Competency Based Textbook of Psychiatry

Author : **Mehra RK**
ISBN : **9789354666940**
Year : **2024**
Binding : **Paperback**
Pages : **312**
Price : **Rs. 495.00**

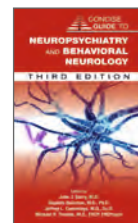

Product Description

This book covers all the competencies in psychiatry as per the Competency Based Undergraduate Curriculum prescribed by National Medical Commission for Indian medical graduates. The text has been written as a conceptual framework and in a lucid manner to make it more interesting and engrossing for the undergraduate students. Some difficult to understand topics such as psychoanalysis, bipolar disorder, schizophrenia, personality psychology have been written in such a manner that makes it easy to understand and memorise. The Textbook also covers some basic topics which are necessary to have an in-depth understanding of psychiatry, such as neuroanatomy and neurophysiology pertaining to psychiatry, and psychopharmacology. Simple and easily reproducible illustrations and tables have been introduced at relevant places in the text to help the undergraduate student understand the core concepts in psychiatry better, especially the neurobiological aspects of psychiatric illnesses

Concise Guide to Neuropsychiatry & Behavioral Neurology

Author : **Barry J.J.**
ISBN : **9781615374090**
Year : **2023**
Binding : **Paperback**
Pages : **370**
Price : **\$ 68.00**

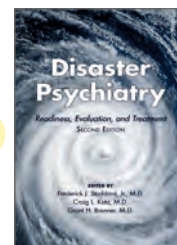

Product Description

For nearly three decades, the Concise Guide to Neuropsychiatry and Behavioral Neurology has helped many clinicians treat patients with neuropsychiatric and neurobehavioral syndromes with insight and kindness. This third edition of the seminal guide picks up that mantle, combining an emphasis on excellent patient care with all the scientific rigor of preceding editions. It has been updated to account for the development of new techniques in brain imaging; improvement in electrophysiological methods to better detect epilepsy and sleep disorders; and a growing list of blood and spinal fluid biomarkers that have revolutionized diagnostic capability. With information on the latest treatment options for more than a dozen disorders and a wealth of recommended readings that open the door to further study, this resource is primed to help a new generation of clinicians—from trainees to experienced practitioners—not only diagnose with greater accuracy but also manage their patients' conditions, however complex they may be.

Disaster Psychiatry Readiness Evaluation and Treatment

Author : **Stoddard F.J.**
ISBN : **9780873182508**
Year : **2025**
Binding : **Paperback**
Pages : **394**
Price : **\$ 89.00**

Product Description

Coming more than a decade after the first edition, this new edition of Disaster Psychiatry was spurred by the coronavirus disease 2019 (COVID-19) pandemic and necessitated by ongoing impact of climate change, racial and ethnic strife, mass shootings, wars, and more. This volume deftly synthesizes information from peer-reviewed scientific literature; the clinical wisdom imparted by frontline psychiatrists, psychologists, and social workers; and the experiences of those who have organized disaster mental health services.

 ISBN : **9781615375448**
 Year : **2025**
 Binding : **Paperback**
 Pages : **304**
 Price : **Rs. 70.00**

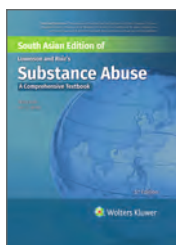

Product Description

Few substances are as enigmatic as ketamine. Is it an effective anesthetic? A useful tool for the psychiatrist? A doorway to transcendence and spiritual awakening? A dangerously addictive drug? The opinions are as plentiful as the individuals who encounter it. As its use in the psychiatric setting expands, however, it's important for clinicians and patients alike to move past preconceived notions and misconceptions and truly understand ketamine: its history, its uses, its effects, and what the future might hold. They'll find no better resource than Ketamine: The Story of Modern Psychiatry's Most Fascinating Molecule. Meticulously researched, engagingly written, and comprehensive in scope, this book traces ketamine's history, examining:

Lowinson and Ruiz's Substance Abuse

Author : **Ruiz**

Psychoanalysts Psychologists and Psychiatrists Discuss Psychopathy and Human Evil

Author : **Itzkowitz S.**
ISBN : **9780367205850**
Year : **2020**
Binding : **Paperback**
Pages : **298**
Price : **£ 35.99**

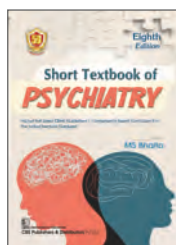

Product Description

Evil - along with its incarnation in human form, the psychopath - remains underexamined in the psychological and psychoanalytic literature. Given current societal issues ranging from increasingly violent cultural divides to climate change, it is imperative that the topics of psychopathy and human evil be thoughtfully explored. The book brings together social scientists, psychologists, and psychoanalysts to discuss the psychology of psychopaths, and the personal, societal and cultural destruction they leave as their legacy. Chapters address such questions as: Who are psychopaths? How do they think and operate? What causes someone to commit psychopathic acts? And are psychopaths born or created? Psychopaths leave us shocked and bewildered by behavior that violates the notions of common human trust and bonding, but not all psychopaths commit crimes. Because of their unique proclivities to deceive, seduce, and dissemble, they can hide in plain sight; especially when intelligent and highly educated. This latter group comprise the "successful or corporate" psychopaths, frequently found in boardrooms of corporations and among leaders of national movements or heads of state.

Bickerstaff's Neurological Examination in Clinical Practice

Author : **Prasad**
 ISBN : **9788126538980**
 Year : **2025**
 Binding : **Paperback**
 Pages : **381**
 Price : **Rs. 1150.00**

7/e

Product Description

This full revised edition of a classic textbook is designed for undergraduate and postgraduate general medicine and neurology students requiring a complete understanding of the basic knowledge and skills surrounding clinical neurological examination. Bickerstaff's Neurological Examination in Clinical Practice focuses on teaching the techniques of neurological examination together with the principal methods of disorder investigation and then suggests how these findings can best be applied in the treatment and management of patients.

New to This Edition

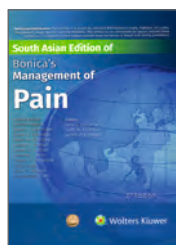

- A new chapter on localization: providing key points to students in localizing the site of lesions in patients with neurological disorders. The chapter begins with localizing features of disorders involving the muscles and neuromuscular junction and then discusses the cardinal features of lesions of the various parts of the neuraxis.
- An appendix on history taking and neurological examination: providing a useful resource, in check list form, of tests to be conducted and actions to be taken in the neurological examination of the patient along with their normal and abnormal results – perfect for undergraduate students in particular.

Product Description

Gain a foundational understanding of complex physiology concepts with this thoroughly revised text. Cellular Physiology and Neurophysiology, a volume in the Mosby Physiology Series, explains the fundamentals of these multi-faceted areas in a clear and concise manner. It helps bridge the gap between basic biochemistry, molecular and cell biology, and neuroscience, and organ and systems physiology, providing the rich, clinically oriented coverage needed to master the latest concepts in neuroscience and how cells function in health and disease.

Diabetic Neurology

Author : **Zochodne**
 ISBN : **9781420085532**
 Year : **2010**
 Binding : **Hardcover**
 Pages : **178**
 Price : **£ 75.00**

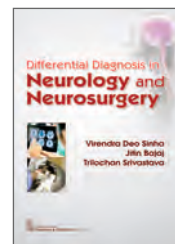

Product Description

Diabetic Neurology offers a unique focus on the broad neurological complications of diabetes, bridging the clinical divide between diabetology and neurology with a practitioner-friendly guide for the recognition, investigation and management of diabetic patients with neurological disease. This book provides a comprehensive, practical review of the problems encountered at the interface of diabetes and neurology. The point form format facilitates a thorough summary of the diabetological and neurological approach to patients and their related disease states. The authors of this book bring together their expertise in these shared fields to address the problems neurologists may encounter in diabetic patients and the important neurological issues to consider in diabetes clinics. The emphasis is on adult patients and some topics are deliberately covered in more than one section, depending on the context of the discussion.

Differential Diagnosis in Neurology and Neurosurgery

Author : **Sinha**
 ISBN : **9789387742819**
 Year : **2020**
 Binding : **Paperback**
 Pages : **232**
 Price : **Rs. 435.00**

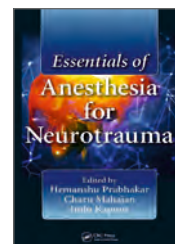

Product Description

Differential Diagnosis in Neurology and Neurosurgery is a unique book which begins from a common neurological symptom and reaches different differential diagnoses. The text is divided into 24 chapters; each chapter starts with a blueprint of the approach, keeping a pedagogical view. Detailed historytaking with appropriate points to simulate settings of different patient profiles is well explained. Stress is given on focused regional examination and appropriate investigations. List of differential diagnosis with salient features has been given at the end of each chapter. The reader will learn how to take history, perform examination, and order relevant investigations for establishing a diagnosis. This book is especially dedicated to residents of medicine, neurology and neurosurgery.

Manual of Neurologic Emergencies (SAE)

Author : Jagoda A.S.
ISBN : 9789390612048
Year : 2022
Binding : Paperback
Pages : 372
Price : Rs. 1799.00

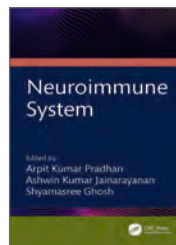

Product Description

Based on the highly-regarded Walls Manual of Emergency Airway Management and part of the Manual of Emergency Medicine series envisioned by leading authority in emergency medicine, Dr. Ron M. Walls, Manual of Neurologic Emergencies provides evidence-based, easy-to-read coverage on the diagnosis and management of neurologic emergencies. Through the direction and expertise of editors Drs. Andy S. Jagoda and Christopher A. Lewandowski, this reference is a practical guide to approaching the patient with a neurologic complaint in a systematic way, providing a hands-on framework for clinical decision making and therapeutic interventions.

Neuroimmune System

Author : Pradhan A.K.
ISBN : 9781032281407
Year : 2025
Binding : Hardcover
Pages : 148
Price : £ 120.00

Product Description

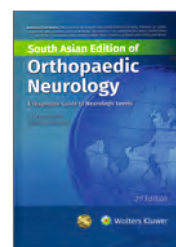

The book explores the intricate connections between the nervous and immune systems in the context of neurodegenerative disorders, offering a comprehensive overview of the bidirectional communication between these systems and their implications for disease progression and therapeutic interventions.

Key Features:

- In-depth analysis of immunological biomarkers and therapeutic targets for neurodegenerative disorders.
- Exploration of the role of glial cells in neuroimmune interactions and their dual nature in disease pathology.
- Examination of short- and long-range interactions between the central nervous system (CNS) and immune system, including hormonal axis and cytokine milieu.
- Discussion on the impact of microbiota on neural networks and immune responses, highlighting the gut-brain axis and potential therapeutic avenues.

Orthopaedic Neurology A Diagnostic Guide To Neurologic Levels, (SAE)

Author : Hoppenfeld J D
ISBN : 9788119877300

Textbook of Neuroanatomy With Clinical Orientation

Author : Dr Singh
ISBN : 9789389688504
Year : 2020
Binding : Paperback
Pages : 288
Price : Rs. 650.00

Product Description

Textbook of Neuroanatomy with Clinical Orientation is a well illustrated, easy to understand text that meets the requirements of undergraduate medical students. The book contains two sections, the first dealing with the central and the second with the peripheral nervous system.

Section 1: Central Nervous System includes a regional approach to the brain and spinal cord, highlighting the relevant clinical applications and presents a large number of well-labelled color diagrams to illustrate the text.

Section 2: Peripheral Nervous System has a well illustrated comprehensive chapter on the functional components of the cranial nerve nuclei. Clinically important topics have been elaborated. A separate appendix Glossary of Neuroanatomical Terms will be of immense value to the students for revision of the neuroanatomical facts.

The book fully conforms to the latest competency-based syllabus prescribed by the Medical Council of India.
