Preface to the Second Edition

v

Preface to the First Edition

vii

Section I DRUGS AFFECTING SYNAPTIC AND NEUROEFFECTOR JUNCTIONAL SITES

1. Adrenergic Drugs 3–49

- Biosynthesis, Storage, and Release of Norepinephrine 4
- Adrenergic Receptors 6
- Drugs Affecting Norepinephrine Biosynthesis 9
- Drugs Affecting Norepinephrine Storage 10
- Drugs Affecting Norepinephrine Release 10
- Drugs Acting on Adrenergic Receptors—Agonists 12
- Drugs Acting on Adrenergic Receptors—Antagonists (Blockers) 15
- Individual Compounds 20

2. Cholinergic Drugs 50–101

- Acetylcholine Synthesis and Release 51
- Acetylcholine Receptors 51
- Muscarinic Agonists 55
- Nicotinic Agonists 56
- Acetylcholinesterase Inhibitors 56
- Cholinergic Blockers 59
- Individual Compounds 70

Section II DRUGS AFFECTING CENTRAL NERVOUS SYSTEM

3. General Anesthetics 105–116

- Characteristics of an Ideal Anesthetic 106
- Inhalation Anesthetics 106
- Intravenous Anesthetics 110
- Adjuvants to Anesthetics 114
- Theories and Mechanism of Action of General Anesthetics 114

4. Local Anesthetics	117–137
Ester Type Local Anesthetics	117
Amide Type Local Anesthetics	121
Miscellaneous Compounds	122
Mechanism of Action	123
Administration of Local Anesthetics	124
Individual Compounds	125
5. Sedatives and Hypnotics	138–160
Barbiturates	138
Piperidinediones	141
Benzodiazepines	141
Nonbenzodiazepine GABA _A Receptor Agonists	142
Miscellaneous Compounds	143
Individual Compounds	144
6. Neuroleptics and Anxiolytic Agents	161–198
Neuroleptics	161
Anxiolytic Agents	166
Individual Compounds	170
7. Antiepileptic Drugs	199–215
Characteristics of an Ideal Antiepileptic Drug	199
Antiepileptic Drugs	200
Individual Compounds	204
8. Opioid Analgesics	216–244
Opium and Morphine Analogs	216
Synthetic Opioids	219
Narcotic Antagonists as Analgesics	224
Endogenous Opioid Peptides	224
Opioid Receptors	225
Individual Compounds	226
9. Antiparkinsonian Drugs	245–254
Parkinsonism and Dopamine	245
Individual Compounds	249
10. Central Nervous System Stimulants	255–286
Analeptics	255
Psychomotor Stimulants	256
Antidepressant Drugs	258
Psychotomimetics and Hallucinogens	262
Individual Compounds	263

Section III DRUG THERAPY OF INFLAMMATION

- 11. Antihistaminics and Antiulcer Agents** **289–334**
- Biosynthesis, Storage, and Release of Histamine 290
 - Pharmacological Effects 290
 - Histamine Release Inhibitors 291
 - H₁-Receptor Antagonists 291
 - Histamine Release Inhibitors with H₁-Receptor Antagonistic Activity 297
 - Antiulcer Agents 298
 - Individual Compounds 301
- 12. Analgesics, Antipyretics, and Nonsteroidal Anti-Inflammatory Drugs** **335–375**
- Analgesic, Antipyretic, and Nonsteroidal Anti-Inflammatory Drugs (NSAIDs) 338
 - Cyclooxygenase-2 (Cox-2) Inhibitors 345
 - Disease Modifying Antirheumatoid Drugs (DMARDs) 346
 - Drugs Used in Gout 347
 - Individual Compounds 349

Section IV RENAL AND CARDIOVASCULAR DRUGS

- 13. Diuretics** **379–407**
- Water and Osmotic Agents 381
 - Acidifying Salts 381
 - Organomercurials 382
 - Phenoxyacetic Acids 383
 - Purines and Related Heterocyclics 384
 - Sulphonamides 385
 - Aldosterone Antagonists and Inhibitors 389
 - High Ceiling Diuretics 391
 - Potassium Sparing Diuretics 391
 - Individual Compounds 392
- 14. Antihypertensive Drugs** **408–437**
- Antihypertensive Drugs 409
 - Individual Compounds 420
- 15. Antianginal, Antiarrhythmic, and Cardiotonic Drugs** **438–471**
- Antianginal Drugs 438
 - Antiarrhythmic Drugs 443
 - Cardiotonic Drugs 445
 - Individual Compounds 452

Section V DRUGS ACTING ON BLOOD**16. Anticoagulants, Antiplatelet, and Thrombolytics Drugs 475–496**

- Blood Coagulation 475
- Anticoagulants 478
- Antiplatelet Drugs 482
- Thrombolytic Drugs 485
- Individual Compounds 485

Section VI HORMONES AND ANTIHORMONAL DRUGS**17. Steroids and Steroidal Drugs 499–588**

- Cholesterol 500
- Phytosterols and Mycosterols 501
- Bile Acids 501
- Sex Hormones 503
- Adrenal Cortex Hormones 517
- Individual Compounds 521

18. Hypoglycemic Agents 589–606

- Insulin and Related Analogs 589
- Oral Hypoglycemic Agents 593
- Individual Compounds 596

19. Thyroid and Antithyroid Drugs 607–611

- Biosynthesis of Thyroid Hormones 607
- Mechanism of Action of Thyroid Hormones 608
- Hypothyroidism 609
- Hyperthyroidism 609
- Individual Compounds 610

Section VII DRUGS AFFECTING GASTROINTESTINAL FUNCTIONS**20. Antiemetic Agents 615–624**

- Antiemetic Agents 615
- Individual Compounds 619

21. Drugs Used for Constipation, Diarrhea, and in Inflammatory Bowel Diseases 625–641

- Drugs Used for Constipation 625
- Drugs Used for Diarrhea 629
- Drugs Used in Inflammatory Bowel Diseases 631
- Individual Compounds 633

Section VIII CHEMOTHERAPY—DRUGS USED IN PARASITIC INFECTIONS

- 22. Antiprotozoal Drugs I: Chemotherapy of Malaria** 645–667
Antimalarial Drugs 647
Individual Compounds 660
- 23. Antiprotozoal Drugs II** 668–682
Chemotherapy of Amoebiasis 668
Chemotherapy of Trypanosomiasis 672
Chemotherapy of Leishmaniasis 675
Chemotherapy of Trichomoniasis 675
Chemotherapy of Giardiasis 675
Individual Compounds 675
- 24. Drugs Used in Helminthiasis** 683–692
Anthelmintic Drugs 684
Individual Compounds 688

Section IX CHEMOTHERAPY—DRUGS USED IN MICROBIAL INFECTIONS

- 25. Sulphonamides and Quinolones** 695–719
Sulphonamides 695
Dihydrofolate Reductase Inhibitors 700
Quinolones 702
Individual Compounds 704
- 26. Antibiotics** 720–726
Chemical Classification 720
- 27. β -Lactam Antibiotics** 727–788
Penicillins 727
Carbapenems 735
Cephalosporins 737
Carbacephems and Oxacephems 742
Monobactams 743
Individual Compounds 743
- 28. Peptide Antibiotics** 789–791
Individual Compounds 789
- 29. Macrolide Antibiotics** 792–794
Individual Compounds 793
- 30. Aminoglycoside Antibiotics** 795–799
Individual Compounds 796
- 31. Tetracycline Antibiotics** 800–806
Individual Compounds 802

32. Miscellaneous Antibiotics	807–810
Chloramphenicol 807	
Individual Compounds 809	
33. Chemotherapy of Acid-Fast Infections	811–824
Tuberculosis 811	
Leprosy 818	
Individual Compounds 818	
34. Antifungal Agents	825–846
Antifungal Agents 825	
Individual Compounds 831	
35. Antiviral Agents	847–881
Virus Life History 847	
Approaches for Prevention of Viral Infections 849	
Antiviral Agents 850	
Individual Compounds 858	

Section X CHEMOTHERAPY—DRUGS USED IN CANCER

36. Anticancer Agents	885–919
Alkylating Agents 886	
DNA Cross Linking Agents – Organoplatinum Complexes 892	
Antimetabolites 892	
Antibiotics 896	
Plant Products 898	
Hormones and Antihormones 900	
Inhibitors of Protein Kinases 901	
Miscellaneous Compounds 903	
Individual Compounds 903	

Section XI DIAGNOSTIC AGENTS

37. Diagnostic Agents	923–934
Radiopaque Substances 923	
Individual Compounds 924	

Section XII VITAMINS

38. Vitamins	937–995
Fat Soluble Vitamins 937	
Water Soluble Vitamins 959	
Glossary	997–1012
Subject Index	1013–1020
Compound Index	1021–1041
