITP)	76
16. Disseminated Intravascular Coagulation	79
Aetiology	79
Pathophysiology	80
Clinical features	80
Diagnosis	80
Management and treatment	81
17. Haematological Malignancy During Pregnancy	84
18. Blood and Blood Component Therapy	90
<i>Index</i>	<i>99</i>
