

# Contents

---

1.	Nutrients in Soils, Plants, Waters, Fertilizers and Manures .....	1
2.	Soil Sampling and Preparation of Soil Sample for Analysis .....	16
3.	Determination of Soil pH ( Soil Reaction).....	21
4.	Determination of Organic Carbon in Soils .....	29
5.	Determination of Available Nitrogen in Soils by Alkaline Potassium Permanganate Method .....	33
6.	Determination of Available Phosphorous in Soil by Olsen' s Method (For neutral to alkaline soils) .....	37
7.	Determination of Available Potassium in Soils by Flame photometry .....	43
8.	Determination of Exchangeable Calcium and Magnesium in Soils by Standard Versenate (EDTA - Titration) Method .....	47
9.	Determination of Available Sulphur in Soils by Turbidometry .....	52
10.	Determination of DTPA- Extractable Micronutrient Cations viz, Zn, Cu, Mn and Fe by AAS- Method. ....	56
11.	Determination of Available (hot water soluble) Boron in Soil by Curcumine Method .....	60

12.	Analysis of plant Materials For Macro and Micronutrients .....	67
13.	Tissue Testing for Major Plant Nutrients ( N, P and K ) .....	101
14.	Analysis of Irrigation Waters.....	104
15.	Analysis of Fertilisers for Major and Micronutrients .....	140
