MCQs in Microbiology and Parasitology With Explanations has been thoroughly revised. Most of the books available in the market deal with MCQs and their answers only. As no explanations of correct and incorrect choices are given, the candidate forgets the correct answer. For proper understanding and remembering, the student must know why a particular choice is correct and other choices are wrong. In this book explanations of correct and incorrect answers have been given. This helps the candidate to remember the correct answers. In the last chapter, imagebased MCQs have been given. Each question carries one photomicrograph or photograph and the candidate is asked to identify the correct answer. Explanations of both correct and incorrect choices are given. In addition, more MCQs with explanations have been added.
