<i>Foreword</i> by Prof Dinesh Kumar	<i>v</i>
<i>Preface</i>	<i>vii</i>
1. Errors in Numerical Calculations	1–12
1.1 Introduction	1
1.2 Numbers and Their Accuracy	1
1.3 Mathematical Preliminaries	2
1.4 Errors and Their Computation	3
1.5 A General Error Formula	6
1.6 Error Formula to the Fundamental Operations of Arithmetic and to Logarithms	7
1.7 Error in a Series Approximation	11
2. Simultaneous Linear Algebraic Equations and Eigenvalue Problems	13–65
2.1 Introduction	13
2.2 Gauss Elimination Method (Direct Method)	13
2.3 Gauss–Jordan Method	18
2.4 Gauss’s Elimination Method for Finding the Inverse of a Matrix	23
2.5 Gauss–Jordan Method for Finding the Inverse of a Matrix	27
2.6 Method of Decomposition/Method of Factorisation/ Method of Triangularisation	29
2.7 Method of Decomposition for Finding the Inverse of a Matrix	36
2.8 Crout’s Method	38
2.9 Crout’s Method for Finding the Inverse of a Given Matrix	42
2.10 Iterative Method for Solution (Indirect Method)	46
2.11 Gauss–Jacobi Method of Iteration	46
2.12 Gauss–Siedal Method of Iteration	47
2.13 Relaxation Method	58
2.14 Power Method	62
3. Finite Differences	66–92
3.1 Introduction	66
3.2 Forward Differences	66
3.3 Backward Differences	68
3.4 Central Differences	69
3.5 Differences of Polynomial	70
3.6 Factorial Notation	71
3.7 Other Difference Operators	82
3.7.1 Relation between the Operators	82
3.8 Application to Summation of Series	90

4. Interpolation 93–135

- 4.1 Introduction 93
- 4.2 Interpolation Formula for Equal Intervals 93
 - 4.2.1 Gregory–Newton’s Forward Interpolation Formula or Newton’s Forward Interpolation Formula for Equal Intervals 93
 - 4.2.2 Gregory–Newton’s Backward Interpolation Formula for Equal Intervals 94
- 4.3 Central Difference Interpolation Formula 103
 - 4.3.1 Gauss Forward Interpolation Formula 103
 - 4.3.2 Gauss Backward Interpolation Formula 104
 - 4.3.3 Bessel’s Formula 106
 - 4.3.4 Stirling’s Formula 107
- 4.4 Choice of an Interpolation Formula 107
- 4.5 Interpolation with Unequal Intervals 113
 - 4.5.1 Lagrange’s Interpolation Formula with Unequal Intervals 113
 - 4.5.2 Divided Differences 114
 - 4.5.3 Newton’s Divided Difference Formula 116
- 4.6 Inverse Interpolation 120
 - 4.6.1 Lagrange’s Interpolation 120
 - 4.6.2 Iterative Method 121
- 4.7 Spline Interpolation 124
 - 4.7.1 Cubic Spline Interpolation 124
- 4.8 Hermite’s Interpolation Formula 129
- 4.9 Interpolation by Iteration 134

5. Empirical Laws and Curve Fitting 136–161

- 5.1 Introduction 136
- 5.2 Graphical Method 136
- 5.3 Laws Reducible to Linear Laws 137
- 5.4 Method of Group Averages 139
- 5.5 Laws Containing Three Constants 142
- 5.6 Principle of Least Squares 147
- 5.7 Fitting a Straight Line 148
- 5.8 Fitting a Parabola or a Second Degree Curve 151
- 5.9 Fitting of Other Curves 155
- 5.10 Curve Fitting by a Sum of Exponentials 159

6. Solution to Numerical, Algebraic and Transcendental Equations 162–193

- 6.1 Introduction 162
- 6.2 Bisection Method (Bolzano Method or Interval Halving Method) 163
- 6.3 Method of False Position (Regula–Falsi Method) 168
- 6.4 Newton–Raphson Method 173
- 6.5 Convergence of Newton–Raphson Method 174
- 6.6 Generalized Newton’s Method for Multiple Roots 180
- 6.7 Secant Method 182
- 6.8 Fixed-Point Iteration Method 184
 - 6.8.1 Sufficient Conditions for Convergence 184
- 6.9 Muller’s Method 190

7. Numerical Differentiation and Integration 194–242

- 7.1 Introduction 194
- 7.2 Formula for Derivatives 194
 - 7.2.1 Derivatives Using Newton's Forward Difference Formula 194
 - 7.2.2 Derivatives Using Backward Difference Formula 196
 - 7.2.3 Derivatives Using Central Difference Formula 197
- 7.3 Maxima and Minima of a Tabulated Function 197
- 7.4 Cubic Spline Method 204
- 7.5 Numerical Integration 206
- 7.6 Quadrature Formula 207
 - 7.6.1 Trapezoidal Rule 207
 - 7.6.2 Simpson's 1/3 Rule 208
 - 7.6.3 Simpson's 3/8 Rule 208
 - 7.6.4 Boole's Rule 209
 - 7.6.5 Weddle's Rule 209
- 7.7 Newton–Cotes' Formula 210
- 7.8 Errors in Quadrature Formula 222
 - 7.8.1 Errors in Trapezoidal Rule 222
 - 7.8.2 Errors in Simpson's 1/3 Rule 223
 - 7.8.3 Errors in Simpson's 3/8 Rule 224
 - 7.8.4 Error in Boole's Rule 225
 - 7.8.3 Error in Weddle's Rule 225
- 7.9 Romberg's Method of Integration 225
- 7.10 Euler–Maclaurin Formula 228
- 7.11 Gaussian Integration 232
- 7.12 Numerical Double Integration 235
 - 7.12.1 Trapezoidal Rule 236
 - 7.12.2 Simpson's Rule for Double Integration 237

8. Numerical Solution of Ordinary Differential Equations 243–283

- 8.1 Introduction 243
- 8.2 Picard's Method 243
- 8.3 Taylor's Series Method 250
- 8.4 Euler's Method 255
- 8.5 Modified Euler's Method 256
- 8.6 Runge–Kutta Method 264
- 8.7 Predictor–Corrector Method 270
- 8.8 Milne's Method 271
- 8.9 Adams–Bashforth Method 277

9. Numerical Solution of Partial Differential Equations 284–322

- 9.1 Introduction 284
- 9.2 Finite Difference Approximations to the Various Derivatives 284
- 9.3 Finite Difference Approximations to Partial Derivatives 285
- 9.4 Classification of Partial Differential Equations 287
- 9.5 Elliptic Equation 287
 - 9.5.1 Jacobi's Method 288
 - 9.5.2 Gauss–Seidal Method 288
 - 9.5.3 Successive Over-Relaxation or SOR Method 289
- 9.6 Solution of Laplace's Equation by Liebmann's Iteration Process 289

- 9.7 Wave Equation 305
- 9.8 Solution of One-Dimensional Heat Equation 311
 - 9.8.1 Bender–Schmidt Method 311
 - 9.8.2 Crank–Nicholson Method 312
 - 9.8.3 Du Fort–Frankel Method 312

10. Computational Techniques (Programming Using C) 323–360

- 10.1 Gauss Elimination Method 323
- 10.2 Gauss–Jordan Method 324
- 10.3 Gauss–Seidal Method 327
- 10.4 Bisection Method 329
- 10.5 Newton–Raphson Method 332
- 10.6 Regula–Falsi Method 334
- 10.7 Newton’s Forward Interpolation Formula 336
- 10.8 Newton’s Backward Interpolation Formula 338
- 10.9 Lagrange’s Interpolation 340
- 10.10 Method of Least Square (to Fit a Straight Line) 342
- 10.11 Method of Least Square (to Fit a Parabola) 344
- 10.12 Trapezoidal Rule of Integration 346
- 10.13 Simpson’s 1/3 Rule 348
- 10.14 Simpson’s 3/8 Rule 349
- 10.15 Euler’s Method 350
- 10.16 Runge–Kutta Method 352
- 10.17 Program Demonstrating Solution of Laplace’s Equations 353
- 10.18 Solution of One-Dimensional Heat Flow Equation by Schmidt Method 357

11. Computational Techniques (Programming Using MATLAB) 361–372

- 11.1 Gauss–Jacobi Method 361
- 11.2 Lagrange’s Interpolation Method 362
- 11.3 Newton–Raphson Method 363
- 11.4 Secant Method 364
- 11.5 Euler Method 365
- 11.6 Runge–Kutta Method 365
- 11.7 Regula–Falsi Method (Method of False Position) 366
- 11.8 Trapezoidal Rule 367
- 11.9 Simpson’s 1/3 Rule 368
- 11.10 Simpson’s 3/8 Rule 369
- 11.11 Boole’s Rule 370
- 11.12 Weddle’s Rule 371

Model Question Papers and Previous Years’ Question Papers 373–411

Index 413–416
