<i>Foreword by TD Chugh</i>	<i>vii</i>
<i>Preface to the Sixth Edition</i>	<i>ix</i>
<i>Preface to the First Edition</i>	<i>xi</i>
<i>Index of Competencies</i>	<i>xiii</i>

Section 1: General Parasitology

1. General Parasitology	3	Portal of entry into the body 5 Life cycle of human parasites 6 Pathogenicity 6 Immunity in parasitic infections 7 Classification of parasites 10 Nomenclature of parasites 11
--------------------------------	----------	---

Parasite 3
Why a human embryo or foetus is not a parasite? 3
Host 3
Host-parasite relationships 5
Sources of infection 5

Section 2: Protozoology

2. Unicellular Parasites	17	4. Flagellates	37
Kingdom Protozoa 17 Phyla Metamonada, Parabasala, Percolozoa and Euglenozoa 17 Phylum Amoebozoa 17 Phylum Sporozoa 17 Phylum Ciliophora 17 Kingdom Stramenopila (formerly Chromista) 17 Phylum Bigyra 17 Kingdom Fungi 17 Phylum Microspora (Microsporidians) 17		Intestinal, oral and genital flagellates 37 <i>Giardia lamblia</i> (<i>G. duodenalis</i> ; <i>G. intestinalis</i>) 37 <i>Trichomonas</i> 40 <i>Trichomonas tenax</i> 40 <i>Trichomonas hominis</i> 40 <i>Trichomonas vaginalis</i> 41 <i>Chilomastix mesnili</i> 42 <i>Enteromonas hominis</i> 42 <i>Retortamonas intestinalis</i> 43 <i>Dientamoeba fragilis</i> 43 Blood and tissue flagellates 44 <i>Leishmania</i> 44 Old World leishmaniasis 45 <i>Leishmania donovani</i> 45 Post kala-azar dermal leishmaniasis 49 <i>Leishmania infantum</i> 49 <i>Leishmania tropica</i> complex 49 <i>Leishmania tropica</i> 49 <i>Leishmania major</i> 50 <i>Leishmania aethiopica</i> 51 New World leishmaniasis 51 <i>Leishmania braziliensis</i> complex and <i>Leishmania mexicana</i> complex 51 <i>Leishmania peruviana</i> 52 <i>Leishmania chagasi</i> 52	
3. Amoebae and Naegleria fowleri	19		
<i>Entamoeba histolytica</i> 19 Non-pathogenic amoebae 26 <i>Entamoeba dispar</i> 26 <i>Entamoeba hartmanni</i> 26 <i>Entamoeba coli</i> 26 <i>Entamoeba polecki</i> 26 <i>Entamoeba gingivalis</i> 26 <i>Endolimax nana</i> 28 <i>Iodamoeba bütschlii</i> 28 Opportunistic protozoa 29 <i>Naegleria fowleri</i> 29 Acanthamoeba species 31 <i>Balamuthia mandrillaris</i> 32			

Trypanosomes	52	Babesia	77
<i>Trypanosoma brucei gambiense</i>	52	<i>Toxoplasma gondii</i>	79
<i>Trypanosoma brucei rhodesiense</i>	55	Sarcocystis species	84
<i>Trypanosoma cruzi</i>	55	<i>Cytoisospora (Isospora) belli</i>	86
<i>Trypanosoma rangeli</i>	59	<i>Cyclospora cayetanensis</i>	87
5. Sporozoa	65	<i>Cryptosporidium parvum</i>	89
Malaria parasites	65	<i>Blastocystis</i> species	92
Rapid diagnostic tests	74		
Quantitative buffy coat test	75		
<i>Plasmodium knowlesi</i>	77		
		6. <i>Balantidium coli</i>	99
		7. Microsporidia	102

Section 3: Helminthology

8. Introduction to Helminths	109	Hookworms	165
		<i>Ancylostoma duodenale</i>	165
General characteristics of cestodes	111	<i>Necator americanus</i>	169
Classification of cestodes	112	<i>Ancylostoma braziliense</i>	169
<i>Diphyllobothrium latum</i>	113	<i>Ancylostoma ceylanicum</i>	169
<i>Spirometra</i> species	115	<i>Ancylostoma caninum</i>	169
<i>Taenia</i> species	117	Cutaneous larva migrans	170
<i>Taenia saginata</i> and <i>Taenia solium</i>	117	<i>Enterobius vermicularis</i>	170
<i>Taenia asiatica</i>	121	<i>Ascaris lumbricoides</i>	173
<i>Taenia multiceps</i>	121	<i>Ascaris suum</i>	176
<i>Hymenolepis nana</i>	122	Visceral larva migrans	176
<i>Hymenolepis diminuta</i>	123	<i>Baylisascaris procyonis</i>	177
<i>Dipylidium caninum</i>	125	Filarial nematodes	177
<i>Echinococcus granulosus</i>	126	<i>Wuchereria bancrofti</i>	178
<i>Echinococcus multilocularis</i>	131	Occult filariasis	182
<i>Echinococcus vogeli</i>	131	Tropical pulmonary eosinophilia (TPE)	182
9. Cestodes or Tapeworms	111	<i>Brugia malayi</i>	183
General characteristics of cestodes	111	<i>Brugia timori</i>	184
Classification of cestodes	112	<i>Loa loa</i>	185
<i>Diphyllobothrium latum</i>	113	<i>Onchocerca volvulus</i>	186
<i>Spirometra</i> species	115	<i>Mansonella streptocerca</i>	187
<i>Taenia</i> species	117	<i>Mansonella ozzardi</i>	188
<i>Taenia saginata</i> and <i>Taenia solium</i>	117	<i>Mansonella perstans</i>	188
<i>Taenia asiatica</i>	121	<i>Dirofilaria</i> species	188
<i>Taenia multiceps</i>	121	<i>Dirofilaria immitis</i>	188
<i>Hymenolepis nana</i>	122	Other <i>Dirofilaria</i> species	188
<i>Hymenolepis diminuta</i>	123	Other nematodes	189
<i>Dipylidium caninum</i>	125	<i>Dracunculus medinensis</i>	189
<i>Echinococcus granulosus</i>	126	<i>Angiostrongylus</i> species	190
<i>Echinococcus multilocularis</i>	131	<i>Angiostrongylus cantonensis</i>	190
<i>Echinococcus vogeli</i>	131	<i>Angiostrongylus costaricensis</i>	191
10. Trematodes or Flukes	136	<i>Gnathostoma</i> species	192
General characteristics	136	<i>Gnathostoma spinigerum</i>	192
Classification of trematodes	137	<i>Gnathostoma hispidum</i>	194
Schistosomes or blood flukes	137	<i>Gnathostoma doloresi</i>	194
<i>Schistosoma mekongi</i>	141	<i>Gnathostoma nipponicum</i>	194
<i>Schistosoma intercalatum</i>	141	<i>Ternidens deminutus</i>	195
<i>Fasciola hepatica</i>	142	<i>Capillaria philippinensis</i>	195
<i>Fasciola gigantica</i>	144	<i>Capillaria hepatica</i>	196
<i>Fasciolopsis buski</i>	144	<i>Capillaria aerophila</i>	196
<i>Clonorchis sinensis</i>	146	<i>Anisakis simplex</i>	196
<i>Paragonimus westermani</i>	148	<i>Oesophagostomum</i> species	197
Trematodes of minor importance	150	<i>Trichostrongylus</i> species	198
<i>Gastropiscoides hominis</i>	150	<i>Thelazia callipaeda</i>	198
<i>Watsonius watsoni</i>	151	<i>Diocophyema renale</i>	198
<i>Opisthorchis felineus</i>	151		
<i>Opisthorchis viverrini</i>	152		
<i>Heterophyes heterophyes</i>	152		
<i>Metagonimus yokogawai</i>	152		
11. Nematodes	156		
General characteristics	156		
Modes of infection with nematode parasites	157		
Classification of nematodes	157		
<i>Trichinella spiralis</i>	157		
<i>Trichuris trichiura</i>	160		
<i>Strongyloides stercoralis</i>	162		

Section 4: Applied Parasitology, Diagnostic Procedures and Overview

12. Parasitic Opportunistic Infections in AIDS Cases and Nosocomial Parasitic Infections	207	Midges 228 Arachnids 228 Ticks 228 Other arthropods 228
Parasitic opportunistic infections in AIDS cases	207	
<i>Toxoplasma gondii</i>	207	
<i>Cryptosporidium parvum</i>	207	
<i>Cytoisospora belli</i>	208	
<i>Microsporidia</i>	208	
<i>Entamoeba histolytica</i>	208	
<i>Giardia lamblia</i>	208	
<i>Cyclospora cayetanensis</i>	208	
<i>Leishmania</i> species	208	
<i>Strongyloides stercoralis</i>	209	
Free-living protozoa	209	
Nosocomial parasitic infections	209	
Nosocomial gastrointestinal infections	209	
Nosocomial blood and tissue infections	209	
Nosocomial parasitic infections in the paediatric patients	209	
13. Diagnostic Procedures	211	Habitat 238 Morphology 239 Portal of entry 239 Source of infection 240 Life cycle 240 Obligate intracellular parasites 241 Symptomatology 241 Clinical samples 242 Parasites which can be cultured in the laboratory 243 Skin tests 243 Classification of nematodes 243 Nematodes which do not show systemic migration in man 243 Types of microfilariae 243 Parasitic causes of travellers' diarrhoea 244 Concomitant immunity 244 Life-long immunity 244 Laboratory workers must adhere to universal precautions when handling specimens from patients with suspected 244 Most lethal of all helminthic infections of man 244 Both male and female worms remain coiled together and it is difficult to separate them 244
14. Medically Important Arthropods	225	<i>Relative sizes of morphological forms of various protozoa</i> 245 <i>Relative sizes of helminthic eggs</i> 246 <i>Index</i> 247
Insects	226	
Mosquitoes	227	
Sandflies	228	
Beetles	228	
Reduviid bugs	228	
Fleas	228	
Lice	228	
Other biting flies	228
