UNIT I BIOPHYSICS

Chapter 1 Biophysics 3–46

Introduction	7	Capacitance and Capacitor	26
Matter	8	Magnet	27
Adhesion and Cohesion	9	Magnetism	29
Viscosity	9	Eddy Current	30
Density	9	Conductors	30
Elasticity	10	Insulators	31
Atom	11	Rectifying Devices	31
Molecules	11	Semiconductors	33
Element	11	Amplifier	34
Compound	11	Transducers	35
Electricity	12	Display Devices	35
Effects of Current Electricity	18	Transformers	36
Electrical Supply	20	Chokes	37
Electric Shock	22	Electromagnetic Induction	38
Earthing	23	Electromagnetic Radiation	39
Electrical Burn	24	Heat	43

UNIT II HEATING AGENTS

Chapter 2 Shortwave Diathermy 49–74

Introduction	50	Contraindications	58
Circuits of Diathermy	51	Precautions	58
Principles of Application	52	Application Methods	59
Biophysical Characteristics	55	Procedure	64
Physiological Effects	55	Pulsed Shortwave Diathermy	64
Indications	57	Shortwave Diathermy versus Therapeutic Ultrasound	69
Clinical Uses	57		

Chapter 3 Microwave Diathermy 75–88

Introduction	76	Indications	82
Production	76	Contraindications	82
Physical Characteristics	78	Application Procedure	83
Physiological Effects	79	Safety	84
Clinical Uses	80	Hazards	85
2450 MHz MWD versus 915 MHz MWD	82		

Chapter 4 Ultrasound Therapy 89–117

Introduction	91	Precautions	103
Production	91	Contraindications	103
Physical Characteristics	92	Methods of Application	103
Physiological Effects of Therapeutic Ultrasound	97	Application Parameters	105
Clinical Uses	100	Phonophoresis	110
		Combination Therapy	111

Chapter 5 Paraffin Wax Bath Therapy 119–127

Introduction	119	Clinical Uses	122
Physical Characteristics of Paraffin Wax	119	Paraffin Wax Bath Unit	123
Physiological Effects	120	Application Procedure	123
Therapeutic Effects	121	Indications	125
		Contraindications	125

Chapter 6 Moist Heat Therapy 129–137

Introduction	130	Indications	133
Mechanism of Heat Transfer	130	Contraindications	133
Physiological Effects	130	Moist Heat Therapy Unit	133
Therapeutic Effects	131	Moist Hot Packs	134
Clinical Uses	132	Application Procedure	134

Chapter 7 Contrast Bath Therapy and Fluidotherapy..... 139–145**Contrast Bath Therapy 139**

Physiological Effects 140

Contrast Bath Unit 140

Application Procedure 141

Clinical Uses 141

Contraindications 142

Fluidotherapy 142

Physiological Effects 143

Indications 143

Contraindications 143

Application Procedure 143

UNIT III ACTINOTHERAPY**Chapter 8 Ultraviolet Radiation Therapy..... 149–162**

Introduction 150

Production 151

Physiological Effects 154

Clinical Uses 155

Determining Minimal

Erythema Dose 156

Doses Calculation 157

Treatment Procedure 158

Indications 159

Contraindications 159

Dangers and Adverse Effects of UVR 159

Chapter 9 Infrared Radiation Therapy 163–170

Introduction 164

Production 164

Physical Characteristics of

Infrared Radiation 165

Physiological Effects 166

Clinical Uses 166

Indications 167

Contraindications 167

Dangers 167

Application Procedure 168

UNIT IV THERAPEUTIC CURRENTS**Chapter 10 Faradic and Galvanic Currents 173–200**

Introduction 174

Faradic Current 175

Interrupted Galvanic Current 177

Physiological Effects of Faradic and

Galvanic Currents 178

Polarity 180

Therapeutic Uses 181

Indications 184

Contraindications 184

Application Procedure 185

Faradic Foot Bath 190

Faradism Under Pressure 191

Strength-Duration Curve 192

Reaction of Degeneration Test 195

Chapter 11 Iontophoresis, Russian Current and Diadynamic Current..... 201–211

Iontophoresis 201

Russian Current 205

Diadynamic Current 207

Chapter 12 Transcutaneous Electrical Nerve Stimulation 213–229

Introduction	214	Clinical Uses	220
Mechanism of Action	214	Contraindications and Precautions	222
Parameters	216	Electrode Placement	223
Transcutaneous Electrical Nerve Stimulation Modes	217	Application Procedure	226

Chapter 13 Functional Electrical Stimulation 231–240

Introduction	232	Indications	234
Principles	232	Contraindications	234
Physiological Effects	232	Application Procedure	234
Parameters	233		

Chapter 14 Interferential Therapy 241–253

Introduction	242	Contraindications	246
Production	243	Application Parameters	246
Physiological Effects	244	Application Procedure	249
Indications	245		

UNIT V MECHANICAL AGENTS

Chapter 15 Pneumatic Intermittent Compression Therapy 257–269

Introduction	258	Parameters	264
Fluid Exchange Mechanism	258	Doses	264
Edema Formation Mechanism	261	Clinical Uses	265
Physiological Effects	262	Indications	266
Intermittent Pneumatic Compression	263	Contraindications	267
		Procedure	267

Chapter 16 Traction 271–286

Introduction	272	Indications	275
Principles of Traction	272	Contraindications and Precautions	276
Types of Traction	273	Application Procedure	276
Mechanical Effects	274	Manual Cervical Traction	281
Traction Methods	274	Clinical Uses	281

Chapter 17 Extracorporeal Shockwave Therapy 287–296

Introduction	288	Indications	291
Production of Different Shockwaves	289	Contraindications and Risks	292
Physiological Effects	290	Application	292
		Application Procedure	294

UNIT VI LIGHT: A THERAPEUTIC HEALING AGENT

Chapter 18 Light Amplification by Stimulated Emission of Radiation 299–320

Introduction	300	Clinical Uses	310
Laser Classification	300	Application Parameters	313
Laser Production	301	Indications	315
Physical Characteristics	304	Precautions	315
Laser Types	308	Contraindications	315
Physiological Effects	309	Application Procedure	315

UNIT VII WATER: A THERAPEUTIC HEALING AGENT

Chapter 19 Hydrotherapy 323–338

Introduction	324	Contraindications	330
Biophysical Characteristics of Water	324	Adverse Effects	330
Physiological Effects	327	Hydrotherapy Pool	331
Clinical Uses	328	Application Procedure	333

Chapter 20 Cryotherapy 339–356

Introduction	340	Contraindications	346
Physiological Effects	340	Methods of Application	347
Indications	343		

UNIT VIII ELECTRODIAGNOSIS

Chapter 21 Electromyography 359–379

Introduction	361	Muscle Electrical Activity During Mild Contraction	375
Resting Membrane Potential	361	Muscle Electrical Activity at Maximal Contraction	376
Motor Unit	362	Indications	377
Equipment and Settings	365	Contraindications	377
Recording Electrodes	369		
Muscle Electrical Activity at Rest	371		

Chapter 22 Nerve Conduction Studies 381–398

Introduction	382	Median Sensory Nerve Conduction Studies	389
CMAP and SNAP	383	Radial Motor Nerve Conduction Study	390
Demyelination and Axonal Disorders	386	Radial Sensory Nerve Conduction Study	391
Measurement of Nerve Conduction Velocity	386	Ulnar Motor Nerve Conduction Study	392
Indications	387	Ulnar Sensory Nerve Conduction Study	392
Contraindications	387	Tibial Motor Nerve Conduction Study	393
Application Procedure	387	Peroneal Motor Nerve Conduction Study	394
Median Motor Nerve Conduction Studies	388	Superficial Peroneal Sensory Nerve Conduction Study	394

Chapter 23 Biofeedback.....	399–407
Introduction 400	
Principles 400	
Basic Instrumentation and Settings 401	
Electromyography Biofeedback Application Procedure 402	
Clinical Uses 402	
Indications 403	
Contraindications 404	
Advantages 405	
 <i>Appendix: Pain and Functional Limitation</i>	 <i>409–416</i>
<i>Index.....</i>	<i>417–424</i>
