

## CONTENTS

Preface . . . . .	v
Introduction . . . . .	xi
General References . . . . .	xiii

### PART 1

#### *General Methods Used in Official Pharmaceutical Analyses*

1. Remarks and General Directions. . . . .	3
2. Gravimetric Analysis. . . . .	27
3. Principles of Titrimetric (Volumetric) Analysis . . . . .	55
4. Acidimetric Analysis. . . . .	80
5. Alkalimetric Analysis . . . . .	101
6. Nonaqueous Titrimetric Analysis . . . . .	114
7. Precipitation and Complexation Methods of Analysis. . . . .	128
8. Oxidation-Reduction Methods . . . . .	157
9. Oxidation-Reduction: Iodimetric and Iodometric Methods. . .	179
10. Gasometric Analysis. . . . .	212

### PART 2

#### *Special Methods Used in Official Pharmaceutical Analyses*

11. Ash and Water Determinations . . . . .	225
12. Extractive and Crude Fiber Content . . . . .	235
13. Constants of Fats, Fatty Oil, Waxes, Balsams, Resins, Etc. .	243
14. Assay of Volatile Oils . . . . .	262
15. Principles of Alkaloidal Assays. . . . .	280
16. Alkaloidal Assays by Official Type Methods . . . . .	295
17. Alkaloidal Assays by Special Methods. . . . .	304
18. Other Official Assays Involving the Use of Immiscible Solvents	315
19. Assay of Enzyme-containing Substances . . . . .	318

**PART 3***Physicochemical and Instrumental Methods Used in Official Pharmaceutical Analyses*

20. Spectrometry . . . . .	327
21. Potentiometry . . . . .	364
22. pH and Hydronium Ion Concentration in Aqueous Systems . .	379
23. Polarography . . . . .	413
24. Electrodeposition . . . . .	423
25. Chromatography . . . . .	425
26. Radioactivity . . . . .	442
27. Rotatory Power . . . . .	447
28. Refractometric Measurements . . . . .	457
29. Melting, Congealing, and Boiling-point Determinations . . .	463
30. Specific Gravity and Density . . . . .	476
31. Solubility . . . . .	492
32. Viscosity Measurements . . . . .	496

## Reference Tables

Logarithms of Numbers . . . . .	501
Antilogarithms . . . . .	503
Atomic Weights . . . . .	505

Index . . . . .	507
-----------------	-----
