<i>Contributors</i>	v
<i>Preface</i>	vii
1. Introduction	1–6
<ul style="list-style-type: none"> • Definition and History of Pharmacognosy • Scope and Present Status of Pharmacognosy 	
2. Classification of Crude Drugs	7–11
<ul style="list-style-type: none"> • Taxonomical, Pharmacological, Chemo-taxonomical, Alphabetical, Morphological, Chemical 	
3. Quality Control of Herbal Drugs	12–26
<ul style="list-style-type: none"> • Different Methods of Adulteration of Crude Drugs • Evaluation of Crude Drugs 	
4. Phytopharmaceuticals	27–39
<ul style="list-style-type: none"> • Distribution, Identification Tests, Pharmaceutical Applications, Isolation, the Therapeutic Activity of Terpenoids, Volatile Oils, Resins, Alkaloids, Glycosides, Tannins 	
5. Crude Drugs used in Phytotherapy	40–91
<ul style="list-style-type: none"> • Laxatives: Castor oil, Senna, Aloe, Ispaghula • Cardiotonic: Arjuna, Digitalis • Carminatives and G.I. regulators: Fennel, Ginger, Black Pepper, Nutmeg, Coriander, Cardamom, Clove, Black Pepper, Asafoetida, Cinnamon • Astringents: Black Catechu, Myrobalan, Pale Catechu • Drugs acting on the nervous system: Belladonna, Opium, Coffee seeds, Hyoscyamus, Ephedra, Tea leaves, Coca • Anti-hypertensive: Rauwolfia • Anti-tussive: Tolu Balsam, Vasaka • Anti-rheumatics: Colchicum seed 	

- Anti-tumour: Podophyllum, Vinca
- Antidiabetics: Gymnema, Pterocarpus
- Diuretics: Punarnava, Gokhru
- Anti-dysenteric: Ipecacuanha
- Antiseptics and disinfectants: Myrrh, Turmeric, Benzoin, Neem
- Antimalarials: Artemisia, Cinchona
- Oxytocic: Ergot
- Vitamins: Shark liver oil, Cod liver oil
- Enzymes: Diastase, Yeast, Papaya, Pancreatin
- Pharmaceutical Aids: Lanolin, Acacia, Sodium alginate, Guar gum, Kaolin, Beeswax, Tragacanth, Agar, Gelatin
- Miscellaneous: Galls, Tulsi, Guggul, Squill, Ashwagandha

6. Plant Fibres used as Surgical Dressings 92–96

- Silk, Regenerated Fibers, Cotton, Wool

7A. Basic Principles Involved in the Traditional Systems of Medicine 97–103

- Siddha, Homeopathy, Ayurveda, Unani

7B. Method of Preparation of Ayurvedic Formulations 104–109

- Introduction
- Ayurvedic Formulations
- Preparation and Standardization of Ayurvedic Formulations
- Aristas and Asavas
- Gutika
- Churna
- Taila
- Lehya/Leha
- Bhasma

8. Role of Medicinal and Aromatic Plants in the National Economy and their Export Potential 110–112

9. Nutraceuticals: Components and Applications 113–118

- Therapeutic Applications and Introduction of Antioxidants, Pre-biotics, Omega-3-fatty Acids, Carotenoids, Garlic, Nutraceuticals, Probiotics, Dietary Fibres, Spirulina, Soya

10. Introduction to Herbal Formulations	119–129
<hr/>	
<ul style="list-style-type: none">• Origin and concept• Herbal Formulations• Steps Involved in Herbal Drug Formulation• Types of Conventional Herbal Formulations<ul style="list-style-type: none">1. Liquid Herbal Dosage Forms2. Solid Herbal Dosage Forms3. Other Herbal Dosage Forms4. Novel Dosage Form• Traditional Ayurvedic Formulations• Challenges and Limitations of Herbal Formulations• Herbal Formulations' Way Forward	
11. Herbal Cosmetics	130–134
<hr/>	
<ul style="list-style-type: none">• Chemical constituents, therapeutic and cosmetic uses, Sources, commercial preparations of Almond oil, Olive oil, Sandal Wood oil, Aloe vera gel, Lavender oil, Rosemary oil	
12. Phytochemical Investigation of Drugs	135–139
<hr/>
